	19709A0542	RAHUL GAJULA	
47	19709A0513	DEEPA SUNKIREDDY	Sentiment And Emotion Classification Using Convolutional Neural Networks With Long Short Term Memory(CNN-LSTM).
	19709A0511	CHARITHA AMMALLADINNE	
	19709A0533	MANOJ KUMAR DASARI	
	19709A0543	SAI VENKAT NIMMAGADDA	
	19709A0536	NAGASREE JONNA	
48	19709A0522	JAHNAVI SANNIDHI	Employing machine learning , a multiclass prediction model for the student grading system.
	19709A0541	PAVAN KUMAR REDDY DUMPALA	
	19709A0531	MADHURI AKKALADEVI LUMBHINI	
	19709A0554	SURESH DONKA	
	18701A05E7	SWETHA NIMMAGALLU	
49	19709A0549	SRIMAYEE ELLURU	A comparative analysis of machine learning algorithm for short-term load forecasting in smart grid
	19709A0548	SNEHALATHA PATURU	
	19709A0515	DILIP KUMAR BYELLA	
	19709A0530	LOKENDRA BEEMARPU	

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

B.NO	HT.NO	Name of the Candidate	Title of the project
50	19709A0519	HARINI THIMMAREDDY	Predict customer churn through customer Behaviour using machine learning algorithms.
	19709A0555	SUSHMA GOURU	
	19709A0510	CHARANKUMAR REDDY PONNAPUREDDY	
	19709A0535	MOHAMMAD THAHIR SHAIK	
51	19709A0527	LAKSHMI DURGA NARAMREDDY	Covert channel detection in Wireless sensor network.
	19709A0550	SRUTHI GUJJULA	
	19709A0516	HARI PRATHAP NEELAM	
	19709A0523	JASWANTH REDDY BAREDDY	
52	19709A0518	HARINI SANNITHI	Online payment system using QR code.
	19709A0532	MAHENDRA BABU ALA	
	19709A0539	NISHAD PETA	
	19709A0505	ARUN CHANDRA MALLAPU	
53	19709A0545	SEETHA THAMMISSETTY	A machine learning technique to detect signature based malware.
	19709A0504	APARNA KADIYALA

## LIST OF PROJECT TITLES FOR THE ACADEMIC YEAR 2022-23

S.N O	Hall ticket No	Name of the Student	Name of the Title
1	21701E0001	AHALYA KURAPATI	A Study on financial statement analysis in APGENCO
2	21701E0002	ALLABAKASH SHAIK	A Study on Customer satisfaction in Bharathi Airtel LTD
3	21701E0003	ANJALI POLISETTY	A study on liquidity and profitability analysis in APGENCO
4	21701E0004	ANUSHA SEETHAGARI	A study on Employee retention strategies in BBI LTD
5	21701E0005	ARIFULLA PATTAN	A study on Brand loyalty in Bharathi cement corporation private LTD
6	21701E0006	ARIFUNNEESA SHAIK	A study on cash flow Analysis in KCP sugar and industries corporation LTD
7	21701E0007	BALAJI NARUBOINA	A study on financial performance in BSNL
8	21701E0008	BHANUPRAKASH SINGAMALA	A study on inventory management in Dodla Dairy LTD
9	21701E0009	CHARAN KUMAR JALLI	A study on capital budgeting in Anantha PVC pipes LTD
10	21701E0010	DILEEP KUMAR MARAM	Mutual fund comparison and Analysis in HDFC Bank
11	21701E0011	GOPI DOORI	A study on working capital on profitability in Shivasakthi Dairy Pvt Ltd
12	21701E0012	HARI PRIYA NANDYALA	Receivables Management in Nagarjuna Fertilizers and chemicals LTD
13	21701E0013	JABEER SHAIK	A study on liquidity and profitability analysis in Sri Ram Bajaj
14	21701E0014	JAYAPRAKASH SIVARAMGARI	A study on receivable management in Dodla Dairy LTD
15	21701E0015	JAYASURYA VARIKUTI	A study on fixed Assets Management in Bharathi Airtel LTD
16	21701E0016	JYOTHI SANGINADHAM	A study on performance Appraisal in Bharathi Airtel LTD
17	21701E0017	JYOTHI THUMMISETTY	A study on training and development in SPDCL
18	21701E0018	JYOTHSNA ARCOT	A study on performance Appraisal in HCL technologies
19	21701E0019	KALYAN MANDA	A study on inventory management in Penna Cement Industries LTD
20	21701E0020	KARTHIK KAPERLA	A study on capital structure in Nandi pipes Private LTD
21	21701E0021	KARTHIK REDDY O P	A study on portfolio Management in Reliance mutual Funds
22	21701E0022	KHAN LODI FATEH	A study on impact of marketing on consumer buying behaviour in Hirola solutions
23	21701E0023	LAHARI BOLLAPU	A study on financial leverage in Chaitanya chemicals
24	21701E0024	LAKSHMI NARASIAH TANGUTURU	A study on capital structure in Chaitanya chemicals
25	21701E0025	LAKSHMI NARASIMHA RAJU DOMMARAJU	A study on consumer behaviour in Heritage foods pvt ltd
26	21701E0026	LAKSHMI NITHEESHA NALLAGUNDLA	A study on fixed Assets Management in Monarch Networth capital
27	21701E0027	LATHA PAGADALA	A Study on Inventory Management in Maruti suzukiLTD
28	21701E0028	LEKHA AMANCHI	A study on training and development in HDFC Bank
29	21701E0029	LINGA REDDY CHALLA	A study on cash Management in Hindustan coca cola Bevarages LTD
30	21701E0030	MADAN MOHAN REDDY BOGGULA	A study on financial performance in Zuari cement Ltd

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

31	21701E0031	MALLIKARJUNA ENUGOLU	A study on cash Management in Zuari cement Ltd
32	21701E0032	MALLIKARJUNA THANGA	A study on performance evaluation of selected mutual funds in ICICI mutual Funds Ltd
33	21701E0033	MALLIKHARJUNA RAJU GADIRAJU	A study on receivable management in Sagar cements Ltd
34	21701E0034	MAMATHA ARVA	A study on funds flow statement in Shivasakthi Dairy Pvt Ltd
35	21701E0035	MANASA KALADI	A study on career Planning and development in Decathlon sports India Pvt Ltd
36	21701E0036	MANISHA MUKKAMALLA	A study on working capital management in Bharathi cement corporation private LTD
37	21701E0037	MANJULA BIJJIVARAM	A study on capital structure in Heritage foods pvt ltd
38	21701E0038	MOHAMMED MOHIDDIN SHAIK	A study on employee job satisfaction in IT sector in Cognizant Technology solutions
39	21701E0039	MOHAMMED SAYEED SHAIK	A study on financial planning and forecasting in Srikalahasthi Pipes Limited
40	21701E0040	MOULALI SHAIK	A study on fixed Assets Management in Srikalahasthi Pipes Limited
41	21701E0041	MOUNIKA PASUPULETI	A study on performance Appraisal process in BBI LTD
42	21701E0042	MOUNIKA THIPPANNAGARI	Financial Planning and forecasting in Dodla Dairy LTD
43	21701E0043	NAGA DIVYA CHALAMSETTY	A study on comparative balance sheet in Hindusthan coca cola Bevarages LTD
44	21701E0044	NAGRAJ GNANAMKONDA	A study on risk return in India Stock Market in IIFL
45	21701E0045	NIHARIKA NALLAKALVA	A comparative study on effectiveness of Technological Innovations in Banking Sector in ICICI Bank
46	21701E0046	PAVAN KUMAR BOGGANNAGARI	A study on customer perception in Hindusthan coca cola Bevarages LTD
47	21701E0047	RAJA SEKHAR AGADURU	A study on cash flow statement in Tirumala Milk Products Pvt Ltd
48	21701E0048	RAJAKUMARREDDY GANGIREDDY	A study on customer satisfaction in Bharathi cement corporation private LTD
49	21701E0049	RAJESWARI KAVETI	A study on working capital management in Tirupathi cotton Mills
50	21701E0050	RAJYA LAKSHMI DARLA	A study on cash Management in Galla foods Pvt Ltd
51	21701E0051	RAKESH KUMAR REDDY CHINTAMREDDY	A study on customer relationship Management in Fullerton India Ltd
52	21701E0052	RAMYA SREE PURANDARE	A study on working capital management in Nandi polymers India Pvt Ltd
53	21701E0053	RANI KALLURU	A study on inventory management in Amara Raja Batteries Ltd
54	21701E0054	REDDAMMA CHALLA	A study on recruitment and Selection in Roshini Micro systems Ltd
55	21701E0055	SAIMURALI GOUD GUNDRATHI	A study on brand awareness in Nandi pipes Private LTD
56	21701E0056	SARITHA ERAGABOYANA	A study on mutual funds in Kotak Mahindra Bank Ltd
57	21701E0057	SHARMILA SOMALRAJU	A study on financial Derivatives in Karur vysya Bank

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

58	21701E0058	SHIVA KUMAR REDDY PUCHAKAYALA	A study on financial performance in SPDCL
59	21701E0059	SHIVA NAKKA	A study on financial statement analysis in APMDCL
60	21701E0060	SHOYAB SYED	A study on customer satisfaction in ITC Ltd
61	21701E0061	SIRISHA MASINENI	A study on cash flow statement in ICICI Prudential Life Insurance
62	21701E0062	SISINDRI CHUDU	A study on budgetary control in SPDCL
63	21701E0063	SIVA KUMAR PUCHAKAYALA	A study on Budgetary control in TATA Motors
64	21701E0064	SIVA KUMAR RAJU CHOKKARAJU	A study on financial statement analysis in R K Enterprises
65	21701E0065	SIVA LAKSHMI BOYANA	A study on fixed Assets Management in MS Sujala Pipes Pvt Ltd
66	21701E0066	SIVA SANKAR REDDY MEEGADA	A study on financial performance using Ratios in Bharathi cement corporation private LTD
67	21701E0067	SIVA SWETHA MOOLI	A study on impact of working capital management in Nagarjuna Fertilizers and chemicals LTD
68	21701E0068	SIVAMMA KODURU	A study on inventory management in Ultratech cement Ltd
69	21701E0069	SOMA SEKHAR REDDY BOBBITI	A study on funds flow analysis in Ultratech cement Ltd
70	21701E0070	SOUNDARYA PABBATHI	A study on performance evaluation of selected mutual funds in ICICI mutual Funds Ltd
71	21701E0071	SRAVANI AKULA	A Study on Risk Management in Dr Reddy's Laboratories
72	21701E0072	SRAVANI ARVETI	A study on systematic investment plan in SBI Mutual funds
73	21701E0073	SRAVANI DUDELA	A study on performance of mutual funds in Reliance mutual Funds
74	21701E0074	SREEHARI BOTTA	A study on receivable management Ultratech cement Ltd
75	21701E0075	SREELEKHA GAJULAPALLI	A study on impact on inventory management in NTPC
76	21701E0076	SRI SAI NANDEEP KUMAR PERUMALLA	A study on inventory management in Hindustan coca cola Beverages LTD
77	21701E0077	SRIHARIKRISHNA SOLLETI	A study on cash flow statement in Dixon Technologies Ltd
78	21701E0078	SUNIL KUMAR REDDY O P	A study on sales promotion in Reliance JIO Info comm Ltd
79	21701E0079	SUSHMA BOBBURI	A study on budgetary control in HDFC Bank
80	21701E0080	SWATHI TALLAPANENI	A study on performance evaluation of selected mutual funds in SBI Mutual funds
81	21701E0081	TEJA ANDE	A study on financial statement analysis in Capricorn Food products Ltd
82	21701E0082	TULASI AMADASANI	A study on comparative statement Analysis in Amara Raja Batteries Ltd
83	21701E0083	UMAR FAROOQ SHAIK	A study on working capital management in Heritage foods pvt ltd
84	21701E0084	VANDANA CHALLA	A study on performance appraisal in Heritage foods pvt ltd
85	21701E0085	VARALAKSHMI RAGINUTHALA	A study on training and development in Bharathi cement corporation private LTD

## Academic Year 2022-23

### II year Semester - II (Project & Comprehensive Viva))

S. No	Course Code	Course Name	Credits
1	20DF41P	Project work	16
2	20DF42C	Comprehensive Viva-Voce	2
<b>Total</b>			<b>18</b>

S. No	Register Number	Name of the Student	Title of the Project
1	21701F0001	ABDUL VAHEED GAGGUTURU	CROSS -PLATFORM IDENTIFICATION OF ANONYMOUS AND IDENTICAL USERS IN MULTIPLE SOCIAL MEDIA NETWORKS
2	21701F0002	ADISEKHAR BABU KOTTAMIDDE	ANIMAL DETECTION IN FARMS USING OPEN CV
3	21701F0003	AJITH MIRIYAM	PROTECTING YOUR SHOPPING PREFERENCE WITH DIFFERENTIAL PRIVACY
4	21701F0004	ANAND BASANABOYINA	ACCOUNTABLE PROXY RE-ENCRYPTION FOR SECURE DATA SHARING
5	21701F0005	ANILKUMAR KOLANUPAKA	RESUME SCANNER
6	21701F0006	ANILKUMAR REDDY JUTURU	SOIL TESTING APP
7	21701F0007	ANITHA LINGALA	ENABLING SECURE AND SPACE-EFFICIENT METADATA MANAGEMENT IN ENCRYPTED DEDUPLICATION
8	21701F0008	ANNAREDDY MITTAPALLE	DATA INTEGRITY AUDIT SCHEME BASED ON BLOCK CHAIN EXPANSION TECHNOLOGY
9	21701F0009	ANUSHA NANDYALA	TOOL FOR EASY MANAGEMENT OF FILES AND DIRECTORIES
10	21701F0010	ARAVIND KUMAR REDDY GANGULA	THE APPLICATION OF MACHINE LEARNING TECHNIQUES FOR PREDICTING MATCH RESULTS IN TEAM SPORT
11	21701F0011	ARUN KUMAR DARLA	ADVANCE SECURITY IN CLOUD COMPUTING FOR MILITARY WEAPONS
12	21701F0012	ASHRAF ALI SHAIK	CYBER HACKING BREACHES PREDICTION USING MACHINE LEARNING
13	21701F0013	BABA VALI MUTTALA	CLOUD COST OPTIMIZATION FOR PROVIDERS AND USERS
14	21701F0014	BHARATH KUMAR REDDY BOGATHI	AN IRIS RECOGNITION ALGORITHM FOR IDENTITY AUTHENTICATION
15	21701F0015	BHARATHI DASARI THIRUPELUGARI	SMART VOTING SYSTEM USING DEEP LEARNING AND COMPUTER VISION
16	21701F0016	BHARATHSIMHA REDDY KARNATI	NORMALIZATION OF DUPLICATE RECORDS FROM MULTIPLE SOURCES
17	21701F0017	BHARGAVI KONREDDY	A SECURE ANTI COLLISION DATA SHARING FOR DYNAMIC GROUPS IN THE CLOUD
18	21701F0018	BHARGAVI VENNAPUSA	A FOREST FIRE IDENTIFICATION METHOD FOR UNMANNED AERIAL VEHICLE MONITORING VIDEO IMAGES
19	21701F0019	BHAVANI PRASAD AVVARU	WEB CLOUD WEB-BASED CLOUD STORAGE FOR SECURE

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

			DATA SHARING ACROSS PLATFORMS
20	21701F0020	BHAVYA POLLOPALLI	A SECURE AND EFFICIENT CLOUD-CENTRIC INTEREST OF MEDICAL THINGS ENABLED SMART HEALTHCARE SYSTEM WITH PUBLIC VERIFIABILITY
21	21701F0021	CHANDRA OBULREDDY ANDLURU	BLOCKCHAIN FOR FINANCIAL APPLICATION
22	21701F0022	CHANDRALEKHA POOLA	LEVER SECURE DEDUPLICATED CLOUD STORAGE WITH ENCRYPTED TWO PARTY INTERACTIONS IN CYBER PHYSICAL SYSTEMS
23	21701F0023	CHANDRIKA MACHUNOORI	USING DATA MINING TO PREDICT HOSPITAL ADMISSIONS FROM THE EMERGENCY DEPARTMENT
24	21701F0024	CHANDU NALLAPANENI	QUANTUM-SAFE ROUND-OPTIMAL PASSWORD AUTHENTICATION FOR MOBILE DEVICES
25	21701F0025	CHENNA KESAVA REDDY KATTAMEEDI	HOUSE PRICE PREDICTION USING ENHANCED MACHINE LEARNING TECHNIQUES
26	21701F0026	DASTAGIRI BEE P	NOVEL XG-BOOST TUNED MACHINE LEARNING MODEL FOR SOFTWARE BUG PREDICTION
27	21701F0027	DEEKSHITHA GANGAVARAPU	AN EFFICIENT FEEDBACK CONTROL MECHANISM FOR POSITIVE OR NEGATIVE INFORMATION SPREAD IN ONLINE SOCIAL NETWORKS
28	21701F0028	DEEPIKA JUTTURU	MEDICAL REFERENCE SYSTEM
29	21701F0029	DEEPTHI NADINDLA	WEATHER REPORT MANAGEMENT SYSTEM
30	21701F0030	DHANAIAH YAMANA	ONLINE HOUSE CONSTRUCTION SUPPORTING SYSTEM
31	21701F0031	DIVAKAR NAIDU VALMIKI	OBJECT DETECTION WITH VOICE FEEDBACK
32	21701F0032	DIWAKAR PONNA	SEARCH RANK FRAUD AND MALWARE DETECTION IN GOOGLE PLAY
33	21701F0033	FAHEEMUDDIN SHAIK	DRIVER DROWSINESS CLASSIFICATION BASED ON EYE BLINK BY USING KNN ALGORITHM
34	21701F0034	FATHMA MAHABOOB SHAIK	AUTOMATION OF TOLL GATE
35	21701F0035	GANESH J	STUDENT PERFORMANCE ANALYSIS USING MACHINE LEARNING ALGORITHM
36	21701F0036	GANESH MALLELA	INSTANT PLASMA DONOR RECIPIENT CONNECTED WEB APPLICATION
37	21701F0037	GANGA SRAVANI KAKARLA	AN EFFICIENT SPAM DETECTION TECHNIQUE OF AN IOT DEVICES USING MACHINE LEARNING
38	21701F0038	GAYATHRI KALLURU	SMART ATTENDANCE SYSTEM USING FACE RECOGNITION
39	21701F0039	GEETANJALI BAIMUTAKA	MACHINE LEARNING BASED-RAINFALL PREDICTION
40	21701F0040	HARIBABU RAJABOYINA	ONLINE VENUE BOOKING
41	21701F0041	GIRIJA SRIRAMDAS	DETECTION OF DIABETES AND OTHER COMPLICATIONS WITH DEEP LEARNING AND DATA AUGMENTATION TECHNIQUES
42	21701F0042	GOWTHAM KUMAR REDDY DAYYAM	TRAIN YOUR BRAIN
43	21701F0043	GOWTHAMI PIDUGU	DETECTING AND CHARACTERIZING EXTREMIST REVIEWER GROUPS IN ONLINE PRODUCT REVIEWS
44	21701F0044	GURU PRASAD MUPPE	EYE BLINK COUNTER AND ANALYSER

