About the Conference:

The rise of disruptive technologies in various departments of engineering is set to dominate the industries in the upcoming years. Focus is being emerged to provide the latest developments of the cutting edge technologies that have immense applications in various fields of engineering sciences such as Electrical, Electronics, Information and Communication technologies. There is an immense need to bridge the gap between the academia and industries that helps in overall development of the society. NCES 2023 is envisioned to provide a technical forum and research discussion related to innovations in engineering and technologies in the broad fields of Electrical, Electronics and Computer Science Engineering. The conference aims to bring researchers, academicians, scientists, practitioners and students together to participate and showcase the results of their current research findings. NCES 2023 aims to provide an amiable yet thoughtful platform for experts from academia and industry to interact with young researchers in the areas of Power Systems, Power Electronics and Drives, Energy systems, Instrumentation and Control Systems etc.