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

45	21701F0045	HARI PRASAD NAGELLA	ONLINE PRODUCT REVIEW SYSTEM
46	21701F0046	HARIBASHA TANGUTURU	GOVERNMENT CONSTRUCTION PROJECT BUDGET PREDICTION USING ML
47	21701F0047	HARINATH REDDY KUNCHAM	IMAGE BASED PLANT DISEASE DETECTION A COMPARISON OF DEEP LEARNING AND CLASSICAL MACHINE LEARNING ALGORITHMS
48	21701F0048	HARITHA CHENNAM	ANALYSIS OF WOMEN SAFETY IN INDIAN CITIES USING ML ON TWEETS
49	21701F0049	HARSHA VARDHAN RUDRAVARAM	PRIVACY PRESERVING PUBLIC AUDITING PROTOCOL FOR CLOUD BASED MEDICAL STORAGE SYSTEMS
50	21701F0050	HEMALATHA HASANAPURAM	EFFICIENT REGULAR LANGUAGE SEARCH FOR SECURE CLOUD STORAGE.
51	21701F0051	HEMANTH KUMAR DASARI KASETTY	PRIVACY PRESERVING DATA SECURITY MODEL FOR CLOUD COMPUTING TECHNOLOGY
52	21701F0052	IMRAN SHAIK	COMPOSITE BEHAVIORAL MODELING FOR IDENTITY THEFT DETECTION IN ONLINE SOCIAL NETWORKS
53	21701F0053	JASWANTH GUVVALA	DYNAMIC CONTROL OF FRAUD INFORMATION SPREADING IN MOBILE SOCIAL NETWORKS
54	21701F0054	JOSHNA MUDDALURU	MACHINE LEARNING -BASED PROTOTYPING OF GRAPHICAL USER INTERFACES FOR MOBILE APPS
55	21701F0055	JYOTHISH VARMA JINKA	PRIVACY PRESERVING MEDIA SHARING WITH SCALABLE ACCESS CONTROL AND SECURE DEDUPLICATION IN MOBILE CLOUD COMPUTING
56	21701F0056	KARTHIK S	PARKING MANAGEMENT SYSTEM
57	21701F0057	KAVERI GEETHALA	A MACHINE LEARNING TECHNIQUE TO DETECT THE SIGNATURE BASED MALWARE
58	21701F0058	KEERTHANA SINGAREDDIGARI	MACHINE LEARNING BASED EARLY FIRE DETECTION SYSTEM
59	21701F0059	LAKSHMI DEVI MAMILLA	COVERT CHANNEL DETECTION: MACHINE LEARNING APPROACHES
60	21701F0060	LAKSHMI NARAYANA REDDY VALLURU	TRAFFIC RULES VIOLATION DETECTION USING DEEP LEARNING
61	21701F0061	LAKSHMINATH AVULA	A CLOUD SECURE STORAGE MECHANISM BASED ON DATA DISPERSION AND ENCRYPTION USING CLOUD COMPUTING
62	21701F0062	LAVANYA MALLU	CRIMINAL IDENTIFICATION USING MACHINE LEARNING AND FACE RECOGNITION TECHNIQUES
63	21701F0063	LAVANYA RAMIREDDY	INVESTIGATING THE EFFECT OF TRAFFIC SAMPLING ON MACHINE LEARNING-BASED NETWORK INTRUSION DETECTION APPROACHES
64	21701F0064	LOKESWAR REDDY KUDUMULA	WEB BASED GRAPHICAL PASSWORD AUTHENTICATION SYSTEM
65	21701F0065	MADHAVASRIRAM GURAJALA	TRANSLITERATE REGIONAL LANGUAGE TEXT INTO ENGLISH OR HINDI
66	21701F0066	MADHAVI CHINNA REDDY	IDENTIFICATION OF HATE SPEECH USING NATURAL

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

			LANGUAGE PROCESSING AND MACHINE LEARNING
67	21701F0067	MADHAVI GUNIPINENI	IMAGE CAPTION GENERATOR USING CNN & LSTM
68	21701F0068	MANASA LINGUTLA	CREDIT CARD SCORE PREDICTION USING MACHINE LEARNING
69	21701F0069	MANASA MULE	MINING USERS TRUST FROM E-COMMERCE REVIEWS BASED ON SENTIMENT SIMILARLY ANALYSIS
70	21701F0070	MANIKANTA RAJU UMMALARAJU	DEVELOPMENT AND EXAMINATION OF FOG COMPUTING-BASED ENCRYPTED CONTROL SYSTEM
71	21701F0071	MEHARUNNISA NANDARAPU	IDENTIFYING HEALTH INSURANCE CLAIM FRAUDS USING MIXTURE OF CLINICAL CONCEPTS
72	21701F0072	MOUNIKA CHALLA	ENHANCED DATA INTEGRITY ENCRYPTION ALGORITHM FOR CLOUD COMPUTING

## ABSTRACT

Cementitious composites have high compressive strength and modulus of elasticity but are relatively weaker in the case of tensile strength, toughness, and ductility. In order to compensate for that, additional reinforcing agents are used to hold the cement matrix in a much stronger way as compared to conventional Calcium Silicate Hydrate gel. Hence, with the advancement of research in the Nanocomposite field, a new material has emerged as a safe option i.e., Halloysite Nano Clay (HNC). Halloysites are natural eco-friendly nanotubes and are harmless to humans.

The higher aspect ratio and easy dispersibility in the polymer matrix and more importantly its abundant availability makes HNCs the next ideal material for nano cement paste. In this project, an effort is made to study the effect of Halloysite Nano Clay (0.25%, 0.5%, 0.75%, 1.0%) on the compressive strength of concrete in comparison with plain concrete.

This study aims to determine the optimum dosage of Halloysite Nanoclay material required to obtain higher compressive strength, Tensile Strength and Flexural Strength.

**Key Words:** Halloysite Nano Clay, Nano Materials, Concrete, Compressive Strength, Split Tensile Strength, Flexural Strength.

## CONCLUSION

The Halloysite Nano Clay (HNC) with different proportions of 0%, 0.25%, 0.5%, 0.75% and 1% are used in the conventional concrete to know the variability of mechanical properties of concrete, from the results we concluded as follows.

- The compressive Strength, Tensile and Flexural Strengths are increased with the increasing the dosage of Halloysite Nanoclay added to the concrete
- The compressive Strength is increased 29.1% greater values than normal concrete with the proportion of 1% of HNC with cement weight after 28 days of curing period.
- The Split Tensile Strength is increased 34.7% greater values than normal concrete with proportion of 1% of NC with cement weight after 28 days of curing period.
- The flexural Strength is increased 39% greater values than normal concrete with proportion of 1% of HNC with cement weight after 28 days of curing period.

## FUTURE SCOPE

It is necessary for cement concrete's performance in terms of compressive, tensile, and flexural strengths to improve. The strength of cement concrete is increased with the addition of Halloysite Nano Clay in the compressive, tensile, and flexural strength. To fully understand how these types of concrete behave when Halloysite Nano Clay particles are added, more research is required.

Further research was to be done on the cement concrete Halloysite Nano clay's compressive and splitting-tensile strength properties.

Overall, the future scope of halloysite nano clay in civil engineering works is vast and varied, with the potential to lead to more innovative, sustainable, and efficient building systems. Ongoing research and development in this area are expected to lead to the creation of new and exciting applications of HNTs in civil engineering.

## **CHAPTER-1**

### **ABSTRACT**

One cubic meter of normal concrete requires about  $0.90\text{m}^3$  of coarse aggregate and about  $0.45\text{m}^3$  of sand. In India about 900 million tons of sand is being used every year for various construction purpose due to so many reasons, the nature river sand which in the major source for sand has become scarce and costly. As the sand in the form of fine aggregate is essential for the concrete, there is a dire need to find/ use alternative sand / fine aggregate in place of sand to the extent possible to avert the problems of river sand. About 340 million tons of cement was produced in the year 2018-2019 worldwide and India is the second largest producer of cement in the world. Cement industry alone contribution about 7% of total greenhouse gases produced worldwide. In order to reduce the effect of these greenhouse gases on environment, There Is a need to reduce the production of OPC and use alternative binders in concrete/motor etc. There is also a need to use alternative material in place of sand as fine aggregate in concrete.

In the present project, it is proposed to use fly ash and calcium carbide waste as partial replacement to cement and crusher dust as complete replacement to sand in M30 concrete and find the mechanical properties viz compressive strength, split tensile strength and flexural strength at various ages.

**Study on the rheological and mechanical properties of M30 concrete using crusher dust as fine aggregate, fly-ash, calcium carbide residue (waste) and barites as partial replacement to cement**

---

**CONCLUSION**

Based on the results obtained from the present investigation the following conclusion were made;

1. The compressive strength of concrete with 10% cement, 65% fly-ash, 20% calcium carbide and 5% barites at 28 days and 60 days are 18.3 N/mm<sup>2</sup> and 24.80 N/mm<sup>2</sup>. When compared to the compressive strength of standard M30 concrete, these are 53.1% and 65.3% at 28 and 60 days.
2. The split tensile strength of concrete with 10% cement, 65% fly-ash, 20% calcium carbide and 5% barites at 28 days and 60 days are 1.83N/mm<sup>2</sup> and 2.37 N/mm<sup>2</sup>. When compared to the split tensile strength of standard M30 concrete, these are 62.46% and 69.7% at 28 and 60 days
3. The flexural strength of concrete with 10% cement, 65% fly-ash, 20% calcium carbide and 5% barites at 28 days and 60 days are 2.61 N/mm<sup>2</sup> and 3.40N/mm<sup>2</sup>. When compared to the flexural strength of standard M30 concrete, these are 63.0% and 70.8% at 28 and 60 days.
4. The compressive strength of concrete with 15% cement, 60% fly-ash, 20% calcium carbide and 5% barites at 28 days and 60 days are 20.10 N/mm<sup>2</sup> and 26.20 N/mm<sup>2</sup>. When compared to the compressive strength of standard M30 concrete, these are 58.4% and 68.9% at 28 and 60 days.
5. The split tensile strength of concrete with 15% cement, 60% fly-ash, 20% calcium carbide and 5% barites at 28 days and 60 days are 2.10 N/mm<sup>2</sup> and 2.70 N/mm<sup>2</sup>. When compared to the split tensile strength of standard M30 concrete, these are 62.46% and 69.7% at 28 and 60 days.
6. The flexural strength of concrete with 15% cement, 60% fly-ash, 20% calcium carbide and 5% barites at 28 days and 60 days are 2.95 N/mm<sup>2</sup> and 3.61N/mm<sup>2</sup>. When compared to the flexural strength of standard M30 concrete, these are 63.0% and 70.8% at 28 and 60 days.
7. Crusher dust can be used as alternate to river sand.
8. Cost of 1m<sup>3</sup> of conventional concrete is around 4000/- and Cost of 1m<sup>3</sup> of concrete that we prepared by using 10% cement, 15% cement, fly- ash , calcium carbide and barites is around 2500/-. It is about 60% of conventional concrete.

## Abstract

To design or analyse a structure, it is divided into two categories -by using manual method and software-based method. Due to advancement in technology, humans are creating software for designing of structures to make the process easier and save time. For analysis of RCC building of G + 8 Storey is used for bracing system to improve seismic resistance using bracing. Bracing system is easy to installed, economical and occupies less space. The structure is analysed for seismic zone II with and without bracing system with the using of Staad Pro software. Bracing system improve the displacement capacity of the structure. The load condition is applied as per IS 1893 :2002. Bracing system improve the displacement capacity of the structure. It is found that the X type of concrete bracing significantly contributes to the bracing system improves not only the stiffness and strength capacity but also the displacement capacity of the structure. Seismic analysis is performed on(G+8) using Equivalent static method the buildings are assumed to be located in Zone II.

**Keywords:** Shear force, Bending moment, Deflection, X type Bracing System, Seismic zone II and STAAD -PRO v 8i.

CHAPTER 6

CONCLUSION

S.NO.	DEFLECTION (MM)	SHEAR FORCE (KN)	BENDING MOMENT (KN-M)
WITHOUT BRACINGS	64.460	1421.066	104.089
WITH X TYPE BRACING	14.967	1224.945	110.112
WITH ANGLE BRACING	20.429	1270.566	113.372
WITH V TYPE BRACING	16.240	1224.531	124.877

- ❖ By comparing with and without bracing by the analysis we found less Deflection in the bracing system.
- ❖ By comparing with and without bracing by the analysis we found less Shear force in the bracing system.
- ❖ By comparing with and without bracing by the analysis we found increase Bending moment in the bracing system.
- ❖ By using bracing system we found that deflection, shear force less as compare to without bracing building.
- ❖ While designing if shear force are less the requirement of steel reinforcement will be less compare to without bracing system

## **ABSTRACT :**

Concrete is a composite substance made up of a binding agent, such as a cement-water mixture, and various fine and coarse aggregates. Concrete was discovered to be the most durable and effective binding material in all environmental circumstances. Regardless of the circumstances, concrete is expected to work satisfactorily for the duration of their service life with little maintenance. This composite substance is made up of different components. The composition of this adhesive substance determines its characteristics and uses.

Cement which is made up of natural resources are at depletion state. So as a move towards sustainable development, diatomaceous earth is chosen to replace in cement, from previous literature it is observed that 15% (DE) is proved to be optimum. Hence in this study, 15% (DE) is considered and to improve flexural strength. The polypropylene fibres are used around of 0.4%, 0.8%, 1.2%, and 1.6%. Then the mechanical properties - compressive strength, flexural strength, and split tensile strength are observed over which DE-15% and PPF-1.2% are proved to be optimum.

## CHAPTER 7

### CONCLUSION

#### 7.1 Conclusion:

- The compressive Strength of Concrete by the replacement of 15% Diatomite powder in cement gives 0.17% strength more than the plain cement concrete.
- The Compressive Strength of Concrete with replacement of PPF is increases 3.27% at 0.4, 4.37% at 0.8, 5.39% at 1.2 proportions for 14 days and 2.29% at 0.4, 3.2% at 0.8, 4.52% at 1.2 proportions for 28 days of curing than normal PCC M<sub>35</sub> grade Concrete.
- The split tensile Strength of Concrete with replacement of DE is increases 0.17% at 28 days of curing for 15% mix Proportion than normal PCC M<sub>35</sub> grade Concrete.
- The split tensile Strength of Concrete with replacement of PPF is increases 0.32% at 0.4, 0.55% at 0.8, 0.73% at 1.2 proportions for 28 days of curing than normal PCC M<sub>35</sub> grade Concrete
- The flexural Strength of Concrete with replacement of DE is increases 0.12% at 28 days of curing for 15% mix Proportion than normal PCC M<sub>35</sub> grade Concrete.
- The flexural Strength of Concrete with replacement of PPF is increases 0.06% at 0.4, 0.14% at 0.8, 0.46% at 1.2 proportions for 28 days of curing than normal PCC M<sub>35</sub> grade Concrete.
- Both polypropylene fibres and diatomite powder are low cost materials while these materials are using in concrete we can get the good results and also reduces the consumption of cement and avoid the Environmental pollutions.

## ABSTRACT

Concrete is a major construction material in construction, the vast usage of ingredients of concrete will leads to depleting natural resources. Based on the density concrete it is classified into three groups natural weight, light weight and heavy weight concrete. In specific locations this light weight concrete is used and normally it is prepared either by using lightweight aggregate or by using an air entraining agent. It is used in non-structural members its load carrying capacity is low. Vermiculite is clay substance which is highly porous. In thermal treatment the bulk density of crude vermiculite decreases from 640-1200 kg/m<sup>3</sup> to 60-160 kg/m<sup>3</sup>. Vermiculite is a clay mineral similar to montmorillonite in structure. Vermiculite is very porous, easily absorbs water, it's a neutral clay with a pH of 7.0-7.5, is a hydrous phyllosilicate mineral which under goes significant expansion when heated. In this paper an attempt is made to gather all the studies made on light weight vermiculite concrete in the recent years and put together at one place.

**Keywords** - Cement, Fine aggregate, Coarse aggregate, Vermiculite

CONCLUSION

6.1. CONCLUSION

From the experimental investigation of concrete using vermiculite as partial replacement of the fine aggregate the following conclusions are here.

- Based on the results it has been concluded that the strength of the concrete using vermiculite as fine aggregate is increased and will affect positively on compressive, split tensile and flexural strengths.
- The compressive, split tensile and flexural strengths are increased with the increase in the dosage of percentage of vermiculite.
- At 10% of vermiculite attain the maximum compressive strength of 28.74mpa.
- The compressive strength is increased to 9.6% greater than the normal concrete with an optimum dosage of 10% of vermiculite with fine aggregate after 28 days of curing period.
- At 10% of vermiculite attain the maximum split tensile strength of 2.63mpa.
- The split tensile strength is increased to 6.3% greater than the normal concrete with an optimum dosage of 10% of vermiculite with fine aggregate after 28 days of curing period.
- At 10% of vermiculite attain the maximum flexural strength of 3.17mpa.
- The flexural strength is increased to 21.4% grater then the normal concrete with an optimum dosage of 10% of vermiculite with fine aggregate after 28 days of curing period.
- The numerical relationship between the compressive strength ( $F_{cu28}$ ) and the split tensile strength ( $F_t28$ ) at 28 days of using vermiculite in the concrete obeys the relationship represented in the polynomial equation  
$$F_{cu28} = -6.2579F_t28^2 + 33.781F_t28 - 17.471$$
 with  $R^2$  value of 0.99.
- The numerical relationship between the compressive strength ( $F_{cu28}$ ) and the flexural strength ( $F_f28$ ) at 28 days of using vermiculite in the concrete obeys the relationship represented in the polynomial equation

# AN EXPERIMENTAL INVESTIGATION OF CONCRETE USING VERMICULITE AS PARTIAL REPLACEMENT OF FINE AGGREGATE

---

$F_{cu28} = -3.4626F_f^2 + 24.427F_f - 14.047$  with  $R^2$  value of 0.99.

- So, we can conclude that the vermiculite can be used as the fine aggregate to attain the better strengths and can be useful for the construction of buildings at the optimum dosage of 10% with fine aggregate.

## 6.2. SCOPE FOR FUTURE

- Vermiculite is a natural and sustainable material, which makes it an attractive option for eco-friendly building projects.
- The lightweight properties of vermiculite make it ideal for use in large infrastructure projects, such as bridges and highways.
- Vermiculite has excellent insulating properties, which make it ideal for use in buildings and other structures that require high levels of thermal insulation.
- Vermiculite is highly fire-resistant, which makes it an attractive option for use in structures where fire safety is a top priority, such as hospitals, schools, and public buildings.

*Three level T type quasi z source PV grid tied inverter with active power filter functionality under research focus*

---

## CONCLUSION

This work assesses the performance of the three-level T-type quasi-impedance source inverter (3L-T-type q-ZSI) injecting not only active power to the grid. It is by injecting reactive power and acting as an active power filter (APF) simultaneously. The combination of an improved deadbeat current controller and a level-shifted carrier-based pulse-width-modulation (PWM) technique, using both the upper shoot-through (UST) and the lower shoot-through (LST) alternating states. The simulation and experimental results demonstrate the above-mentioned functionalities and verify the stability and good dynamic response of the grid-connected 3L-T-type q-ZSI.

Design & Development of Hybrid Renewable to Hydrogen production System: A Machine Learning approach

---

## CONCLUSION:

In this project, generation of hydrogen from biomass with renewable energy sources (Hybrid Energy). Analysis are carryout with different case studies, in this first case study is a combination of Solar – grid connected system (practical system). The second case study is a combination of Solar – Biomass – without grid connected system. The third case study is of a combination of Solar – Biomass – with grid connected system. These case studies are been carried out in HOMER Pro software. Design and implementation are done with relevant schematic diagrams to obtain the cost effectiveness and efficiency prediction of the system.

The power generated from renewable energy sources will induces fluctuations in current and voltage. These fluctuations are mitigated by using a novel DC to DC converter, it is connected intermediately between hybrid energy sources and electrolyzer. This proposed converter regulates constant voltage and current leads to increase the efficiency and life-span of the electrolyzer. The effectiveness of DC-to-DC converter is verified through MATLAB Simulink platform. The Machine learning approach is going further to analyze the efficiency and cost computing of the system for the next succeeding years. We collect data from HOMER output, in that we chose the required parameters and give it as input data to the machine learning algorithm.

## CHAPTER-7

### CONCLUSION AND FUTURE WORK

#### 7.1 CONCLUSION:

This thesis has presented PSO method and a IA method for multiple DG allocation for loss reduction and voltage profile improvement in distribution systems while serving a main objective of distributed generation. The PSO technique is a two-stage methodology used in this thesis for optimal location and sizing of multiple DG units respectively. The IA method is based on IA expressions which are used to find out the optimal location and optimal size of four types of DGs. Among four types of DG in this paper a DG injecting Active power is only considered.

The results clearly show that, loss reduction and voltage profile improvement is possible with both PSO and IA methods, but when compared to PSO method, IA method gives more accurate results and higher percentage of loss reduction. PSO method has shorter computational time when compared to IA, but for same number of DG units installed the IA method gives more percentage of loss reduction with a smaller DG size when compared to a DG size given by PSO method.

#### 7.2 FUTURE SCOPE

The Incremental Analysis method can be applied to other three types DG units with varying load and power factor. This algorithm can also be implemented for multiple DG placement problem with unbalanced loads. This method is also useful for the combination of DG and FACTS devices. This algorithm can also apply to the other power system optimization problems.

*Dynamic behaviour and stability analysis of automatic voltage regulator with parameter uncertainty*

---

## 8.1 Conclusions:

- This study introduced Simulink Design Optimization, a new optimization approach, for determining the ideal PID coefficients ( $K_i$ ,  $K_p$ , and  $K_d$ ) for the AVR loop (SDO). We used the acquired SDO-PID coefficients to assess the AVR loop's resilience to terminal perturbations.
- There is a significant association between the time-domain performances of the SDO-PID, WCA, GA, and LUS PID controllers. The findings show that the SDO-PID has outstanding time-domain performance, particularly in terms of Rise-time and Overshoot.
- Field-voltage disturbances and parameter uncertainty in the amplifier model ( $K_{Amp}$ ,  $T_{Amp}$ ) were utilized to test the resistance of the proposed and other enhanced controllers. An upper constraint of 102% of the nominal parameters for the amplifier model was set when it was discovered that the SDO-PID was more resilient in the face of parameter uncertainty. Analysis of how SDO's GM and PM stack up to other regulators.
- Lastly, the MATLAB results demonstrate that the SDO-PID enhances the stability of the AVR loop in addition to being trustworthy and effective in regulating the terminal voltage.

## *PMSG wind energy conversions systems with z-source inverter*

---

### CONCLUSIONS

This project is mainly focused on the power quality improvement of Wind Energy Conversion System (WECS) with Permanent Magnet Synchronous Generator (PMSG) and Z-Source Inverters (ZSI). The PMSG-based WECS with Z-Source Inverter and maximum constant boost control with Third harmonic injection method is proposed. The Z-Source Inverter is used for maximum power point tracking control. In addition to that, maximum power is delivered to grid system. Compared to conventional method, proposed method voltage profile is improved with reference to the table 5.1.

Further Permanent Magnet Synchronous Generator and Quasi Z Source Inverter are implemented based on Wind Energy Conversion System. The Hysteresis Current Controller method and Fuzzy Logic Controller (FLC) is controlled by PMSG and Quasi Z-Source Inverter. Particularly, in these proposed methods, generate more voltage as well as current with reference to the table 5.2. Additionally, the proposed Hysteresis Current Control based Fuzzy Logic Controller (FLC) has more advantages, such as more flexibility, Quick control and static performances.

This project is mainly focused to improve the power quality by using WECS with Trans Z-Source Inverter controlled by Fuzzy Logic Controller technology. The PMSG-based WECS using Trans Z-Source Inverter is stabilized the AC bus voltage by proposed control technique. Particularly, no additional circuits are present. Compared to conventional methods, in this proposed FLC has more advantages, such as flexibility, easy to manage and control. The simulation results are verified, the proposed FLC based Trans-ZSI is reduced the harmonics level to 0.07% with reference to the table 5.3. Compared to conventional methods it is maintaining the pure sinusoidal bus voltage in the grid system.

## **ABSTRACT**

The demand for new and better materials are highly needed in various engineering applications such as aircraft engineering, aerospace engineering, automotive sector, naval engineering etc. In view of this demand, the present work is focused on the latest trending composite materials. The composite materials are highly substitute for a conventional material due to their high strength to weight ratio and better stiffness. The objective of present work is fabrication of polymer-based hybrid composites and its characterization. The epoxy is taken as a matrix material and the reinforce materials are cattail fibers and sugar cane fibers.

The fabrication of hybrid composite material for the present work is done by using hand lay-up method. The mechanical characterization is performed for tensile strength, flexural strength, impact strength. The obtained results are tabulated and the graphs are plotted. The results are discussed based on the obtained results.

## 6. CONCLUSIONS & SCOPE OF FUTURE WORK

The following are the conclusions and scope of the future work observed from the results of the Sugarcane and Cattail fibre reinforced polymer laminates which are successfully fabricated by simple hand lay-up technique. The experimentation has carried out for finding its tensile strength, flexural strength and impact strength.

### 6.1 Conclusions

- ❖ The tensile test is performed and the stress bearing capacity of specimen 1 used, combination of both cattail & sugar cane of 5% each (means cattail 5% and sugarcane 5%) and specimen 2 increasing to 7.5% (means cattail 7.5% and sugarcane 7.5%) and specimen 3 increasing to 10% (means cattail 10% and sugar cane 10%). This composite under tension has been increased from 35.65MPa to 49.99Mpa.
- ❖ The flexural test is performed and the flexural stress bearing capacity of specimen 1 used, combination of both cattail & sugar cane of 5% each (means cattail 5% and sugarcane 5%) and specimen 2 increasing to 7.5% (means cattail 7.5% and sugarcane 7.5%) and specimen 3 increasing to 10% (means cattail 10% and sugarcane 10%). By the test, the results of flexural strength I s increase from 33.85Mpa to 137.77Mpa.
- ❖ The Impact test is performed and the Impact stress bearing capacity of specimen 1 used, combination of both cattail & sugar cane of 5% each (means cattail 5% and sugarcane 5%) and specimen 2 increasing to 7.5% (means cattail 7.5% and sugarcane 7.5%) and specimen 3 increasing to 10% (means cattail 10% and sugarcane 10%). By the test, the results of Impact test the strength is increase from 24.8 to 25.

### 6.2 SCOPE OF FUTURE WORK

There is a wide scope of composite material in automotive, aerospace, wind energy, electrical, sports, domestic purpose, civil construction, medical chemical industries etc.

- ❖ The present work can be extended to investigate the other mechanical properties such as hardness, compressive strength, wear properties, etc.
- ❖ The work can extend to investigate the mechanical properties by adding particles of nanocomposites also.
- ❖ The thermal and hygro properties also can be investigated with the present work.

## **ABSTRACT**

The project proposes a new strategy to replace humans in various agricultural operations like spraying of pesticides, spraying of fertilizers, etc. there by providing safety to the farmers. The developed system involves designing a prototype which uses simple cost effective equipment's which is an aid to the farmers in various crop field activities.

## CONCLUSIONS

In conclusion, the development of a wireless communication-based sprinkler irrigation system offers a promising solution to address challenges associated with conventional irrigation systems. The proposed system offers several benefits, including improved crop yield and quality, reduced water usage, reduced environmental impact, increased accessibility of irrigation technology, improved productivity and efficiency in agriculture, potential economic benefits, improved environmental sustainability, and the potential for sustainable agriculture, environmental conservation, and economic development. These benefits demonstrate the potential for the proposed system to offer an efficient, cost-effective, and sustainable solution for irrigation that can benefit farmers, communities, and the environment. The implementation of this system could lead to improved agricultural practices, reduced environmental impact, and economic growth and development. Overall, the proposed wireless communication-based sprinkler irrigation system has the potential to be a transformative solution that contributes to sustainable agriculture and environmental conservation.

## ABSTRACT

In recent years, with the increasing awareness towards environmental degradation due to the production, use, and discharge of Chloro Fluoro Carbons (CFCs) and Hydro Chloro fluoro carbons (HCFCs) as heat carrier fluids in conventional refrigeration systems have become a subject of great concern and resulted in the concept of thermoelectric (TE) energy that makes it unique because of reversible energy conversion. We design thermoelectric using the Peltier module. Thermoelectric systems are based on the scientific phenomenon called the Peltier Effect. According to this phenomenon, a temperature gradient is set up when an electric current is passed through the junctions of two conductors. Due to this effect heat is deposited in one junction and cooling occurs in the other junction. A thermoelectric device is capable of either cooling or heating the system based upon the polarity of the DC power applied. Thermoelectric energy has a vast range of applications in various fields like; electricity generation, refrigeration, air conditioning, particular heating/cooling, biomedical devices due to its simple construction and mechanisms, compactness, require DC supply to run the device.

## CONCLUSION

In this project the convection heat transfer is very low even if installed a fan for effective heat transfer. The cooling effect produced near the module is high but when it's comes to the middle portion of the chamber is low. The heat transfer from the surface of the module should be done firstly through conduction, then through convection, to produce a noticeable temperature difference in the center area as well as the overall area, convection by the air must increase and also the size of the module and speed of the fan must in big increased.

Here calculated the actual and theoretical C.O.P and also the refrigeration effect of the device at different load conditions and clearly notices the characteristics behaviour, the device is producing the moderated cooling at moderate load conditions and at smaller load the cooling effect is low whereas C.O.P is good, and at full load (maximum load) the cooling effect produced is good and C.O.P is low.

## **ABSTRACT**

Nowadays, gas leakage is a major issue in the home and as well as industries. The sense of the gas is very low means we can't find it because of human negligence or lack of patience or some other external condition. If the gas level is increased, it causes some disaster. 1, to avoid this disaster in advance, the alternative idea is discussed in this paper. The system is developed with embedded sensors, controllers, and some IoT-based software. In this system, we are monitoring the detection of LPG gas leakages with some alerting features. Some sensors are used to monitor the different parameters like Temperature and humidity sensors (DHT22), gas sensors (MQ6), flame sensors (LM 2903), PIR sensors (HC-SR 501), and WiFi module (ESP8266). The sensors all are collect their information in their respective field and send data to the Wi-Fi module and it will perform.

## CHAPTER-10

### CONCLUSION

We want to learn a great deal about the technical elements of digital electronics systems and the internet of things by working on this project. Our industrial monitoring system's primary goal is accomplished through the digital integration of highly precise sensors and micro-controllers. We have included sensors to monitor environmental factors, and when an undesirable state is reached, the observed data is sent to the head centre. The data is allocated and processed using the Arduino UNO, and then the processed data is transmitted over the internet to the online apps. For data collection, we have thus added MQ6 gas sensors, flame sensors, PIR sensors, temperature sensors, and Arduino for device-to-device communication and command proposal. For data collecting, we also used a ThingSpeak website that was accessible online. The main innovation of our concept is its relevance for preventing undesirable dangers and activities while management is not present, and we believe that if implemented, it will effectively assist industry in reducing these accident rates. The demand for digital and automation systems to perform tasks, particularly in the information technology and algorithmic sectors, has increased exponentially in recent years due to industrial modernization, and the incorporation of IoT into their operational frameworks creates opportunities for growth and workable innovation.

# AN AUTOMATIC DETECTION OF RETINAL LESIONS FOR SCREENING OF DIABETIC RETINOPATHY

## ABSTRACT

An automatic telemedicine method for software screening and rating of diabetic retinopathy based on the identification of retinal lesions in retina pictures. This work defines and establishes a novel approach for automatic detection of each microaneurysm and haemorrhage in fundus images pictures. Whatever has contributed the most is a new set of form options known as "Dynamic form options," which don't require precise segmentation of the region to be classed. These choices allow one to distinguish between lesions and vessel segments and show how the morphology changed during image flooding. Six databases, four of which are publicly available, can be used to test the validity of the technique per lesion and per image. When taking into account pertinent variables in image resolution, quality, and acquisition technique, it exhibits its strength. According to information from the Retinopathy Online Challenge, the approach receives a FROC score of 0.420, placing it fourth overall. Using the Messidor data, the intended technique reaches a section below the fabled monster curve of zero.899, loves the score of human advisors, and surpasses progressive approaches when detecting images with diabetic retinopathy.

## CHAPTER-6

### CONCLUSION & FUTURE SCOPE

A novel red lesion detection method based on a new set of shape features, the DSFs, was presented and evaluated on six different databases. The results demonstrate the strong performance of the proposed method in detecting both MAs and HEs in fundus images of different resolution and quality and from different acquisition systems. The method outperforms many state-of-the-art approaches at both per-lesion and per-image levels. DSFs have proven to be robust features, highly capable of discriminating between lesions and vessel segments.

The concept of DSFs could be exploited in other applications, particularly when the objects to be detected do not show clear boundaries and are difficult to segment precisely. Further work focusing on bright lesion and neo vessel detection will complete the proposed system and allow automatic DR grading. By adding image processing techniques such as illumination correction, denoising, equalization, and color normalization, it is possible to improve the accuracy and reliability of the screening process. By automating the detection of retinal lesions using machine learning algorithms, it is also possible to reduce the workload of healthcare professionals and increase the efficiency of the screening process.

Our Project focuses on the development of an automatic telemedicine system for computer-aided screening and grading of DR. Since computer analysis cannot replace the clinician, the system aims at identifying fundus images with suspected lesions and at sorting them by severity. Then, the annotated images are sent to a human expert for review, starting with the suspected most severe cases. Such an automatic system can help to reduce the specialist's burden and examination time, with the additional advantages of objectivity and reproducibility. Moreover, it can help to rapidly identify the most severe cases and to focus clinical resources on the cases that need more urgent and specific attention.

## ABSTRACT

In the automatic diagnosis of numerous ophthalmic and cardiovascular illnesses, segmentation of retinal blood vessels plays a significant role. Medical analysis and the detection of associated disorders depend on the ability to segment thin and thick retinal vessels. The fundus image of the eye exhibits variable vascular thickness, the latter of which is not segregated by the majority of the previously suggested algorithms. This technique aims to distinguish thick and thin vessels in order to produce two images individually, which can then be combined to provide the final segmentation result.

The process includes a number of steps. In addition to applying filters for input retinal image smoothing, primary processing entails many stages. The first one uses an updated top-hat, homomorphic filter to segment large vessels, while the other one presents an optimal top-hat, homomorphic filtering, gray level conversion, matching filter, and segmentation using multilevel algorithm to segment narrow vessels. Morphological image operations are lastly performed. With this suggestion, a minimal number of false positives are obtained. This technique effectively divides the vessels and raises the performance standards. Implementation part was done in MATLAB R2022b. DRIVE datasets were used to evaluate the suggested method.

## CONCLUSION

The segmentation approach for both thin and thick artery detection serves as the fundamental basis for a unique methodology that improves the identification of endoscopic picture of the retinal arterial system of human eye. The recommended technique demonstrates high-specificity performance for having to learn or conditioning operations that demand outstanding performance without the necessity for a segmentation approach. The key component of the proposed framework is the parameter adjustment of the homomorphic and optimised top-hat filtering stages, which is dependent on the segmentation outcome, in this instance thin and thick vessels. To improve segmentation accuracy and specificity, one must have this functionality. One of the major weaknesses of the idea is the low sensitivity value obtained in contrast to the levels provided in the condition.

Finally, by separating the region of interest, it is anticipated to use this technology as a post stage in a reliable system in both healthy and diseased ocular fundi for illness diagnosis. This technique was thought about when this concept was being developed. A high categorization specificity value or even a small false positive value is required for achieving this.

## ABSTRACT

A type of semiconductor memory is synchronous dynamic random access memory. It can operate as quickly as traditional DRAM. SDRAM is becoming more and more common, and it can run just as swiftly as conventional DRAM. A typical form of conventional memory is DRAM. It operates in an asynchronous fashion. They can only answer to one request at a time, and they react to modifications when the control inputs change. SDRAM performs more efficiently. It is synchronised with the bus because of the processor's clock. DDR3 SDRAM can operate on the external bus at the same speed as DDR2. DDR3 memory is more complicated than DDR2 memory. The memory cells are switched on in such a way that they can communicate with an external bus. DDR3 transfers data at eight times the clock speed by doing so on the rising and falling clock edges, even though the bus is clocked at a rate that is four times that of DDR. This increase in clock speed is made possible by interface improvements like pre-fetch buffers and off-chip drivers. DDR3 on FPGA implementation needs to be considered in this project. The programme used to simulate this design is Xilinx ISE design suite.

**Keywords:** DDR3, SDRAM (Double Data Rate Synchronous Dynamic Random Access Memory), UART (Universal Asynchronous Receiver and Transmitter), AL (Additional Latency), FPGA (Field Programmable Gate Array).

## CHAPTER-7

### CONCLUSION

For real-time systems, using a memory controller is advised. The memory controller was designed with Ethernet in mind and is compatible with all systems. It is able to operate at high speed because to the 8n prefetch design. To attain great performance, it requires 4 bits per one clock cycle, which decreases power consumption, delays, and enhances speed. It makes process speeds possible.

## **ABSTRACT:**

DTNP systems are a newly developed model and have an interesting characteristic namely, the cooperative spiking of Neurons in a local region. We sought to evaluate whether this characteristic could be combined with the NSCT to develop a novel fusion method for multi-modality medical images. Advantages of the DTNP systems could greatly improve the fusion performance of the NSCT-based methods for multi-modality medical images.

The fusion methods for the low-frequency NSCT coefficients use an Improved Innovative Sum- Modified Laplacian (INSML) feature to extract the complementary data from multi-modality images. Additionally, the high-frequency NSCT coefficients are extracted using the WLE-INSML features, and these coefficients are then used to create the fusion rules. An open dataset utilised to evaluate the recommended fusion strategy consists of twelve pairs of multi-modality medical image pairs. It is also compared to nine previously published fusion methods as well as four deep learning-based fusion approaches. The qualitative and quantitative trial outcomes demonstrate the benefits of the suggested fusion process in terms of visual quality and fusion performance.

## CONCLUSION

DTNP systems are Turing-universal distributed parallel computing models. This paper investigated a DTNP system-based fusion architecture with respect to multi-modality medical images in the NSCT field. The fusion framework that was proposed combined the features from the exciting methodologies. The multi-modality medical images are expressed using INSML and WLE features combined. The primary energy and some of the minor details of the low-frequency NSCT coefficients, which are necessary to construct a fusion rule, are expressed. In order to extract specific information from medical images, such as edges and contours, the INSML feature is employed with high-frequency NSCT coefficients. The proposed systems recognize this feature as an external input. The IN-SML features can produce more energy due to the neurons' cooperative spiking mechanism. The cooperative spiking mechanism of the neurons enables the IN-SML characteristics to more successfully generate neural spiking in this system.

For the combining of multiple medical imaging modalities, the NSCT+INSML+WLE+DTNP and are combined in the suggested fusion architecture. This framework's drawback is this. The complementary information of other picture formats, such as multi-focus images, may not be properly recovered by the INSML features because of the various imaging principles. The processing of other picture kinds, could not be possible with this combination, as well. DTNP systems might therefore have to add additional characteristics to the proposed combination. Work in the future will focus on fusing various image forms.

## **ABSTARCT**

Customers are becoming more concerned to the quality of service (QoS) offered by organizations in the present. However, the present day shows greater rivalry in offering the clients with technologically innovative QoS. However, an organization may benefit from effective customer relationship management systems in order to increase sales, maintain relationships with existing customers and improve customer retention. The customer retention strategies can benefit greatly by the use of machine learning models like Decision Tree, Naïve-Bayes Classification, Logistic Regression algorithms.

## CHAPTER I INTRODUCTION

## 8.CONCLUSION& FUTURE SCOPE

### CONCLUSION:

It is concluded that any organisation, whatever of its form, needs to be concerned about customer turnover. Customer retention is the process of preserving a customer's loyalty through comprehending their needs and meeting them appropriately. The organisational management will be helped by a strong churn prediction model to predict consumer churn.

Decision Tree, Naïve-Bayes Classification, Logistic Regression is useful for estimating the turnover rate depending on the complicated data of the telecommunication sector. The concept of client retention as well as the churn forecast were the main topics of the mentioned paper. Along with the technique, the usage of Decision Tree, Naïve Bayes Classification, Logistic Regression is to improve the churn prediction process has also been covered here.

### BIBLIOGRAPHY

### FUTURE SCOPE

This application may eventually include the capacity to recognise churn prediction. With the updated data set, we plan to examine the prediction strategy and use the most precise and pertinent machine learning algorithms for detection.

## ABSTRACT

*Personalized Precision medicine necessitates remote patient monitoring in the intensive care unit (ICU) as a crucial observation and assessment task. Recently, we created an intelligent cloud platform. We employ a modern risk-classification framework for remote patient monitoring (IRPM). Machine learning is used to provide the most accurate predictions, yet there are few qualities that don't depend on key indications. Several different physiological traits are used, both within and outside of hospitals. We significantly aided this endeavour. By creating three machine learning models for the fundamental IRPM architecture, measurements of anomalies, readmission, and vital signs the next day. Together with the development and verification of three replicable machine learning algorithms, we also provide a formally described version of a feature engineering technique.*

*We provided two solutions for data with unbalanced classes for the readmission model and applied five binary classification techniques to each approach. We used the same five algorithms to predict whether a patient will have abnormal health conditions in the abnormality model. Our findings show that by focusing on low and high quantile ranges of vital signs, we may still get an acceptable performance with these machine learning models. The readmission model's greatest accuracy was about 67.53%, with an area under the receiver operating characteristic (AUROC) of 0.7376. The abnormality model obtained the maximum accuracy of roughly 67.40%, with an AUROC of 0.7379. We discovered that using the most current vital sign values results in the lowest prediction error. Given the medical industry's large investment in patient monitoring devices, the developed models will be incorporated into an Intelligent ICU Patient Monitoring (IICUPM) module, which has the potential to facilitate the delivery of high-quality care by implementing cost-effective policies for dealing with the patients who use ICU resources the most.*

**KEYWORDS:** *Decision Tree, Random forest Classifier, SVM.*

## 9. CONCLUSION AND FUTURE SCOPE

Machine learning methods applied to clinical datasets provide huge promise for tailored drug delivery Human illness therapy that is aimed Adding to our foundation We propose three replicable risk indicators as part of our recent creation of an intelligent ICU patient monitoring (ICUPM) platform. ML models for stratification Our findings suggest that we can construct balanced predictive models for ICU patient readmission and anomaly with more precision by combining Combining ML and a quantiles technique that focused solely on important variables signs. To prevent incorrect findings and low precision in the We presented two data options for the readmission model. Having unequal classes: one that employs under-sampling approach, as well as one that use the clustering re-sampling method. We also provide three methods for identifying predictors of Vital sign measures taken the next day in relation to a baseline. We created regression models utilizing two distinct classifications. algorithms to each method In general, we discovered that the The error compensation strategy outperformed the average. The measured method fared the poorest. The outcome suggests that employing the most current vital sign measures achieves the least error, especially when accounting for prior blunders In addition to offering three clear This work adds a functionality to replicable ML models. developing an algorithm that may be used in a variety of critical care contexts.

There are quite a few things that can be polished or be added in the future work. • We have opted to use data mining classifiers in this project namely the Linear Discriminant Analysis and KNN. There are more classifiers such as the logistic Regression ,Random Forest Classifier, SVM. Such classifiers are compared with.

## **ABSTRACT**

Our project's primary goal is to identify signs of stress in IT professionals utilizing sophisticated machine learning and image processing methods. Our system is an improved version of the old stress detection systems, which excluded live detection and personal counselling. This system includes live detection and periodic analysis of employees, which detects employees' levels of physical and mental stress and then gives them the appropriate stress management techniques by sending out survey forms on a regular basis. Our method primarily focuses on stress management, creating a healthy and spontaneous work atmosphere for the employees, and getting the best performance out of them during working hours.

**KEYWORDS:** *Image processing, KNN classifier, Stress, Open CV, Supervised machine learning, Training dataset.*

CHAPTER 1  
INTRODUCTION

## 8.1 CONCLUSION

The secure Stress Detection System is made to detect stress in employees by keeping track of photographs taken by authorised users. When the authenticate user logs in based on some time interval, the image capture is done automatically. The user's stress is determined from the collected photos using certain common conversion and image processing techniques. The device will then assess the stress levels using machine learning techniques to produce more effective results.

## 8.2 Further Enhancement

IoT technology integrated with biomedical wearable sensors is a tried-and-true combination in the healthcare industry. Both patients and physicians have benefited from the use of such gadgets. A few of its benefits include early diagnosis of medical issues, quicker medical aid through remote monitoring and telecommunication, emergency alarm mechanisms to notify the carer and personal doctor, etc. By continuously tracking and giving regular feedback on stress levels, the suggested work on establishing a multi-modal IoT system ensures to be a better health helper for a person. It would be fascinating to expand on this research into the creation of a stress detection model in the future by integrating additional physiological parameters, such as an activity recognition system and application of machine learning techniques.

## Abstract

*License plate detection identifies the vehicle by using the license plate and image processing. The objective is to create and implement a system that is efficient at recognizing automobiles by their license plates, which act as a key to their identity. The system can be installed at parking lot entrances, toll booth entrances, or any other private area, such as a college, to keep track of vehicles arriving and exiting. It could be used to limit vehicle access to people who have permission to enter the premises. The developed system takes a photo of the front of the car, searches for the license plate, and then reads the plate. The vehicle's license plate is obtained by image processing. The employing of feature extraction and classification for modeling purposes. Regarding the software's implementation using computer vision numerous photographs are utilized to evaluate its accuracy. As per inferences, the proposed model correctly locates and classifies the vehicles numberplate. The idea of a character recognition-based platform for identifying intellectual vehicles that is meant to be used with advanced transportation systems. The suggested solution makes use of Intelligent Parking Service, a sophisticated parking management system required to manage both public and private spaces. Using approaches based on vision, the SPANS system decides whether or not the parking lot is open. The proposed system uses the SPANS framework to capture images of the parking lots and identify the license plates of vehicles that are both driving through and parked there.*

**Keywords:** *Vehicles License plate images, OpenCV, Tesseract OCR, License Plate Recognition*

## 9. CONCLUSION AND FUTURE SCOPE

Although there are very few training examples, this article attempts to recognise licence plates on moving cars. The investigation's initial findings are promising. Tesseract and opensource computer vision are used to find registration numbers on moving automobiles and identify trends in registration numbers. Our suggested approach has the advantage of being accurate in locating and detecting plates.

The testing, however, revealed that the boundaries of the image's items were not precisely specified. With a vehicle's licence plate, we may determine whether it is driving too fast, has been in an accident, or ignores traffic signals. The automatic vehicle recognition system is crucial in identifying defence-related hazards. Also, it can increase women's security because they can more quickly identify licence plates when using cabs or other services.

## ABSTRACT

*This project involves building an attendance system which utilizes facial recognition to mark the presence, time-in, and time-out of employees. It covers areas such as facial detection, alignment, and recognition, along with the development of a web application to cater to various use cases of the system such as registration of new employees, addition of photos to the training dataset, viewing attendance reports, etc. This project intends to serve as an efficient substitute for traditional manual attendance systems. It can be used in corporate offices, schools, and organizations where security is essential. The purpose of this document is to specify software requirements of the Attendance Management System Using Face Recognition. It is intended to be a complete specification of what functionality the Attendance Management System provides. Furthermore, this project aims to automate the traditional attendance system where the attendance is marked manually. It also enables an organization to maintain its records like in-time, out time, break time and attendance digitally. Digitalization of the system would also help in better visualization of the data using graphs to display the no. of employees present today, total work hours of each employee and their break time. Its added features serve as an efficient upgrade and replacement over the traditional attendance system.*

**Keywords:**

*Face detection, face recognition, image Processing, local binary pattern*

---

## **Conclusion**

The Face Recognition based Automated Attendance System is simple, accurate and works efficiently. This system works automatically once the registration of individual student is created by the administration. There is a need to utilize few algorithms that can perceive the appearances in order to improve the system performance and recognition accuracy.

## ABSTRACT

Machine Learning-based systems act on flow features derived through exporting flow procedures. The notable emergence of Machine Learning and Deep Learning (DL) based reports presuppose that the flow of information, such as the average packet capacity, is gleaned from every packet. On common devices, However, when packet sampling is unavoidable, flow exporters are frequently used in practice. Since flow of information is derived from a sampled group of the packets rather than the entire traffic stream, the usefulness of Machine Learning-based results with the use and existence of such samplings is still up for debate. In this study, we are going to investigate in what ways the effectiveness and performance of these ML -based are affected by packet sampling. Our suggested evaluation method is resistant to various flow export stage settings, in contrast to earlier studies. Hence, it can provide a robust evaluation of even in the presence of sampling. Experimental results show that systematic linear sampler – DECISION TREE, RANDOM FOREST methods are used for predicting the intrusion systems.

**Keywords: Supervised Learning, Anomaly Detection, Intrusion Detection, Random Forest, Neural Network, Decision Tree, Support Vector Machine, ML techniques, e-learning, Principal Component Analysis.**

## CHAPTER 8

### CONCLUSION

We suggested a methodology for evaluating ML-based algorithms properly. From our best well known recollections, we are exhibiting as the first to suggest Flow Level NIDS evaluation paradigm which can be used even when sampling is present. Using the suggested evaluation approach, we showed how resolving the training-data imbalance resulted in a surprising performance boost. Even with a gentle 1/10 sample rate, sampling trials reveal that 50% of harmful flows are not exported. Our analysis of the viability of Machine Learning based techniques in the existence of sample shows that in general, such Sampling will decrease the performance of NIDS. Apart from this we found that this sampling method can improve its performance when sources like the measuring device's flow cache are available. We solely concentrated on usage detection based to keep the complexity modest. Future research should also look for the effects Sampling on NIDS which is based on anomalies. Another drawback of current research and study is that the size of the sample is relatively very small. The number of cache sizes we could test in our flow cache tests was similarly restricted to four. As a result, larger research with various dimensions may be conducted in the future. Investigating the impact of sampling using high sampling rates is one approach. The inclusion of a thorough list of sample strategies and ML/DL approaches is another direction. Additionally, doing these tests on numerous, diverse datasets results in more convincing justifications for the impact of Sampling at the throughput.

## ABSTRACT

A lot of knowledge is available to internet users on the web because to the development of web technology, which is also growing. A lot of information is also produced as a result. Online education, idea exchange, and opinion sharing have all found a home on the internet. Social networking services like Twitter, Facebook, and Google+ are quickly gaining popularity as a result of the ability for users to send messages globally or share and express their opinions on a variety of issues. In the area of sentiment analysis of twitter data, a lot of work has been done. This study primarily focuses on sentiment analysis of Twitter data, which is important to explore the information within tweets where opinions are very unstructured, varied, and either positive or negative, or sometimes neutral. In this project, we provide evaluation measures as well as comparative studies of existing methods for opinion mining, including lexicon-based methods and machine learning techniques. We provide research on Twitter data streams utilizing different machine learning methods, such as Naive Bayes, NLP-stemming, lemmatization, word tokenization, and Support Vector Machine.

---

---

## CONCLUSION AND FUTURE ENHANCEMENT

### 9.1 CONCLUSION:

With the help of machine learning techniques like the Random Forest method, this approach was suggested as a reliable way to detect agricultural production. As compared to the outcomes produced by the reinforcement learning algorithm, the suggested model is proved to produce efficient and effective results by the examination of the experimental findings. Comparing the suggested approach to the reinforcement learning model, it can forecast crop yield with an exceptional level of accuracy.

### 9.2 FUTURE WORK:

In the future, we can also take into account data that is derived from datasets that are published on reliable websites and contains details about the weather, soil, and other environmental variables. Future modifications to the model could potentially take into account the decision trees' maximum depth. Because the type of dataset has an impact on analysis, using more cleaned and preprocessed data may result in excellent outcomes

## ABSTRACT

Online transactions are growing increasingly vulnerable to frauds and threats, which results in data leakage and personal details exposed to fraudsters, causing massive loss to customers. This is due to digital tactics coping up with online marketing systems, large data provided to these sectors. This forces online marketing systems to adapt to advanced data security and handling technology solutions like machine learning, deep learning, and predictive analytics that are effective enough to handle highly sensitive data, predict frauds, and identify undesirable behavioral patterns in this data. The most effective and informative approach to apply in this field is suggested after reviewing the many advanced technologies usually used to handle this sort of data.

**Keywords:** Supervised learning, fraud detection, and machine learning are some relevant.

CHAPTER 1

INTRODUCTION

## 8. CONCLUSION AND FUTURE ENHANCEMENTS

### CONCLUSION:

We have successfully developed unsupervised ML models in this application to determine whether a transaction is fraudulent or not. We found that Random Forest, KNN, and Extreme Gradient Boosting perform the best, with good accuracy, precision, and recall scores.

### FUTURE SCOPE:

By using strategies for treating data that is imbalanced, this system can be expanded to increase the precision and recall ratings of our machine learning models.

## 1.1 INTRODUCTION

A Mutual fund is a trust that pools the savings of a number of investors who share a common financial goal. The money thus collected is invested by the fund manager in different type of securities depending up on the objective of the scheme. These could range from debentures to money market instruments. The income earned through these investments and the capital appreciations released by the scheme are shared by its unit holders in proportion to the number of units owned by them (pro rata). Thus, a mutual fund is the most suitable investment for the common man as it offers an opportunity to invest in a diversified, professionally managed portfolio at a relatively low cost anybody with an investable surplus of a little as a few thousand rupees can invest in mutual funds. Each mutual fund scheme has a defined investment objective and strategy.

Mutual funds now represent perhaps most appropriate investment opportunity for most investors. As financial markets become more sophisticated and complex, investors need a financial intermediary who provides the required knowledge and professional expertise on successful investing. As the investor always try to maximize the returns and minimize the risks.

The basic purpose of the study is to give broad idea on mutual funds and analyze various schemes to highlight the diversified investment the mutual fund offers to its investors. Through this study one can understand how to invest In mutual funds and turn the raw investment in to ripen fruits by taken wise decisions, taking the risk factors in to account.

The study covers the basic meaning, concept, structure and the organization of the mutual fund. The study is restricted to explain only the returns provided by the mutual funds from various schemes.

In the year 1963, the first mutual fund in India introduced when the government of India launched UTI (unit trust of India). UTI launched the first mutual fund scheme in 1964. Until 1987 UTI enjoyed a monopoly in the Indian mutual fund market. Indian mutual fund industry had a quick growth as a result of development of infrastructure, rise in foreign participation and increase in personal financial asset. When compared to the other investment vehicles like FD's (Fixed deposit) and postal

### 5.3 CONCLUSION

Investors while investing in mutual fund have to verify documents related to investment, because risk play significance role while investing, returns are subject to market risk. Balanced funds more invest into equities because it is the only investment option provides greater rate of return in long-run, prospective investors are suggested to avoid speculation.

## INTRODUCTION

### 1.1 BACKGROUND OF THE STUDY

Brand awareness is related to the functions of brand identities in consumers' memory and can be reflected by how well the consumers can identify the brand under various conditions. Brand awareness includes brand recognition and brand recall performance. Brand recognition refers to the ability of the consumers to correctly differentiate the brand they previously have been exposed to. This does not necessarily require that the consumers identify the brand name. Instead, it often means that consumers can response to a certain brand after viewing its visual packaging images. Brand recall refers to the ability of the consumers to correctly generate and retrieve the brand in their memory. A brand name that is well known to the great majority of households is also called a household name.

### IMPORTANCE

"Awareness, attitudes, and usage (AAU) metrics relate closely to what has been called the Hierarchy of Effects, an assumption that customers progress through sequential stages from lack of awareness, through initial purchase of a product, to brand loyalty." In total, these AAU metrics allow companies to track trends in customer knowledge and attitudes. Although the hierarchy of effects is considered as a one-way linear relationship, these three stages are not "clear-cut". The causal link might be reversed. The usage could cause the awareness while the attitudes can also influence the awareness. For example, one owned a Dell wireless mouse and had excellent using experience. Such experience might determine the one's favorite brand attitude toward Dell.

### 5.3 CONCLUSION

Nandi pipes Private Limited, Nandyal service is provide as a stand out among all existing services satisfactory services in certain aspects such as quality and value added services Most of the respondents are aware of brand. It is found that good advertising pattern are followed by Nandi pipes services and the customers are satisfactory when compare to competitors After analysing all these factors it is intended to suggest that sum of the development factors like increasing frequency rate advertisement and better availability facilities.

## INTRODUCTION

A Mutual Fund is a trust that pools the savings of a number of investors who share a common financial goal. The money thus collected is invested by the fund manager in different types of securities depending upon the objective of the scheme. These could range from shares to debentures to money market instruments. The income earned through these investments and the capital appreciation realized by the scheme is shared by its unit holders in proportion to the number of units owned by them (pro rata). Thus a Mutual Fund is the most suitable investment for the common man as it offers an opportunity to invest in a diversified, professionally managed portfolio at a relatively low cost. Anybody with an investible surplus of as little as a few thousand rupees can invest in Mutual Funds. Each Mutual Fund scheme has a defined investment objective and strategy.

A mutual fund

is just the connecting bridge or a financial intermediary that allows a group of investors to pool their money together with a predetermined investment objective. The mutual fund will have a fund manager who is responsible for investing the gathered money into specific securities (stocks or bonds). When you invest in a mutual fund, you are buying units or portions of the mutual fund and thus on investing becomes a shareholder or unit holder of the fund.

Mutual funds are considered as one of the best available investments as compare to others they are very cost efficient and also easy to invest in, thus by pooling money together in a mutual fund, investors can purchase stocks or bonds with much lower trading costs than if they tried to do it on their own. But the biggest advantage to mutual funds is diversification, by minimizing risk & maximizing returns.

There are a lot of investment avenues available today in the financial market for an investor with an investable surplus .He can invest in bank deposits, corporate debentures, and bonds where there is low risk but low return. He may invest in mutual of companies where the risk is high and the returns are also proportionately high.

## **CONCLUSION**

- In today's world of investments a common investor cannot create his own portfolio and manage its risk.
- Investor needs a portfolio manager who invest the fund in selected securities among the different industries,
- So that to minimize the risk (systematic risk and unsystematic risk) and maximizing the return.
- These portfolio management services are provided by the mutual fund companies and also we can invest small funds in the funds.
- The mutual funds are best investment avenue for the common investors.
- It is concluded that mutual funds are subject to market risk. So know about the scheme before investing in that scheme.
- The analysis and inter presentations of the project helps the individual to minimize the risk and getting maximum returns by comparing different company.
- The investor by opting the portfolio analysis of different mutual funds to earn more returns when compared to other.
- Therefore it is important to analyze the different decisions of risk and return while investing.
- Overall the performance evaluation of the selected funds it is observed that during the period of study no fund is enabling the reward for the risk taken due to the market fluctuations.

## INTRODUCTION

Every enterprise needs inventory for smooth running of its activities it serves as a link between production and distribution process. There is generally, a time lag between there cognition of need and its fulfillment. The greater the time lag, the higher requirement for inventory. It also provides a cushion for future price fluctuations.

In a complex industry like NTPC it studied clearly of how the thing are being performed and what is the real impact of these on industry and how effectively is utilized is interested to be known by researcher because of its great significance in the research.

Inventory can be referred to as sum of the value of raw materials fuels and lubricants, spare parts, maintenance consumables, semi processed materials and finished goods, stock at any given point of time. In large companies' inventory place a most significant part of the current assets. The business has about 15 to 30% of inventories in total assets. Inventory is composed of assets that will be sold in future in the normal course of business operations. The assets which firms stores as inventory is anticipation of need are raw materials, work in progress and finished goods.

“The term inventory refers to assets, which will be sold in future in the normal course of business operations. The assets which the firm stores as inventory in anticipation of need are raw materials, work in progress/process, and finished goods.

” Inventory management consists of maintaining for a given financial investment an adequate of something in order to meet and accepted pattern of demand.

Inventory considers control over costs of inventory on one hand and handle the size of inventory on other hand.

According to Mark Twain “Inventory management is primarily about specifying the size within a facility or within multiple locations of a supply network to protect the regular and planned course of production against the random disturbance of running out of materials or goods”.

### Terms Used in Inventory Management Frequently

- **Business strategy**  
The set of strategic decisions that affect a whole business
- **Capacity**  
The maximum throughput of a process in a given time

---

## CONCLUSION

The main purpose of this study the study helps a log to various departments to take steps to control the inventory process. The materials are equivalent to cash and they make up an important part of the total cost. It is essential that materials should need to be properly safeguarded and correctly accounted. Need of study is, To Proper control of material can make a substantial contribution to the efficiency of a business. The need of study is the success of a business which largely depends upon efficient purchasing, storage, consumption and accounting.

The overall study the study is

- Over all the inventory management and profitability of NTPC is satisfactory.
- The production of power during 2017-18 was 7,47,436 and 7,77,092 respectively which is higher as compared to 2016-17 which is 6,87,373 Nd 7,27,447 respectively.
- Investments on raw material are 93610.78 lakhs which very high as compared to 2017-14 which is only 460870.45 lakhs.
- The inventory turnover ratio shows that the stock has been converted into sales is only 1.32 times.

**CHAPTER - 1****1.1 INTRODUCTION**

In our present economy, finance is defined as the provision of money at the time when it is required. Every enterprise, whether big, medium or small, needs finance to carry its operations and to achieve its targets. In fact, finance is so indispensable today that it is rightly said to be the lifeblood of an enterprise. Without adequate finance, no enterprise can possibly accomplish its objectives.

Financial management is applicable to every type of organization, irrespective of its size or kind of nature. It is as useful to a small concern as to a big unit. A trading concern gets the same utility from its application as a manufacturing unit may expect. This subject is important and useful for all types of ownership organizations. Where there is a use of finance, financial management is helpful. Every management aims to utilize its funds in a best possible and profitable way. So this subject is acquiring a universal applicability.

It is indispensable in any organization as helps in:

- i. Financial planning and successful promotion of an enterprise;
- ii. Acquisition of funds as and when required at the minimum possible cost.
- iii. Proper use and allocation of funds.
- iv. Taking sound financial decisions
- v. Improving the profitability through financial controls.
- vi. Increasing the wealth of investors and the nation, and
- vii. Promoting and mobilizing individual and corporate savings

### 5.3 CONCLUSION

The profitability is decreasing from year to year. The company should take steps to increase sales and resultantly the profit. Capricorn food production profitability position was deteriorated year by year, liquidity position also moderate long term solvency of the firm is also moderate due to high debts the firm's efficiency in utilizing assets is also very low.

## Abstract

Online House Construction Supporting System is a web application in which we can get online help of architects, builders, distributors and vaasthu experts for the construction of our new houses or buildings. In this application we will get the list of contractors, architects available in the specific location. This is a web based application where we can get several designs for the construction of a house. The main objective of this project is to provide essential solutions to those inspire building teams to design and construct. We can see the house designs with the help of search module, in this module we can search with the cost or with the design plans (e.g. two bedrooms house designs) details. This web application also contains the module called rent houses which can provides the opportunity to see the details of rent houses in the specified location and user can upload rent houses details which are known to them.

## CONCLUSION

The proposed system can provides number of plans and designs and also includes the suggestions from the experts. We can see the house designs with the help of search module, in this module we can search with the cost or with the design plans (e.g. two bedrooms house designs) details. In the previous system if citizen wants to buy new house he directly meet the architects to develop a plan related to his constraints and contact the builders and material distributors individually so that they have a plan according to the constraints.. As it is a time consuming process and may involve unavailability of personnel, I am proposing a common interface for the architects, contractors, customers, builders and distributors who are involved in the construction of a house. This web application also contains the module called rent houses which can provides the opportunity to see the details of rent houses in the specified location and user can upload rent houses details which are known to them.

## ABSTRACT

Over the last decade, social media has acquired a lot of traction, both positively and negatively. In this fast growth of social networking, People can communicate with one other via platforms and websites. Directly with no cultural or economic barriers While There have been several advantages to using social media, yet there are none. Less negative societal effects One such issue that has arisen is Hate speech has been more prevalent in recent years. Hateful speeches essentially the use of rude and abusive words. Using social media. It might relate to anybody or something specific. A collection of people who have common interests. It introduced our approach to dealing with hate speech and, to a considerable part, decreasing it. People express their hatred and rage on social media right instantly, which hurts the sentiments of others. It would have an extremely detrimental influence on their caste, creed, religion, and race. Some statements may not be intended to offend anyone, yet nonetheless are considered hate speech owing to the filthy language used. To eradicate hate speech, we dug deep into natural language processing and employed several machine learning models to choose which one to deploy based on accuracy.

## CONCLUSION

Hate speech is very harmful and hence needs to be dealt with very seriously for its elimination. It does not only lead to real life conflicts but also affects the mental health of a person. Some people cannot take the hate speech and it affects them quite badly. In this paper, we have stated our way to detect any type of hate speech. It can briefly explain the various features of Natural Language Processing that were used. It can implement various machine learning classifiers and selected the one with the maximum accuracy. One of the use case for the future work in this system could be the detection of long phrases or sentences. Another use case can be the detection of a person's behaviour from its past posts and comments and hence limiting the spread of hate speech

## ABSTRACT

Today's IaaS clouds allow dynamic scaling of VMs allocated to a user, according to real-time demand of the user. There are two types of scaling: horizontal scaling (scale-out) by allocating more VM instances to the user, and vertical scaling (scale-up) by boosting resources of VMs owned by the user. It has been a daunting issue how to efficiently allocate the resources on physical servers to meet the scaling demand of users on the go, which achieves the best server utilization and user utility. An accompanying critical challenge is how to effectively charge the incremental resources, such that the economic benefits of both the cloud provider and cloud users are guaranteed. There has been online auction design dealing with dynamic VM provisioning, where the resource bids are not related to each other, failing to handle VM scaling where later bids may rely on earlier bids of the same user. As the first in the literature, this paper designs an efficient, truthful online auction for resource provisioning and pricing in the practical cases of dynamic VM scaling, where: (i) users bid for customized VMs to use in future durations, and can bid again in the following time to increase resources, indicating both scale-up and scale-out options; (ii) the cloud provider packs the demanded VMs on heterogeneous servers for energy cost minimization on the go. We carefully design resource prices maintained for each type of resource on each server to achieve threshold-based online allocation and charging, as well as a novel competitive analysis technique based on submodularity of the offline objective, to show a good competitive ratio is achieved. The efficacy of the online auction is validated through solid theoretical analysis and trace-driven simulations.

## **Conclusion:**

The Java-based project "Dynamic VM Scaling Provisioning and Pricing through an Online Auction" offers a robust solution for managing virtual machine (VM) allocation in response to varying resource demands in cloud environments. It employs an online auction mechanism to optimize pricing and provisioning, fostering cost-efficiency and scalability.

Key achievements include dynamic VM scaling, ensuring resource allocation aligns with workload for cost savings. The auction mechanism introduces competitive bidding for fair VM allocation based on user-offered prices. The project's modular and extensible architecture enables integration with existing cloud services, leveraging Java's platform independence.

Efficient resource allocation minimizes over-provisioning and under-provisioning, reducing costs for cloud providers and enhancing application performance. Robust security features protect sensitive user data and prevent unauthorized VM access.

In summary, this project effectively addresses cloud resource allocation and pricing challenges, offering a valuable tool for cloud service providers and application developers, optimizing resource usage, reducing costs, and enhancing scalability.

## ABSTRACT

The project "Hospital Management System with Chatbot" is a comprehensive solution designed to enhance the efficiency and effectiveness of hospital operations. This system integrates a chatbot feature to facilitate seamless communication between patients, doctors, and hospital staff. The primary objective is to streamline the management of patient appointments, medical records, and other administrative tasks while ensuring timely and personalized patient care.

The Chatbot component acts as a virtual assistant, enabling patients to schedule appointments, receive medical advice, and access relevant information. It employs natural language processing techniques to understand user queries and provide appropriate responses, thereby reducing the burden on human staff and enabling round-the-clock availability of assistance.

By integrating a Chatbot with the hospital management system, this project aims to improve patient satisfaction, reduce administrative overhead, and enhance the overall quality of healthcare services. The solution promotes seamless communication, empowers healthcare professionals, and streamlines hospital operations, ultimately leading to improved patient outcomes.

## **CONCLUSION**

The hospital management system chatbot's primary goal is to automate repetitive tasks in a user-friendly way so that hospital staff can concentrate on important tasks. It also enables quick response for customers instead of making them wait for staff to answer their questions because users can interact with the bot at any time. Our chatbot's speech recognition feature makes it easier and quicker for customers to communicate. The user-interactive UI makes it easier to navigate the website. Experimented with different types of profiles to test our application. The outcomes were pleasing.

## ABSTRACT

This paper is about a technology that provides quick placement management system in college unlike the traditional system where students as well as TPO may face many problems like insufficient details, less security, problems with manual working etc. The purpose of the Placement Management System website is to overcome the disadvantages of traditional placement systems. It enables the end users to register online through their CMSys (College Management System) account, which is a website of college created for attendance, term test marks, etc., read and apply for the company of their choice and get frequent updates regarding the placements from college TPO. There is no chance of missing the placement opportunity updates. The college placement officers will not have to get separately collect information of every student. It will automatically be updated when the student registers. The project is a website which can be easily accessed through mobile on the go.

## **Conclusion: -**

In the existing system most of the work will be done manually, as it takes more time for any changes in the system. The major problem with this existing system is notification method available is not available for giving information about student expect the notice board or circulars. The proposed system is online training and placement management system gives the automation in all the process of campus recruitment, searching student details individually. This system in future could be joined to SMS server so that it can notify the message to students via SMS for upcoming companies.

**ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES :: RAJAMPET  
(AUTONOMOUS)**

**Department of Mechanical Engineering  
Academic Project Work - B.Tech**

**Following is the list of project batches with titles for the academic year (2021-2022) during Fourth year.**

**Section: A**

**Batch: 2018-2022**

Batch	H.T.No	Name of the student	Guide Name	Title of the project
A 1	18701A0347	PRATHYUSHA IMMARAJU	S. M SALEEMUDDIN	Investigation of corrosion behaviour of Mg-Sn alloy by stir casting for bio medical applications
	18701A0316	HARISH REDDY CHAPPIDI		
	18701A0323	KARTHIK GUNIPATI		
	18701A0321	JAYA MALLIKARJUNA REDDY THARIGOPULA		
A2	18701A0305	BALAKRISHNA SURIMISSETTY	C. THIRUPATHAIAH	Optimization of Process Parameters of Aluminum Metal Matrix
	18701A0308	CHAITHANYA SURYA KUMAR CHANDRAGIRI		
	18701A0315	HARI KATTIRAGANDLA		
	18701A0312	FAREED HUSSAIN SYED		
A 3	18701A0324	KAVITHA DHANI	N. KISHORE KUMAR	Mechanical behaviour of al 7075 by reinforcing the Tio2& BN
	18701A0310	DHANUNJAYA REDDY KANDULA		
	18701A0327	LOKANATH REDDY ANNEM		
	18701A0320	JASWANTH NAIDU POTTHURU		
A 4	18701A0303	ARUN KUMAR REDDY CHIYYETI	S .NAGENDRA	Performance test on four stroke diesel engine using biodiesel produced from waste plastic oil
	18701A0333	MANIKANTA SINGAVARAM		
	18701A0314	GOVARDHAN MALAKAPURAM		
	18701A0325	KRISHNA VARDHAN REDDY CHALLA		
	16709A0302	GANDLAPARTHI BAVESH TARUN REDDY		
A 5	18701A0302	ACHYUTH SAI KUMAR VISWABRAHMANA	M. LOKANATH	investigation of mechanical properties of Mg-Ca composites
	18709A0301	CHADRASEKHAR KAMBAIAHGARI		
	18701A0304	ASHOK REDDY BOBBITI		
	18701A0334	MANJUNATHA REDDY UPPALAPATI		
A 6	18701A0326	LEVANYA KUMAR PANDIGUNTA	Dr. N. SIVA RAMI REDDY	Corrosion Resistance on PEO coating of MgCa composition
	18701A0337	MUKESH BOYA		
	18701A0328	MADHU CHAPALA		
	19700A0301	KARAKAMUKKALA SAI BARA GANESH		
A 7	18701A0301	ABDUL MUKEETH SHAIK	T.MANI MOHAN	Reverse gear in two wheeler for handicapped
	18701A0336	MOHAMMAD ALI SHAIK		
	18701A0329	MADHU SUDHAN G		
	18701A0331	MAHAMMAD SAMIULLAH SHAIK		
A 8	18701A0318	JABEER BASHA SHAIK	Dr B. VENKATESH	Optimization of effectiveness and thermal resistance of counter flow double pipe heat exchanger by using gray relational analysis and neural network model
	18701A0335	MANOHAR REDDY P		
	18701A0309	CHARAN KUMAR REDDY BOBBALA		
	18701A0322	JAYA RAMI REDDY KAVALAKUNTLA		
A 9	18701A0317	HEMASUNDHAR MANDLI	N Deepthi	Optimization of process parameters in wire edm for stainless steel -304 by using grey relational analysis
	18701A0319	JAIPALREDDY ALAMKONDA		
	18701A0313	GIRIKUMAR REDDY NERUSUPALLI		
	18701A0306	BHANU CHAITHANYA REDDY MUMMADI

**Following is the list of project batches with titles for the academic year (2021-2022) during Fourth year.**

**Section: B**

**Batch: 2018-2022**

Batch	H.T.No	Name of the student	Guide Name	Title of the project
B1	18701A0339	NARENDRA BABU PEDDATHIMMAYYA GARI	Mr G. AMARNATH	Effect of Heat treatment on mechanical properties of magnesium metal matrix composites
	18701A0350	RAMESH BABU CHANNIPOGULA		
	18701A0357	SANTHOSH KUMAR REDDY NALLAMASULA		
B2	18701A0361	SIVA KUMAR POLINA	Dr.A. HEMANTHA KUMAR	Design and Fabrication of Pneumatic sheet metal cutting machine
	18701A0358	SASIDHAR VARMA CHAMARTHI		
	18701A0344	PAVANKUMARACHARI RAVURU		
	18701A0362	SREEKANTH N		
	18701A0348	PRUDHVI KUMAR REDDY NALAPAREDDY		
B3	18701A0373	VENKATESH SOOLAM	Mr P. RAVINDRANATHA REDDY	Wear behaviour of Aluminium Hybrid MMCs(AL7075/TiO2/WC)
	18701A0359	SHAKEER HUSSAIN MULLA		
	18701A0368	THARUN KUMAR REDDY GUDIPATI		
	18701A0351	RAVI ATLURU		
B4	18701A0372	VENKATA VISHNUVARDHAN REDDY AVULA	Ms K. NAGAMANI	Development of the hybrid composites of Al7075 by reinforcing the TiO2 and WC
	18701A0353	RITHWIK KUMAR REDDY VUNDELA		
	18701A0375	VINODKUMAR REDDY SANEPALLI		
	18701A0355	SAI KUMAR DASARI		
B5	18701A0363	SREEKAR REDDY ABBASANI	Mr K.AJAYA KUMAR REDDY	Corrosion studies of Duplex Coating on Magnesium alloy for orthopedic applications
	18701A0364	SRINIVASA KALYAN ANKULAGARI		
	18701A0370	VENKATA KRISHNA REDDY GANGI REDDY		
	18701A0349	RAJESH KUMAR REDDY VENNAPUSA		
	18701A0354	SAI DEEKSHITH REDDY CHAMALA		
B6	18701A0377	YASHWANTH PATHIPATI	Dr KRISHNA MOHAN RAJU	Study and Kinematic design of vCNC based multi purpose machine tool
	18701A0352	RAVITEJA REDDY MADDIREDDYGARI		
	18701A0369	VAMSIKUMAR REDDY KATHI		
	18701A0356	SAIVARUN GANNE		
B7	18701A0371	VENKATA SURESH PALETI	Mr N. NAGARAJU	Experimental investigation and optimization of CNC milling parameters on Al6063 through Taguchi method
	18701A0346	PRASANTH THALUPULA		
	18701A0360	SHARAN KRISHNA GUNIPINENI		
	18701A0342	NIKHIL YERRAGOLLA		
	18701A0341	NAVEEN KUMAR CHERI		
B8	18701A0365	SUDHAKAR REDDY RAGIPINDI	Mr N. JAYA KRISHNA	Investigation on mechanical properties of magnesium metal matrix composite with cryogenic treatment
	18701A0343	NIRANJAN KUMAR REDDY JEEREDDY		
	18701A0376	VISHNU VARDHAN REDDY YALLAREDDYGARI		
	18701A0340	NARENDRA REDDY MANAMASU		
B9	18701A0367	SURYA VAMSI THATI	Dr.PV. SANJEEVA KUMAR	fabrication and characterization of Hybrid polymer Composites Reinforced with Flax and palm fibers
	18701A0378	ZABIULLA SHAIK		
	18701A0374	VENUGOPAL KURUBA		
	17701A0351	GORLA SAI SREE HARSHA

Academic Project Work - B.Tech**

Following is the list of project titles for the academic project work(2021-2022) during Fourth year.

**Section: C**

**Batch: 2018-2022**

Batch	H.T.No	Name of the student	Guide Name	Title of the project
C1	19705A0314	KADAPALLI JITHENDRA	Mr B. SANTHOSH KUMAR	Mechanical characterization of Bi Directional woven Glass fibre reinforced Polymer composite
	19705A0340	S.SHANMUKHA PRASAD		
	19705A0337	M.SALAUDDIN		
	19705A0333	U. RAJENDRA		
C2	19705A0345	ERAGAMREDDY SUDHAKAR REDDY	Ms N.DEEPTHI	Design and fabrication of Highway Wind Turbine
	19705A0336	AKEPATI SAICHANDU REDDY		
	19705A0346	MADDELA UDAYKUMAR		
	19705A0330	KOTA PRASHANTH		
	19705A0343	CHEPPALI SRINIVASULU		
C3	19705A0302	BEENATHI ASHOK KUMAR	Mr D. VISHNU VARDHAN REDDY	An investigation on corrosion behaviour of Aluminium hybrid Metal Matrix composite
	19705A0303	VADDI BALA KRISHNA		
	19705A0353	DANDUBOINA VISHNU VARDHAN		
	19705A0315	SHAIK KALAAM BASHA		
C4	19705A0324	BHUMIREDDY KRISTAMMAGARI NANDA HARI P	Mr C. RAMANJANEYULU	Enhancing Heat Transfer Performance of a Heat Exchanger by coating silver Nano particles
	19705A0308	YARRAMREDDY HARI KESAVA REDDY		
	19705A0338	DUDDALA SANJEEVA REDDY		
	19705A0313	BHAVIRISETTY JAYAKRISHNA		
C5	19705A0326	NALLAGATLA NIRANJAN REDDY	Mr G.SURESH BABU	Experimental Investigation of mechanical properties of cryogenic treated Magnesium Metal matrix composites
	19705A0352	SINGAM VINAY KUMAR REDDY		
	19705A0348	DODDOJU VEERA NAGA CHAITHANYACHARI		
	19705A0335	MUDIMELA REDDY BABU		
C6	19705A0350	GAJULA VENKATA SURYA NARAYANA	Mr S. RAMESH BABU	Production and quality control on Iron Foundry
	19705A0312	SEETHAGARI JAYA KRISHNA		
	19705A0347	PAGIDALA UMA MAHESWAR REDDY		
	19705A0334	PULA RANI		
C7	19705A0307	PASALA GOVARDAN	Ms N GLORY UJWALA	Experimental Investigation and optimization of Drilling process parameters on Conventional Drilling machine for Aluminium alloy(5052) materials by using Fuzzy and Taguchi method
	19705A0309	PIDIGUNDLA HARI PRASAD YADAV		
	19705A0328	KALLURI NOOR		
	19705A0331	GADDA PRAVEEN KUMAR		
C8	19705A0310	P. HARINATH REDDY	Ms N KEERTHI	Machining of Brass & Analyzing the machining characteristics by Fuzzy and Taguchi
	19705A0318	U. LOKESWARA REDDY		
	19705A0317	D. KODANDA RAMI REDDY		
	19705A0319	B. MAHESH		
C9	19705A0322	SHAIK MOHAMMAD FAROOQ	Mr R.V.N.R. SURYA PRAKASH	Experimental Investigation and optimization of Graphite Material through Taguchi Method in CNC Drilling
	19705A0301	SHAIK ARSHAD		
	19705A0342	TENALI SRIDHAR		
	19705A0321	ANKIREDDY MAHESHWARA REDDY		
C10	19705A0351	MADAKA VIJAY KUMAR	MrESWAR BALACHANDAR	Fabrication of 360° wheel Rotation vehicle with Bluetooth sensing
	19705A0354	ADENA KATAMAIAHGARI YUGANDHAR REDDY		
	19705A0332	BUCHUPALLI PRAVEEN KUMAR REDDY		
	19705A0329	LAKKIREDDY PARTHA SARADHI REDDY		
C11	19705A0320	MASINENI MAHESH NAIDU	Mr M. MARUTHI PRASAD	Fabrication of solar powered Sand Sieve
	19705A0304	GUDURU CHARAN KUMAR		
	19705A0349	BANTROTHU VENKATA SIVA TEJA		
	19705A0306	POTHA DINESH		
C12	19705A0323	SHAIK MUNWAR BASHA	Dr. B VENKATESH	Effective parameter for over all heat transfer coefficient for counter flow- double pipe heat exchanger by using Hybrid Optimization
	19705A0311	KONDAMARRI HEMANTH REDDY		
	19705A0327	RAJOLI NIRANJAN REDDY		
	19705A0316	INDLAKISHOREKUMARREDDY		
C13	19705A0339	DEVIREDDY SARATH CHANDRA REDDY	Mr V. VENKATESH	Development of Manual Electro magnetic Braking system
	19705A0341	YEDUGURI SIVA MALLESWAR REDDY		
	19705A0344	GUJJALA SUBHASH KUMAR REDDY		
	19705A0325	YADAVA NAVEEN KUMAR

## ABSTRACT

This study represents the behavior of concrete, having partial replacement of cement with Dolomite and Barites powder. Use of dolomite powder and Barite powder in concrete can minimize the cost of concrete and may also increase the strength. M25 grade of concrete was used for which the Barites powder and Dolomite powder is replaced and an experimental study was carried out and the effect on compressive strength, split tensile strength, flexural strength was studied. The present investigation indicates the replacement of cement with barites and dolomite powder 8%, 10%, 12%, 14% should an increase in the compressive strength, flexural strength, split tensile strength in the early stages 7th day, 14th day, 28th day.

**Key words:** Compressive strength, Split tensile strength, Flexural strength, Dolomite powder, Barite powder.

## CHAPTER-7

### CONCLUSION

1. The global consumption of cement is getting higher due to its extensive use in concrete. This effect can be reduced by cement replaced with some supplementary materials like Dolomite Powder, Barite Powder.
2. It is concluded that the global consumption of cement in construction is reduced.
3. The workability of concrete is increased.
4. The desired minimum strength in the hardened stage is achieved.
5. The effect of barites powder and dolomite powder on the mechanical properties of concrete is clearly found.
6. The Mechanical properties like compressive, Flexural, Split tensile strength of the concrete is increased.
7. By doing this investigation we would be concluded that the compressive strength of the concrete will be increased at 10 % and decreased at 12% when compared to the conventional concrete.
8. The split tensile strength will be increased at 10 % and decreased at 12% when compared to the conventional concrete.
9. The flexural strength will be increased at 10 % and decreased at 12 % and again increased at 14% when compared to the conventional concrete.

## ABSTRACT

In this study the effects of aluminium oxide on the properties of concrete were investigated. The aluminium oxide dosages were varied from 0% to 15% with the increments of 5% by the weight of cement. Aluminium oxide the capability to provide an increase in strength of concrete. The concrete specimens were tested for 7days, 14days, 28days. Concrete specimens exhibited variation in their compressive strength, split tensile strength and flexure strength based on their curing period. At 10% of aluminium oxide the strength is optimum for compression, split tensile and flexure strength. By increasing the percentage of aluminium oxide the strength decreases depends on curing period.

Key words: Compressive Strength, Flexure Strength, Split Tensile Strength, Aluminium Oxide

## CHAPTER 5

### CONCLUSION

The following are the conclusions drawn from this work:

- 1) The experimental result showed that there was an increment of about 38.81%, 19.35% and 22.34% at 7, 14, 28 days of compressive strength in comparison with the control mix and could be due to the filler effect of the material used.
- 2) There was an improvement observed in tensile strength with an incremental rate of 27.89%, 26.05% and 15.92% at 7, 14, 28 days when compared with trial mix.
- 3) The flexural strength of the concrete was improved by a rate of 29.62%, 26.24% and 41.04% at 7, 14, 28 days with reference to control mix.

However, it was observed that there was an early age strength improvement in the specimens mixed with  $Al_2O_3$ . Further studies are required to assess the behaviour of  $Al_2O_3$  in concrete in term of micro-structural properties.

## **ABSTRACT:**

Concrete is made of cement, aggregate, water and some additives. In the past researchers ordinary Portland cement [OPC] was used but now-a-days using of OPC is reduced because of high energy consumptions and harmful emissions of carbon dioxide. As a new class of new cement binders geopolymer are used as alternative to OPC. Geopolymer Concrete [GPC] is known as a new type of concrete with enhance ductility characteristics over conventional concrete. In this experimental study, fly ash is used with granulated ground blast furnace slag [GGBFS] to enhance the strength properties of concrete. The specimen was subjected to compressive, split tensile and flexure test. The past researchers were said that there is an increase in the strength of using GPC.

**KEY WORDS:** OPC, Fly Ash, Ground Granulated Blast Furnace Slag, GPC.

## CHAPTER-5

### CONCLUSION

The study is used to analysis the strength of the Geopolymer concrete with the different mix proportions of Fly ash and GGBFS. The study reveals that the geopolymer concrete is the perfect replacement of the conventional concrete. The values obtained in the study shows that Geopolymer concrete releases very less CO<sub>2</sub> emissions when compared with conventional concrete. The experimental results show the following conclusions

- The Compressive strength, split tensile and Flexural test results showed the optimum values of strength compared with OPC concrete.
- With the increasing of curing period the values of the strengths were increased.
- In the Compression test results at the 28 days of curing period shows optimum value.
- In the Split tensile test results showed that at the optimum results obtained for the mix of 25% Fly ash and 75% GGBFS at the age of 28 days.
- In the Flexural test the maximum values are obtained at 28 days of curing period.

Compare to the conventional concrete the Geopolymer concrete results shows the optimum values and the strength results are increasing gradually when the age of curing increases. The Mix-4 (25% Fly ash and 75% GGBFS) shows optimum values for all the test results.

## **ABSTRACT**

In this study the effects of aluminium oxide on the properties of concrete were investigated. The aluminium oxide dosages were varied from 0% to 15% with the increments of 5% by the weight of cement. Aluminium oxide the capability to provide an increase in strength of concrete. The concrete specimens were tested for 7days, 14days, 28days. Concrete specimens exhibited variation in their compressive strength, split tensile strength and flexure strength based on their curing period. At 10% of aluminium oxide the strength is optimum for compression, split tensile and flexure strength. By increasing the percentage of aluminium oxide the strength decreases depends on curing period.

**Key words:** Compressive Strength, Flexure Strength, Split Tensile Strength, Aluminium Oxide

## CHAPTER 5

### CONCLUSION

The following are the conclusions drawn from this work:

- 1) The experimental result showed that there was an increment of about 38.81%, 19.35% and 22.34% at 7, 14, 28 days of compressive strength in comparison with the control mix and could be due to the filler effect of the material used.
- 2) There was an improvement observed in tensile strength with an incremental rate of 27.89%, 26.05% and 15.92% at 7, 14, 28 days when compared with trial mix.
- 3) The flexural strength of the concrete was improved by a rate of 29.62%, 26.24% and 41.04% at 7, 14, 28 days with reference to control mix.

However, it was observed that there was an early age strength improvement in the specimens mixed with  $Al_2O_3$ . Further studies are required to assess the behaviour of  $Al_2O_3$  in concrete in term of micro-structural properties.

## ABSTRACT

Cement is the main constituent of Concrete as binding and the only component which is scientifically controlled. Now a days, different types of cements are increasingly used in the market asserting the enhanced strength and durability and increase in service life of structure. Laboratory tests like Compressive strength, Wet and Dry, Acid resistance, were conducted to access the robustness of mortar. Graphene is an allotrope of carbon consisting of a single layer of atoms arranged in a two-dimensional honeycomb lattice nanostructure. The use of graphene concrete additives can increase strength, reduce clinker factor in cements (reducing carbon footprint) and potentially increase longevity of products. The technology has the potential to deliver stronger, less permeable concrete structures enabling a new generation of concrete designs. Present research work aims to enhance GO reactivity by increasing its exfoliation and its count by mechanical milling and to exploit it as a low-cost dispersed phase having different sheet thicknesses and sheet sizes for strength enhancement of cementitious matrix by regulating crystal patterns and microstructural features.

**KEY WORDS:** Graphene Oxide, Cement Mortar, Compressive strength, Cementitious matrix.

## CHAPTER 8

### CONCLUSION

The level of increase in compressive strength and the reduction in porosity were strongly correlated. The addition of GO reduced the influence of ITZ on the compressive strength. By considering the micro features of ITZ, the accuracy of prediction at macro level would be significantly improved for cementitious materials.

Basic on the experimental work, it can be concluded that;

Graphene oxide is easy to process; it is dispersible in water and other solvent

1. For 0.06% replacement the compressive strength obtained after 28 days of curing at an increment rate. The increment of compressive strength could be due to development of hydration crystals. And decrease in strength at 0.08% could be due to agglomeration.
2. The Split tensile test of conventional Concrete is  $2.51\text{N/mm}^2$  up to 0.06% of replacement in graphene oxide there is increase in split tensile test, the test result shows for 28days. The increment is split tensile strength that 0.06% could be due to inter layer bonding between GO sheets.
3. Addition of Graphene Oxide enhance the strength of concrete. The 7 days, 14days, 28days of compressive strength and split tensile strength were maximum at 0.04% GO over and above this dosage both the strengths tends to decrease this could be due to the dispersion and agglomeration of GO flakes.

## GAS LEAKAGE WITH AUTO VENTILATION AND SMART MANAGEMENT USING IOT

### CONCLUSION

Arduino based gas spillage detection & smart management system has been proposed. The motivation of this proposal is to help people who are unconscious and to reduce the risk of fire death and reduce the damages of the infrastructure. The proposed system has the facility of gas detection and fire. If gas fire detected by the system then it will notify to the homeowner through SMS and also buzzer on. There are two important features are auto ventilation and water flow via solenoid valve in the proposed system. The proposed system is exceptionally valuable to forestall fire demise. In this manner, the harms are mainly caused due to the gas spillage and it can be limited by utilization of IOT based smart gas management system. Our system is providing its requirement but adding some more features we wish to make the assignment more convenient.

## IOT BASED WATER LEVEL MONITORING AND DAM GATE CONTROL

### CONCLUSION

The IOT enabled water overflow monitoring system is done using the Arduino and other components. By using these components to send altering message and dam gate controlled by using Blynk Web application. The system can be further developed with more sensors and can be extended. With the help of sensors and hardware components we can conserve the water in the sense control the unnecessary water wasting and saving the electricity also. By giving alert message to the user (mobile) about water level to conserve the energy. Moreover, this particular application useful for Home, Small scale industries. Finally, the project based simple components implemented which make efficient, cost wise this is cost effective. Hence this project gives the reliable solution to the users.

### FUTURE SCOPE

This project is useful for large dam systems to control the overflow of water. We can control the dam gates from any place of the world. Also we can measure polluted water using pH sensor. By this project each and every variation of water level is informed to web server through internet & nearby people can be informed in time. Thus, saving lots of lives avoiding unpleasant scenarios. It is possible to have real prototyping of this module in river by using float sensors which will monitor & control the water level & take necessary decisions according from any place.

## 6. CONCLUSIONS & FUTURE SCOPE

### Conclusions

A combination of AC/DC microgrid has been discussed and different approaches are suggested for the interlinking converter to retain stable functioning of the system under different load and source conditions. The use of interlinking converter design with an LC filter has been presented as a viable approach for integrating several energy sources into AC or DC hybrid grids. The suggested method offers an easy and adaptable solution for MG operation. With a PV system as the primary power source, the hybrid AC/DC micro grid may be reliable for some small isolated industrial units. Since the global variable is pushed to a common value at a steady state, the interlinking converter of each DG approaches equality, and the system operating cost may be reduced at the same time. To validate the efficacy of the suggested method, simulations for power-sharing in hybrid AC/DC MG are executed in the MATLAB Simulink platform.

### Future scope

The depletion of fossil fuels is resulting in the more use of renewable resources for the production of power. To produce more power, the integration of renewable sources in to hybrid grids is one of the best adaptable methods. For the integration of different renewable sources into hybrid grids the proposed interlinking converter architecture is a good solution. The proposed IC provides us the best results with the reduced leakage currents. The proposed advanced control architecture for IC can further be implemented by using HERIC seven-level arithmetic operation. It can also be further tested by developing algorithms using fuzzy neural networks.

## CONCLUSION

The creators give another two-stage system for deciding the best areas and sizes for responsive power pay in dissemination organizations. The ideal locations will be determined using a fuzzy technique, and the optimal sizes will be determined using the ALO method.

The overall real power loss of the system has been drastically decreased, and bus voltages have significantly improved, thanks to the installation of distributed generation units at all potential sites. Based on the S.I values, the suggested fuzzy technique may determine the best dispersed generating locations. The suggested ALO approach iteratively looks for the best unit sizes for the least amount of power loss.

Solar powered unmanned aerial vehicle with AOF under non-linear load conditions

## CHAPTER -VI CONCLUSION

This research proposes and investigates a new active output filter-based electric power generating system for solar-powered unmanned aerial vehicles (UAVs). The proposed power generation system

performance. These will reduce the transmission system's size and weight, as well as total harmonic distortion.

A Project Report On

**“INVESTIGATION ON MECHANICAL PROPERTIES OF Mg-Cu”**

## ABSTRACT

---

## CHAPTER-6

### Conclusions

1. A stir-casting process for producing  $Y_2O_3$  particle reinforced magnesium and magnesium alloy (Mg-Ca) matrix composites has been developed. The flawless registry of yttria particles with pure magnesium revealed the correct processing parameter selection. The reinforcement particles (yttria) not only improve the oxidation resistance of magnesium but also give the component a good aesthetic appearance.
2. Yttria particles were added to improve the hardness, Young's modulus, and yield strength of pure magnesium and magnesium alloys (Mg-Ca). Mechanical properties have improved due to precipitate hardening, grain refinement, and a lower cracking tendency.
3. Due to the solution hardening effect, heat-treated composites had higher hardness. Intermetallic components are responsible for the increased hardness of magnesium alloy (Mg-Ca) composites.

## ABSTRACT

The need of new and better materials is always had demand in the various fabrication applications such as engineering, industrial, medical, space, sports etc. The Composite materials are the latest and emerging materials in order to the fulfil this need. The polymer based composites are mainly used in low-cost application such as in food storage, household utensils, low-cost vehicles etc. *The present objective of the work is fabricating and characterization of the polymer based composites reinforced with flax and palm fibres.*

The epoxy resin is mainly used as the matrix material and hand layup method is used for fabricating the composite plates reinforced with flax and palm fibres. The composite plates are made separately with flax fibres and palm fibres and the combination of flax and palm fibres. The mechanical testing is done to investigate its tensile strength, flexural strength and hardness. The obtained results are validated and justified such as the composites reinforced with the combination of both flax and palm fibres given the best results compared with the individual.

## 6. CONCLUSIONS & SCOPE OF FUTURE WORK

The following are the conclusions and scope of the future work observed from the results of the polymer-based composites reinforced with flax and palm fibres which are successfully fabricated by simple hand lay-up technique.

### 6.1 Conclusions

- Experimental evaluation of mechanical properties like tensile strength, flexural strength and hardness of polymer based composites reinforced with flax and palm fibres as per ASTM standards has been successfully completed.
- The tensile properties have been studied and the breaking load has been measured. The inclusion of flax and palm fibres reinforced polymeric composite significantly enhanced the ultimate tensile strength, yield strength and peak load of the composite.
- The tensile test is performed and the stress bearing capacity of specimen 1 (10%palm fibre) composite compared to specimen 2 (10%flax fibre) composite under tension has been increased from 46.34 MPa to 57.71. If both flax fibre and palm fibre are combinedly used in specimen 3 (hybrid- 5%flax fibre and 5%palm fibre) and tested then its tensile strength is improved to 64.69 MPa.
- The flexural test is performed and the flexural stress bearing capacity of specimen 1 (10% palm fibre) and specimen 2 (10%flax fibre) reinforced composites have quite same value (i.e., 205.26 MPa and 204.62 MPa). If both flax fibre and palm fibre are combinedly used in specimen 3 (hybrid- 5% flax fibre and 5%palm fibre) and tested then its Maximum stress is improved to 289.95 MPa.
- The hardness test is performed and the BHN of 10%flax fibre reinforced composite is 9.5 and the 10%palm fibre reinforced composite is 16.18. If both flax fibre and palm fibre are combinedly used (hybrid- 5% flax fibre and 5%palm fibre) then its hardness has increased to 20.33.
- Finally it concluded that the mechanical properties of combined polymer composites reinforced with flax and palm fibres have better than the polymer composites reinforced with individual flax or palm fibers.

## 6.2 SCOPE OF FUTURE WORK

There is a wide scope of present work for further investigation as follows.

- The present work can be extended to investigate the other mechanical properties such as impact strength, compressive strength, abrasion, wear properties etc.
- It can also trail with different percentage of reinforcement mixtures.
- The present work can also extend to investigate for thermal and electrical properties.

## ABSTRACT

The objective of the project is to design a wind turbine to recapture wind energy from vehicles on the highway. Wind energy is considered the fastest growing clean energy source however; it is limited by variable natural wind. Highways can provide a considerable amount of wind to drive a turbine due to high vehicle traffic. This energy is unused. Extensive research on wind patterns is required to determine the average velocity of the wind created by oncoming vehicles. The wind turbines will be placed on the medians therefore fluid flow from both sides of the highway will be considered in the design. Using all of the collected data, existing streetlights on the medians can be fitted with these wind turbines. Additionally, since the wind source will fluctuate, a storage system for the power generated will be designed to distribute and maintain a constant source of power. Ideally, the turbine can be used globally as an unlimited power source for streetlights and other public amenities.

## ABSTRACT

*Nanotechnologies, particularly QCA, provide an intriguing prospect for emerging technological tools. In this study, QCA is studied as a reversible logic implementation approach. We show an unique XOR gate as well as a fresh technique to implementing a 2:1 mux. Furthermore, by utilizing the suggested XOR gate, an effective and robust universal reversible gate is built. In compared to existing reversible gates, the suggested reversible gate performs admirably in cell count and cost while adopting the QCA. The gate is amongst the cost-effective framework assists so far, with the lowest overall cost.*

## **CHAPTER-6**

### **CONCLUSION**

In this paper, we introduced a novel global reversible gate. The research has practical implications in the development of combinational circuits in the QCA field, where reversibility is a goal. The development of a strong new tiny reversible gate based on the innovative XOR operation arises from the implementation of a one-of-a-kind XOR gate. The operation of the recommended reversible gate was confirmed. In comparison to the previous most expensive designs, the recommended reversible gate has the smallest count of cells, resulting in a 20% cost reduction.

## ABSTRACT

*An analytical methodology for channel estimation and data decoding in huge multiple input multiple output uplink systems using 1-bit analog-to-digital converters is given (ADCs). Various approaches have been developed, but the QAM (Quadrature Amplitude Modulation) method is the most commonly employed. The receiver had to identify the "amplitude and phase" of each incoming symbol in order to decode QAM. When the signal intensity is greater than the noise strength, the two ends may choose the constellation procedure. The receiver in two-way communication has an equalizer and must untwist the incoming symbols back to their intended shape in order to decipher them accurately. Existing work does not provide a clear expression of the Mean Square Error (MSE) of channel estimation, making it impossible to examine its system performance in relation to various factors. Because it necessitates an extremely linear amplifier. In this work, MSE, Symbol Error Rate (SER) and Variance values are computed and provided their analysis to estimate the system performance.*

**Keywords:** *channel estimation, MSE, SER, Variance*

## CHAPTER 7

### CONCLUSION

As a result, we believe that system performance can be improved. estimated by combining the various parameters as an example, mean square error, symbol rate of error and variance by contrasting these parameters with estimator as an example power( $\rho$ ). The proposed system is more comprehensive and follows simple algorithms. In this work, MSE, Symbol Error Rate (SER) and Variance values are computed and provided their analysis to make an assessment of the system's performance.

## **Abstract:**

For hierarchical, building-block design methodologies, floorplanning is a crucial physical design stage. As the size of the circuit grows, so does the intricacy of the circuit rises. To deal with the growing complexity of design, the modules for intellectual property (IP) are commonly used in floorplanning. This presents a Hybrid BAT & particle swarm optimization algorithm for floorplanning optimization. Here in order to avoid overlapping, B\*tree is utilized at the beginning of modules, and then the PSO algorithm, as well as the idea. The Bat Algorithm is used to generate crossover and mutations obtain the best possible placement solution. The primary goal of floorplanning is to reduce chip area and connections length of wire The Microelectronics Experiment Results Benchmark circuits from the Center of North Carolina (MCNC) that our method has a higher convergence rate.

**Keywords:**Floorplanning, Complexity, PSO, Bat algorithm, B\* tree representation.

## 5. CONCLUSION

A Hybrid BPSO technique for VLSI floor-plan optimization is implemented in this study. The results of the experiments suggest that Hybrid BPSO is the optimum floorplan optimization approach. When compared to other existing approaches, it gives better outcomes. To test the viability, the implementation was first carried out on a few modules with a smaller floor-plan space. In comparison to the initial floor-plan area, an improvement in area was gained for floor-plans with a certain number of modules. The elapsed time is long because the number of iterations was set to 1000.

## ABSTRACT

Heart diseases or cardiovascular diseases (CVD) are one type of diseases that include heart or vessels (veins and arteries). Cardiovascular Disease (CVD) is considered as one of the major causes of death for both men and women throughout the world. The significant growth of these diseases and their complications, and their high costs adversely affect the societies and impose a lot of financial and physical burden on the international community. Cardiovascular Disease cannot be easily predicted by the medical practitioners as it is a difficult task which demands expertise and higher knowledge for prediction. Though real-life consultants can be able to predict the disease with an enormous number of tests and requiring a huge processing time, sometimes, their prediction may be incorrect because of lack of skilled knowledge. Therefore, using effective methods to do prevention is very vital. Heart sound signals reflect valuable information about heart condition. Previous studies have suggested that the information contained in single-channel heart sound signals can be used to detect Cardiovascular Disease. But accuracy based on single-channel heart sound signal is not satisfactory. In this work a novel method is proposed on multi domain feature fusion of multi-channel cardiac sound signals along with optimization technique.

The Proposed system initiates its operation by acquiring the ECG samples of Heart from different nodes and reshapes for proper sequence of buffering the ECG Pulses. The Buffered ECG pulses are suitably fused by multi-modal fusion frame work to combine all the pulses of similar magnitude and modalities. The fused ECG pulses are optimized with the robust neural network optimization technique like Gradient Descent optimization technique. Then, the optimized ECG pulses are clustered into different classes based on their pulse magnitudes by K-Means. The classification features are extracted from the optimized ECG pulses and are subjected to the abnormality's detection and classification by the Convolutional Neural Network. The detected abnormalities are again clustered into variant groups for disease classification. Finally, the classification results are conveyed with psychovisual and quantitative parameters such as Sensitivity, Specificity, Accuracy, PSNR, MSE etc.

## CHAPTER 6

### CONCLUSION

Cardiovascular Disease (CVD) is one of the major causes of death for both men and women throughout the world. The significant growth of these diseases and their complications adversely affect the societies and impose a lot of financial and physical burden on the international community. Heart sound signals reflect valuable information about heart condition. The information contained in heart sound signals can be used to detect cardiovascular disease. In this work a novel method was proposed to detect cardiovascular diseases using multi-channel cardiac sound signals along with optimization technique.

In this work, the ECG samples of different patients from Kaggle database were acquired and buffered and reshaped for the proper sequence of ECG pulses. The buffered ECG pulses were fused by multi modal fusion frame work by combined all the pulses of similar magnitude and modalities. The fused ECG pulses were optimized by Gradient Descent optimization technique and clustered into different classes based on their pulse magnitudes by K-Means technique. The features were extracted from the clustered ECG pulses and subjected to the abnormality detection and classification by the Convolutional Neural Network. Finally, the performance parameters such as sensitivity, specificity, Accuracy, cross entropy, gradient are computed and compared.

#### ADVANTAGES

- Early Detection
- Accurate Detection

#### APPLICATIONS

Medical Applications such as

- Detection of Heart Attack
- Detection of Heart Valve
- Detection of Heart Failure
- Detection of Vascular Disease

#### FUTURE SCOPE

For future work, this technique is implemented on some more signals such as EEG signals and also the number of signals considered for the process to improve the accuracy.

**Semester**            IV Semester  
**Branch**                MBA

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
0	0	0	6

**Course Objectives:**

- To make the students familiar to apply the knowledge gained from the theoretical subjects in the entire course.

Students are required to take up a project work, in which the student can choose any specific problem of industry or industry-based project work. Alternatively, it can be secondary source based or field-based project work. Before the commencement of the project work, each student is required to submit a synopsis indicating the objectives, methodology and frame work for analysis. The project should have an internal faculty has guide. The student can initiate the project work in the penultimate semester of the course

**Course Outcomes:**

At the end of the course, the student will be able to apply the various concepts in real time scenarios Blooms Level of Learning  
L3

**CO-PO Mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
9P1A45	3	2	2	2	3	3	2	2

**PROGRAM OUTCOMES:**

- Management Knowledge:** Apply knowledge of Management Theories and Practices to solve Business Problems.
- Critical Thinking:** Foster Analytical and Critical thinking abilities for Data – based decision making.
- Value Based Leadership:** Ability to develop value-based Leadership.
- Communication and Ethics:** Ability to understand, analyse and communicate global, economic, legal, and ethical aspects of business.
- Multidisciplinary Environment:** Ability to lead themselves and others in the achievement of organisational goals, contributing effectively to a team environment.
- Entrepreneurship:** Ability to evaluate best entrepreneurial opportunities and manage start-ups in the present Business world.
- Social Responsiveness:** Apply ethical principles and understand the impact of the Professional management solutions in societal and environmental contexts.
- Life Long Learning:** Ability to engage in independent and life long learning in the context of managing unpredictable Societal and Global issues.

## Capital Structure

---

### 1.1 INTRODUCTION

#### CAPITAL STRUCTURE

Every organization requires funds to run and maintain its business the required funds may be raised from short term sources or long term sources or a combination both the sources of funds, so as to equip it self with an appropriate combination of fixed assets and current assets. Current assets to a considerable extent are financed with the help of short term sources. Normally, firms are expected to follow a prudent financial policy, as revealed in the maintenance of net current assets. These net positive current assets must be financed by long term sources. Hence long term sources of funds are required to finance for both.

- Long term assets (fixed assets)
- Net working capital (Positive Current assets).

A firm can easily estimate the required funds by a detailed study of the investment decision. In other words, anticipation of the require funds may be estimated analyzing the investments decision. Once anticipation of require funds is completed then the next step is financial for the manager to make decisions related to the finance or the selected investment decisions. Generally capital is raised from the prime source are .

- Equity
- Debt

Then the questions are what should be the proportion of equity and debt in the capital structure of a company.

As the objective of a firm should be directed towards the maximization of the value of the firm, the capital structure decision should be examined from the point of its impact on the firm. If the value of the firm can be affected by capital structure, a firm would like to have a capital structure, which maximizes the market value of the firm. There exist conflicting theories on the relationship between capital structure and the value of the firm.

Capital structure decisions are significant finance of the corporate firm in that they influence the return as the risk of equity shareholders.

## Capital Structure

---

### 5.3 CONCLUSIONS

The following conclusions are arrived at based on the observations made on the present study:-

- Except of the first year of the study of period, funds were utilized for financing the capital structure requirements.

This various Ratio like debt equity ratio, proprietary ratio, earning per share, indicating that the over all financial position of the Bharathi Cement Ltd is not satisfactory. However there is scope for improving and in the area of cash management and capital structure management.

## CHAPTER-1

### INTRODUCTION

#### 1.1 BACKGROUND OF STUDY:

Micro finance means providing very poor families with very small loans (micro - credit) to help them engage in productive activities /small businesses. Micro Finance can contribute to the financial inclusion of the poor without which it will be difficult for them to come out of the vicious cycle of poverty. To strengthen all the available channels of providing credit to the poor such as SHG- Bank Linkage programmes, Micro Finance Institutions, Cooperative Banks, State financial corporations, Regional Rural Banks and Primary Agricultural Credit Societies. The strength of the micro finance industry lies in its informality and extremely it is required flexibility which should be protected and encouraged.

Microfinance is defined as any activity the provision of financial services such as credit, savings, and insurance and poor individuals which fall below that poverty line, with the goal of creating social value. The creation of social value includes poverty to lighten and the broader impact of improving livelihood opportunities through the provision of capital for micro enterprise, and insurance and savings the founding of the Grameen Bank in Bangladesh, actors access to financial which consist of two individuals at low income which fall just above the poverty line defined by nationally for risk Mitigation and consumption smoothing. Using a range of microfinance delivery methods in India, a vast variety of actors provide microfinance. From many different have tried hard to provide services to the poor in creative ways.

Microcredit is a broad name for the programmes that extend small loans to very poor people for self-employment projects that generate income, allowing them to care for themselves and their families. - *Microcredit Summit*

The word "microcredit" became a tool for development only after 1980. Now it has become a buzz-word among the development practitioners. Today it is common to see

### 5.3 Conclusion:

Microcredit largely facilitates the poor's access to institutions credit in terms of both economic and no-economic aspects. It impacts poverty alleviation, women empowerment and promotion of gender equality. In this regard banks and financial institutions need to concentrate on building trust, confidence and respect towards the customers to maintain harmonious relationship between banks and customers.

## CHAPTER - 1

### 1.INTRODUCTION

#### RATIO ANALYSIS

Ratio analysis is the process of identifying the financial strengths and weaknesses of the firm by properly establishing relationships between the items of the balance sheet and the profit and loss account. Financial analysis can be undertaken by management of the firm, or by parties outside the firm, viz. Owners, creditors, investors and others. The nature of analysis will differ depending on the purpose of the analyst.

#### Trade Creditors

Trade creditors are interested in firm's ability to meet their claims over a very short period of time. Their analysis will, therefore, confine to the evaluation of the firm's liquidity position

#### Suppliers of Long-Term Debt

On the other hand, suppliers of long-term debt are concerned with the firm's long-term solvency and survival. They analyse the firm's profitability over time, its ability to generate cash to be able to pay interest and repay principal and the relationship between various sources of funds (Capital structure relationship). Long-term creditors do analyse the historical financial statements, but they place more emphasis on the firm's projected, or proforma, financial statements to make analysis about its future solvency and profitability.

#### Investors

Investors, who have invested their money in the firm's shares, are most concerned about the firm's earnings. They restore more confidence in those firms that show steady growth in earnings. As such, they concentrate on the analysis of the firm's present and

### 5.3 CONCLUSION

The study aimed to analyse the performance of the company the gross profit and net profit are fluctuating during the study period by keep observation of the entire study period .i hereby declare that profitability position of the company is satisfactory ,because of management sales is good it is generating profits and the company has to focus on controlling expenses and increasing sales . the overall peroframace of the company is satisfactory

## **CHAPTER-1**

### **1.1 INTRODUCTION**

#### **RATIO ANALYSIS:**

Financial analysis is the process of identifying the financial strengths and weaknesses firm by properly establishing relationship between the items of the Balance sheet and the profit and loss account. Financial analysis can be undertaken by the management of the firm or by parties outside the firm, viz owners, creditors, investors and others. The nature of analysis will differ depending on the purpose of the analyst.

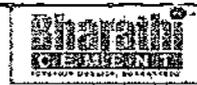

Trade creditors are interested in firms ability to meet their claims over a very short period of time. Their analysis will therefore, confirm to the evaluation of the firm's liquidity position.

Suppliers of long term debt, on the other hand, are concerned with the firms long term solvency and survival. They analyze the firms profitability over time, its ability to generate cash to be able to pay interest and repay principal and the relationship between various source of funds (capital structure relationship) long term creditors do analyze the historical financial statement to make analysis about its future solvency and profitability. Investors, who have invested their money in the firm's share, are most concerned about the firms' earnings. They restore more confidence in those firms that show steady growth in earnings. As such, they analysis of the firms present and future profitability. They are interested in the firms financial structure to the extent it influence the firms earnings, ability and risk.

Management of the firms would be interested in every aspect of the financial analysis. It is theirs overall responsibility to see that the resources of the firms are used most effectively and efficiency and that the firms financial condition is sound.

#### **SCOPE AND EVOLUTION OF FINANCIAL MANAGEMENT:**

Nearly two decades ago the scope of the financial management was to the raising of funds whenever needed and significance used to be attached to the day -to-day financial decision -making and problem solving. Until about the middle of the century, the financial management is generally defined only matter pertaining to the right side of the Balance sheet.

### 5.3 CONCLUSION

After evaluating and analyzing the liquidity,leverage,profitability,turnover ratios of Bharati Cement Ltd.The following conclusion is draw.

Liquidity position of the company was revealed by the current ratio during the study period was crossed by the ideal ratio,so that Bharati Cement Ltd,is liquidity position in future also,the position of the debt the capitalization of the firm is always low.So ,it is unfavourable to shareholders and creditors.

## **CHAPTER - 1**

### **1.1 INTRODUCTION**

#### **Working capital**

Finance is the process of commission of accumulated funds to productive use. Finance helps to direct flow of economic activity and facilitates its smooth operation. Finance is the agent that produces these results.

There are many definitions of finance of all the best was of Howard and on. "That administrative area of set of administrative area of organization which have to do with management of the flow of cash so that the organization will have the means to carry out as objectives to satisfactory as possible and at the same time meet its obligations as they become due".

Finance is concerned with the task of providing funds to the enterprises on the term that is most favorable towards the attainment of the organizational goal's objects. The function of finance is not merely furnishing funds to the organization. Finance has a broader meaning and it covers financial planning, forecasting of cash receipts and disbursements, rising of funds, use and allocation of funds and financial control. The area of operation of finance manager is ~~issue~~

---

### 5.3 CONCLUSION

The overall performance of the company will depend upon the performance from liquidity, solvency and turnover .Therefore, it is concluded that the Company's working capital position is good .The company has to evaluate the appropriate strategy in all such directions, which will certainly drive the company to the new heights.

## ABSTRACT

In view of the developing number of uses in movement, military, and different fields, area forecast is acquiring ubiquity. This venture intends to foster a web application that fosters a forecast model that predicts a client's objective in view of their ongoing area, date, and time. To bunch similar places and save the information, we utilize K-Means grouping. A Random Forest Classifier utilizes the information to gauge the objective. The Track Go application permits clients to prepare of time by offering a course to their objective and close by conveniences, as well as courses to these locales utilizing Google Maps.

## CONCLUSION:

The undertaking is an application, and the occasion gave a stage to the school's understudies to contend at their best in track occasions, for example, run races and obstacles. They effectively created AI models to anticipate objective. This is based on the Danton Framework. There are a couple of lap tracks. Determinations: Directions: There is an end in the accompanying inquiry. I. Political freedom and a majority rules government are inseparably connected.

## ABSTRACT

One of the most challenging tasks in the education sector in India is to predict student's academic performance due to a huge volume of student data. In the Indian context, they don't have any existing system by which analysing and monitoring can be done to check the progress and performance of the student mostly in Higher education system. Every institution has their own criteria for analysing the performance of the students. The reason for this happening is due to the lack of study on existing prediction techniques and hence to find the best prediction methodology for predicting the student academics progress and performance. Another important reason is the lack in investigating the suitable factors which affect the academic performance and achievement of the student in particular course. I proposed a multiclass prediction model to reduce the over fitting and misclassification results caused by imbalanced multi-classification based on oversampling Synthetic Minority Oversampling Technique (SMOTE) with features selection methods. This proposed model indicates the comparable and promising results that can enhance the prediction performance model for imbalanced multi-classification for student grade prediction.

## CONCLUSION

Predicting student grades is one of the key performance indicators that can help educators monitor their academic performance. Therefore, it is important to have a predictive model that can reduce the level of uncertainty in the outcome for an imbalanced dataset. This project proposes a multiclass prediction model with six predictive models to predict final student's grades based on the previous student final examination result of the first-semester course. Specifically, it have done a comparative analysis of combining oversampling SMOTE with different FS methods to evaluate the performance accuracy of student grade prediction. In this project also have shown that the explored oversampling SMOTE is overall improved consistently than using FS alone with all predictive models. However, proposed multiclass prediction model performed more effectively than using oversampling SMOTE and FS alone with some parameter settings that can influence the performance accuracy of all predictive models. Here, findings contribute to be a practical approach for addressing the imbalanced multi-classification based on the data-level solution for student grade prediction.

## ABSTRACT

Outsourced storage such as cloud storage can significantly reduce the burden of data management of data owners. Despite of a long list of merits of cloud storage, it triggers many security risks at the same time. Data integrity, one of the most burning challenges in secure cloud storage, is a fundamental and pivotal element in outsourcing services. Outsourced data auditing protocols enable a verifier to efficiently check the integrity of the outsourced files without downloading the entire file from the cloud, which can dramatically reduce the communication overhead between the cloud server and the verifier. Existing protocols are mostly based on public key infrastructure or an exact identity, which lacks flexibility of key management. In this paper, we seek to address the complex key management challenge in cloud data integrity checking by introducing attribute-based cloud data auditing, where users can upload files to cloud through some customized attribute set and specify some designated auditor set to check the integrity of the outsourced data. We formalize the system model and the security model for this new primitive, and describe a concrete construction of attribute-based cloud data integrity auditing protocol. The new protocol offers desirable properties namely attribute privacy-preserving and collusion-resistance. We prove soundness of our protocol based on the computational Diffie-Hellman assumption and the discrete logarithm assumption. Finally, we develop a prototype of the protocol which demonstrates the practicality of the protocol.

## CONCLUSION:

This introduced two new developments of Ciphertext Policy Attribute Based Encryption for the AND-Gate with trump card access strategy. Our most memorable plan accomplishes steady ciphertext size, yet can't conceal the entrance strategy. Then again, our subsequent plan might actually conceal the entrance strategy against the authentic decryptors. The demonstrated that our subsequent development is secure under the Decisional Bilinear Diffie-Hellman and the Decision Linear suspicions. One deficiency of our subsequent development is that its ciphertext size is as of now not steady, at that point, demonstrating this development in completely secure.

## **ABSTRACT**

The Internet of Things (IoT) has significant ramifications in the transportation business. Independent Vehicles (AVs) target further developing everyday exercises, for example, conveying bundles, further developing traffic, and the transportations of products. AVs are not restricted to ground vehicles yet additionally incorporate elevated and ocean vehicles with a wide scope of uses. To conquer this issue we are executing Cyber Security (CS) based information move to Autonomous vehicle. Here a cloud is the middle person that which moves source documents to independent vehicle with greater security we are utilizing CS based calculation (Advanced Encryption Standard) which is utilized to conceal the moved information into figure text. The code message can be decoded by the private key produced by shipper to the specific AV.

**Keywords** Network safety, Cipher text, AES, Private key, AV.

## **CONCLUSION**

Here executed Cyber Security (CS) based information move to Autonomous vehicle framework. Cloud is utilized has middle person to moves records from shipper to independent vehicle with greater security utilizing CS based calculation (Advanced Encryption Standard) for changing over information into figure text. The code message is decoded by the private key created by shipper to the specific AV.

## ABSTRACT

Speaker recognition is a task of identifying persons from their voices. Recently, deep learning has dramatically revolutionized speaker recognition. However, there is lack of comprehensive reviews on the exciting progress. In this document, everybody review several major task of speaker recognition, with a focus on deep-learning-based methods. Because the major advantage of deep learning over conventional methods is its representation ability, which is able to produce highly abstract embedding features from utterances, everyone first pay close attention to deep-learning-based speaker feature extraction, which are the fundamental components of many speaker recognition subtasks. Then, I make an overview of speaker identification, with an emphasis of recent supervised, end-to-end. Finally, I classify robust speaker recognised from the perspectives of adaptation and speech.

## **Conclusion:**

I have successfully developed a system which identifies the voice of speakers using neural networks. This is created in a user-friendly environment with Python programming and Flask. The system is likely to gather data from the user to determine that whose audio it is...

The ability to identify numerous forecasting subjects could be added to this application in the future. I intended to investigate prediction approach with the revised data set and employ the most accurate and relevant machine learning algorithms for detection. In this document the animist provide information about various applications of Speaker Recognition Technologies. Automatic speaker recognition applications define which information in the speech signal is relevant, such as the linguistic information will be relevant if the goal is to recognize the sequence of words that the speaker is producing. The presence of irrelevant information like speaker or environment information may degrade the system accuracy.

## ABSTRACT

Smart health has attracted attention in recent years due to advances in information and communication technologies. On the other data, medical data to support smart health technology However, medical data storage faces serious security and privacy concerns from hacktivists, cloud service providers, and even medical institutions. Propose a new data repository called Derepo that addresses these issues by protecting the repository with homomorphic encryption schemes and protecting privacy with homomorphic encryption schemes. It uses distributed ledger technology and injects trusted features such as Byzantine fault tolerance into the access control mechanism. It also uses a fully homomorphic encryption scheme to maintain privacy and maintain predictability. Derepo's design is user-centric. Only data owners can create access control policies and decrypt data, but authorized third parties can apply data manipulation processes to encrypted data without knowing the original values.

## CONCLUSION

To solve the security and privacy issues associated with storing medical data in smart healthcare, Derepo proposed decentralizing access control and encrypting data without losing predictability. These are the two main challenges that arise from competing models. A two-tier architecture is formalized in static structure and dynamic processes. This also preserves manageability, manageability and pseudonyms. Ensure privacy and address privacy issues raised by internal and external organizations. opponents, the FHE scheme was introduced for it prove the security of Derepo with the analysis from the perspective of attackers. it also demonstrate the performance of Derepo by conducting experiments on the prototype. In addition, Derepo is not smart health specific and is capable of supporting more generalized data access, storage and sharing. In future work, it will optimize the implementation and extend the functionality.

## ABSTRACT

Frauds are increased day by day in the world. Some financial institutions employ data scientists and distinct topic expert teams to help them spot fraudulent activity. Data scientists frequently employ sophisticated statistical models to spot deceit. However, this strategy has a lot of drawbacks. Since fraud detection cannot be done in real-time, it frequently takes place after the fraud has already taken place before fraudulent behaviors are discovered. These methods are prone to mistakes made by humans. Additionally, it calls for the use of data scientists and pricey, highly qualified domain expert teams. Even still, handling massive amounts of data is exceedingly challenging due to the low accuracy of human fraud detection approaches. In order to discover fraudulent activity patterns, it frequently takes time-consuming investigations into the other transactions connected to the crime.

Financial transactions, fraud, patterns, etc. are used as keywords.

## CONCLUSION

In this project, successfully developed a method for generating the categorization needed to detect credit card fraud. In order to forecast the needs, the system is likely to gather information from the user. Credit card fraud is without a doubt an act of criminal dishonesty. This project has listed out the most common methods of fraud along with their detection methods and reviewed recent findings in this field. This project has also explained in detail, how machine learning can be applied to get better results in fraud detection along with the algorithm, code, explanation its implementation and experimentation results. While the algorithm does react over 99.6% accuracy, its precision remains only at 28% when a tenth of the data set is taken into consideration.

## CONFIRMATION LETTER

To  
The Principal,  
Annamacharya Institute Of Technology And Sciences  
New Boyanapalli,  
Rajampet,  
Andhra Pradesh.

Dear Sir/Madam,

Sub: Project Confirmation Letter-Reg.

This is to certify that, **S.MOHAMMAD ZAKEER** studying **MCA** bearing the **Reg.No:20701F0036** from "**Annamacharya Institute Of Technology And Sciences** ",has been accepted to do project entitled "**BONE DEFORMITY IDENTIFICATION USING MACHINE LEARNING** " as part of their academic project curriculum in our organization.

The project will be done using **PYTHON** during the period from **APRIL 2022**to **AUGUST 2022**under the guidance and supervision of our developers from **STRYDO TECHNOLOGIES PVT.LTD** , **TIRUPATHI**.

We wish him all the best for his future endeavor.

**Mr.CHAKARAVARTHY**  
**(BRANCH MANAGER)**

**ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES

## ABSTRACT

In recent years, bone fracture detection and classification has been a widely discussed topic and many researchers have proposed different methods to tackle this problem. Despite this, a global approach able to classify all the fractures in the human body has not yet been defined. The bone is a major component of the human body. Bone provides the ability to move the body. The bone fractures are common in the human body. The doctors use the X-ray image to diagnose the fractured bone. The manual fracture detection technique is time consuming. In recent years, deep learning and, in particular, the convolution neural network (CNN), has achieved great results to tackle this problem. The small fracture in the bone becomes difficult to analyze by the doctor. Therefore, it is a necessity to develop a computer aided diagnosis (CAD) to reduce the time and the error probability for the fracture bone diagnosis.

## CONCLUSION

The algorithm proposed here has done on Bone Fracture Detection and Classification. This displays the different existing strategies proposed by various creators. Here comparison made between existing techniques on the basis of classification methods used and the accuracy. There are several image processing techniques for the detection of the bone fracture. Canny Edge Detection method with sobel operator is most commonly used for fracture identification in existing system. The deep learning is very powerful strategy for the classification of type of fracture. The accuracy of the classification of fracture mainly depends on the size of the dataset, quality of the images and number of epochs used for training the model and the method used for classification. The different techniques can be cascaded for higher classification accuracy. There are future scopes of improvements in present techniques as no model guarantee hundred percent accuracy.

## ABSTRACT

Machine learning and Feature Selection are playing a vital role in internet and auto mobile sector also. Nowadays, aircrafts have become a necessity because they easy life. They are efficient in carrying goods and passengers around the world. It also supplies emergencies in warfare and takes a vital role in carrying medical necessities. Hence, advent of airplanes is considered important. Delays in aircrafts can affect thousands of people across the globe either directly or indirectly. There are a lot of reasons of delays in aircrafts such as critical weather, security issues, traffic and many more. There are several methods proposed to predict the flight delays but due to various complexities of the ATFM and the huge datasets involved, it has become very difficult to find an accurate solution for this complication. Many algorithms have been implemented to forecast flight delays.

## **Conclusion**

The analysis retrieved are useful not only for passengers point of view, but for every decision maker in the aviation industry. Apart from the financial losses incurred by the industry, flight delay also portray a negative reputation of the airlines, and decreases their reliability. It causes various sustainability issues, The analysis carried here not only predicts delays based on the previous available data, but also give statistical description of airlines, their rankings based on their ontime performance, and delays with respect to time, showing the peak hours of delay. This project can be used as a prototype by any aviation authority for their benefit in the Indian Scenario too, it can work as an efficient model or a proper prototype to study delay analysis, based on the real dataset provided.

## ABSTRACT

In cloud environments, group data sharing has become a hot topic in recent years. How to share data securely and efficiently in cloud environments is an urgent problem to be solved. Recently, an anonymous and traceable group data sharing scheme was proposed by Shen et al to address this issue. They constructed their scheme using a group signature scheme as the building block. In this comment, discuss the security of their group signature scheme signature scheme and point out that it does not achieve the anonymity which they claimed and give a corresponding attack. In an existing system use the cloud environment. In which we store, retrieve and share data with other users. But in are facing data security issues and data sharing capacity is low. In the proposed system are building a new scheme to use the Group Signature Scheme as a building block. In the comment, discuss the security of their group signature scheme and point out that it did not achieve the anonymity they claimed and provide a relevant attack.

## **CONCLUSION**

The final looked an examined Shen et al group 's signature approach in this comment. To pointed out that their technique fails to achieve CPA-full-anonymity and launched an attack in response. The security of data access policies based on hierarchical structure is addressed by our system. These plans give private cloud security as well as public cloud access, operations, and cost savings. As corporations use the public cloud, more advantages emerge, such as the public cloud's stability and the need for minimal maintenance and upkeep.

**Future Scope:** In future can implement to More security and provide Email Authentication.

Academic Project Work - B.Tech**

Following is the list of project batches for the academic project work(2020-2021) during Fourth year.

Year: IV  
Sec: A

Batch	H.T.No	Name of the student	Guide Name	Project Title
A 1	17701A0326	MAHESH BABU N	N. KEERTHI	SELF-REGULATING TYRE INFLATION SYSTEM
	17701A0329	MOHAMMED ABUBAKAR SIDDIQ SHAIK		
	17701A0331	B MOHAN SAI		
	17701A0332	GURRAM MUNI JITHENDRA		
	17701A0321	B KALYAN KUMAR		
A2	17701A0333	M MURALIDHAR CHOWDARY	Dr. N. VENKATA CHALAPATHI	"MODIFICATIONS IN THE DESIGN OF CHAFF CUTTER"
	17701A0325	C LOKESWARA REDDY		
	17701A0348	P SAI KUMAR		
	17701A0343	D RAMALINGESWARA		
A 3	17701A0340	POCHIREDDYGARI RAJESWARA REDDY	R.V.N.R. SURYA PRAKASH	"A REVIEW ON FRICTION STIR WELDING OF ALUMINIUM ALLOY"
	17701A0328	THIPPUGARI MALLIKARJUNA REDDY		
	17701A0324	POLI LOKNATH REDDY		
	17701A0335	DUNTHALA NAVEEN KUMAR REDDY		
A 4	18705A0302	ANIL KUMAR VUSA	Dr. A. HEMANTHA KUMAR	DEVELOPMENT OF HYBRID COMPOSITION OF ALUMINIUM 7075 ALLOYS BY APPLYING THE OPTIMIZATION TECHNIQUES
	18705A0318	NAVEEN MEKALA		
	17701A0317	POOLAKUNTA GURU PRASAD		
	18705A0307	CHINNA OBULESU PABBATI		
A 5	18705A0317	NAVEEN KUMAR AVULA	K. NAGAMANI	Optimizations Of Hardness And Tensile Strength Of Aluminium Alloy 2618A By Using Grey Relational Analysis
	18705A0303	ANUDEEP BANGALA		
	18705A0305	CHANDRAHAS MALA		
	16701A0318	MUDDULA KRISHNAIAH Y		
A 6	18705A0306	CHANDRASEKHAR SANGEETHAM	V. VENKATESH	FABRICATION OF XY PLOTTER
	18705A0315	MARUTHI K		
	17701A0302	PEDDAPARSHA ABHIRAM		
	17701A0312	DEVANGAM MAILARI CHARAN		
A 7	17701A0327	CHIKKEM MAHESWARREDDY	P. RAVINDRANATHA REDDY	INVESTIGATION ON CONVEX LENS AND FRESNEL LENS ON SOLAR PANEL
	17701A0337	PULLEM PRAVEEN KUMAR		
	17701A0336	JONNA NIVESH BABU		
	17701A0334	GUJJALA NAVEEN		
	17701A0330	SHAIK MOHAMMED GHOUSE		
A 8	17701A0303	SHAIK ALIHYDER SAHEB	Dr. N. SIVA RAMI REDDY	"Design and Fabrication of an Electric Bike"
	17701A0301	TERA ABHILASH REDDY		
	17701A0344	NUKA RAVICHANDRA OBULA REDDY		
	17701A0306	CHINTHAKUNTA ASHOK KUMAR REDDY		
A 9	18705A0316	NARESH A	S .NAGENDRA	AUTOMATIC SEED SOWING ROBOT
	18705A0304	CHAITHANYA JAKKAMPUTI		
	18705A0308	CHINNA SIVUDU NAIK MUDE		
	16701A0339	SIVADATHA		
A 10	18705A0301	ABDULGAFOOR SHAIK	Dr. D.KRISHNA MOHAN RAJU	DESIGN OF BUS BODY TO IMPROVE MILEAGE BY REDUCING WIND FRICTION LOSSES
	18705A0312	KHULUD SHAIK		
	17701A0349	MULINTI SAI KUMAR REDDY		
	17701A0339	ALAMURU RAHIM BABU		
A 11	18705A0313	MADHU BALIJA	G.SURESH BABU	DEVELOPMENT OF CORROSION RESISTANCE COATINGS ON MAGNESIUM FOR ORTHOPEDIC APPLICATIONS
	18705A0311	KARTHIKEYA KUNJETI		
	17701A0314	PUTLURU GANESH KUMAR REDDY		
	17701A0338	PRUDHVIRAJU		
A 12	17701A0347	CHUKKA SAI KIRAN	C. THIRUPATHAIAH	OPTIMIZATION OF DRILLING PARAMETERS ON CNC MACHINE OF AL-6063
	18705A0309	HANIF SIDHARTHA VALLURU		
	17701A0350	KORAMUTLA SAI NAVEEN		
	17701A0345	GANGARAJU ROHITH VARMA		
A 13	17701A0307	SYED AZHARULLAH	K.AJAYA KUMAR REDDY	INVESTIGATION OF MECHANICAL PROPERTIES & CORROSION RESISTANCE OF MAGNESIUM ALLOY FOR MEDICAL APPLICATIONS
	17701A0341	KAKANURU RAKESH REDDY		
	17701A0309	SINGASANI CHAITANYA		
	17701A0311	MANNURU CHANDRASEKHAR		
A 14	17701A0304	KANCHAM AMARNATH REDDY	S. M.SALEEMUDDIN	COMPARISON OF STRUCTURAL AND THERMAL ANALYSIS OF DIFFERENT TYPES OF CONNECTING ROD
	17701A0315	KOTHAPALLI GIRIDHARREDDY		
	17701A0316	PASHAM GOPIKRISHNA		
	17701A0305	BOYA ARAVIND		
A 15	14701A0350	M Madhuvaran	N.DEEPTHI	OPTIMIZATION OF PROCESS PARAMETERS IN WIRE EDM PROCESS
	18705A0310	HARIKRISHNA YADAV YEDDULA		
	17701A0308	LAKKASANDRAM BHARGAV		
	17701A0310	YERRAGUNDU CHANDRA OBULREDDY		
	18705A0314	MADHUSUDHAN REDDY MALLAMMAGARI

Academic Project Work - B.Tech**

Following is the list of project batches for the academic project work(2020-2021) during Fourth year.

Year: IV  
Sec: B

Batch	H.T.No	Name of the student	Guide Name	Project Titles
B1	18705A0332	VENKATA SESHU GARIGA	N GLORY UJWALA	MODELING AND ANALYSIS OF HAIR PIN HEAT EXCHANGER AT DIFFERENT NANO-FLUIDS
	18705A0325	RAJENDRA CHIMMANI		
	18705A0323	PRAVEEN KUMAR REDDY GURKA		
	18705A0322	PRASHANTH KUMAR SOMISETTY		
B2	17701A0359	NELAPATI SIVAKRISHNAMA NAIDU	N.KISHORE KUMAR	Optimization of Stir Casting process for Preparation of Al 7075 reinforcement with Titanium dioxide and Boron Nitrate
	18705A0329	SIVA PRASAD KODURU		
	17701A0371	GUMMULLA THIRUPATHI		
	17701A0362	MOLAKA SREEKANTH		
B3	17701A0373	SIRIGIRI VENKATA SAI KUMAR RAJU	B. VENKATESH	DEVELOPING MATERIAL MATRIX COMPOSITION OF Al 6063 WITH REINFORCING NANO PARTICLES BY APPLYING OPTIMIZATION TECHNIQUE
	17701A0370	RAJAMREDDY SUSHANTH REDDY		
	17701A0372	THOTAMSETTY VAMSI KRISHNA		
	17701A0376	JEERLA VINAYKUMAR		
B4	18705A0328	SAINATH REDDY MUKKAMALLA	G. AMARNATH	PREDICTION OF USED CAR PRICE BY USING MACHINE LEARNING
	18705A0324	PRUTHVI SAI GANESH SREERAMADASU		
	17701A0357	GANGIREDDYGARI SIVA REDDY		
	17709A0301	ATMAKURU DEVENDRA		
B5	17701A0378	UPPATHI VINOD KUMAR REDDY	M. LOKANATH	Study of Wear Characteristics of Surface Modified Magnesium Alloy
	17709A0306	GAJULA NITHEESH KUMAR		
	17709A0307	MUMMADI PRANADEEP KUMAR		
	17709A0305	SANDIGARI NAVEEN KUMAR		
B6	17701A0368	UMMALARAJU SRIHARI RAJU	M. MARUTHI PRASAD	Automatic Bike side stand slider
	17709A0303	KANDULA GIRIDHAR REDDY		
	18705A0327	RAMKUMAR BANDA		
	17701A0353	MUDE SANTHOSH NAIK		
B7	18705A0335	VENKATESWARLU BUJUNURU	N. JAYA KRISHNA	EXPERIMENTAL INVESTIGATION ON MECHANICAL PROPERTIES OF MAGNESIUM METAL MATRIX COMPOSITE
	18705A0326	RAJESH GOLLAPALLI		
	18705A0321	PENCHALAI AH VELAGACHERLA		
	17701A0356	MITTA SIVA PRASANTH REDDY		
B8	17709A0311	NANDYALA SAI PHANEENDRA REDDY	V. MALLIKARJUNA	FABRICATION OF PORTABLE AIR HUMIDIFIER
	17709A0308	SAADHU PREM SAGAR REDDY		
	17709A0312	BALLA VENKATESH		
	17709A0302	RUDRU GANGA CHANDRA KUMAR REDDY		
B9	17701A0375	PALAGHAT VENKATARAMAN BALAJI	C. RAMANJANEYULU	HEAT TRANSFER ENHANCEMENT BY USING HYBRID NANOFUIDS Al <sub>2</sub> O <sub>3</sub> & Fe <sub>3</sub> O <sub>4</sub> IN HEAT EXCHANGERS
	17701A0352	D SAMARA SIMHA REDDY		
	17701A0382	ANNEM YUVA SAINATH REDDY		
	17701A0367	YARRAGONDU SRIHARI BHARGAV PRASAD REDDY		
	17701A0360	BALARAJU SIVAPRASAD RAJU		
B10	17709A0310	YARRAGUDI SAI KRISHNA	D. VISHNU VARDHAN REDDY	Experimental Investigation of process parameters of AISi D3 tool steel in WEDM by using GRA & GA
	18705A0336	ZAHIR AHAMED KHATEEB		
	18705A0319	NOORUL ALI KHAN MAYANA		
	17701A0380	KAMBHAM VISWANATH REDDY		
B11	18705A0331	VENKATA NANDA REDDY KAMBAM	B. SANTOSH KUMAR	Fabrication of Prototype Model of Eddy current contact less Braking System
	18705A0330	TRINATHA REDDY YANAMALA		
	17709A0309	CHINDULURI REDDY VENKATA NITHESWAR		
	17709A0304	KUKKAPALLI KIRAN KUMAR		
B12	18705A0334	VENKATAPRAVEEN KOTTE	Dr.P.V.SANJEEVA KUMAR	MODELLING AND ANALYSIS OF CAR FLYWHEEL FOR VARIABLE SPEEDS
	18705A0333	VENKATAGANGADHAR REDDY CHARLA		
	17701A0379	ESLAVATH VINODKUMAR NAIK		
	17701A0365	GURRALA SREERAMULU		
B13	17701A0361	NORU SREE VARDHAN REDDY	G.VENKATA AJAY KUMAR	FABRICATION OF MULTI PURPOSE SOLAR SPRAYER CUM WEEDER
	17701A0377	CHINNAKONDANNAGARI VINESH KUMAR		
	17701A0364	KURAKULA SREENATH REDDY		
	17701A0374	BATHULA VENKATA SREEKANTH		
B14	17701A0355	AKKAM REDDY SASIVARDHAN REDDY	S. RAMESH BABU	A REVIEW ON FRICTION STRIE WELDING ON POLYMERS
	17701A0354	SINGA SARATHSIMHA REDDY		
	17701A0358	BAYINENI SIVAKRISHNA

## LIST OF PROJECT TITLES FOR THE ACADEMIC YEAR 2020-21

S.No	H.T.No.	Name of the Candidate	Name of the Project Title
1	19701E0001	ANIL KUMAR BUKKA	A study on Funds flow Analysis with reference to Bharathi Cements Limited
2	19701E0002	ANILKUMAR REDDY VEERAMAREDDY	A study on Inventory management with reference to Hindustan an Coko-Cola Beverges Pvt Ltd
3	19701E0003	ANUSHA MURUKUTI	A study on working capital with reference to Dalmia Cement (Bharat) Ltd
4	19701E0004	APARNA BEERAM	A study on Financial Perfomance with reference to Surya Elevators Pvt Ltd
5	19701E0005	ASHOK ALAMURI	A study on Inventory Management with reference to Shri Govindaraja Mills Pvt Ltd
6	19701E0006	CHADNRA MOULI DASARI	A study on Working Capital management with reference to Shri Govindaraja Mills Pvt Ltd
7	19701E0007	CHAITANYA HALE KANNARI	A study on Customer Perception with reference to Srikalahathi Pipes Pvt Ltd
8	19701E0009	CHANDRASEKHAR BOMMANA	A study on Working Capital Management with reference to Dalmia Cement Bharathi Ltd
9	19701E0010	DHARMAREDDY TAMMINENI	A study on Capital Budgeting Management with reference to Sri Kalahasthi Pipes Ltd
10	19701E0011	FIROJ SHAIK SIKILIGIRI	A study on Capital Budgeting with reference to Dalmia Cement(Bharat) Pvt Ltd
11	19701E0012	GOPALA KRISHNA GODUGUNURUI	A study on Working Capital Management with reference to Chaitanya Chemicals
12	19701E0013	HARSHA VARDHAN CHOKKAM	A study on Fixed Assets Management with reference to Mr Honda Motors Pvt Ltd
13	19701E0014	KALYAN MADAKA	A study on Working Capital Management with reference to Apgenco Pvt Ltd
14	19701E0015	KAVYA ANDRA	A study on Customer Satisfaction with reference to Tata Motors
15	19701E0016	LAKSHMI K	A study on Working Capital Management
16	19701E0017	LAKSHMI NARASAMMA PODILI	A study on Inventory Management with reference to Amara Raja Batteries Ltd
17	19701E0018	LAKSHMI NARAYANA RAJALA	A study on Inventory Management with reference to Dixon Technologies(India) Ltd
18	19701E0019	LAKSHMIPRASANN A KOMMI	A study on Working Capital Management with reference to AndhraPradesh Southern Power Distribution Company Ltd
19	19701E0020	MADHAVI AKKI	A study on Ratio Analysis with reference to Andhra Baryte Corporatioon Private Ltd
20	19701E0021	MAHAMMAD AFZAL SHAIK	A study on Working Capital Management with reference to Amara Raja Batteries Pvt Ltd
21	19701E0022	MAHESH LINGAPPAGARI	A study on Financial Statement Analysis with reference to Macro Precious Component's
22	19701E0023	MALIK BASHA	A study on Cash Flows Statement with reference to Andhra Pradesh

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

		SHBIK	Southern Power of Distribution company Ltd
23	19701E0024	MANASA KESHAMREDDY	A study on Capital Budgeting with reference to Penna Cement
24	19701E0025	MOHAMMAD SABIR SYED	A study on Customer Awareness on Sales Promotion with reference to Mr Honda Motors
25	19701E0026	NAGA DURGA SAI KUMARI BARRE	A study on Sales Promotional Activities with reference to Vishnu Super Market
26	19701E0027	NAGA LAKSHSMI NAGALAKKAGARI	A study on Funds Flow Statement with reference to Integrated Thermoplastic Pvt Ltd
27	19701E0028	NAVEEN CHANDAGANI	A study on Working Capital Management with reference to Shirdi Sai Electricals Ltd
28	19701E0029	NAVEEN KUMAR PEDDULLAPALLE	A study on Working Capital Management with reference to Chaitanya Chemicals Pvt Ltd
29	19701E0030	NAVEENKUMAR KATUKUTI	A study on Working Capital Management towards Srikalahasthi Pipes Ltd
30	19701E0031	NAZMA SHAIK GANDHAMVARI PALLI	A study on Ratio Analysis with reference to Heritage Foods Pvt Ltd
31	19701E0032	NITHISHKUMAR RAJU CHAMARTHY	A study on Customer Awareness on Sales Promotion with reference to VK Automobiles India Pvt Ltd
32	19701E0033	PALLAVI POTLA	A study on Capital Budgeting with reference to Anantha PVC Pipes Pvt Ltd
33	19701E0034	PEDDA REDDAIH BOMMANA	A Study on Working Capital Management with reference to Sri Sai Sindhu Industries Ltd
34	19701E0035	PRASANNA KUMAR DEVARASETTY	A study on inventory management with reference to Nandi Pipes Pvt Ltd
35	19701E0036	PRASHANTHI MOOLI	A study on Working Capital Management with reference to Bharathi Cement Corporation Pvt Ltd
36	19701E0037	PRAVALIKA SIDDAREDDY	A study on Customer Satisfaction with reference to Kottha's Ganesh Industries
37	19701E0039	RAMANJINEYULU KENCHANAPALLI	A study on Cash Flow Analysis with reference to Anantha PVC Pipes pvt Ltd
38	19701E0040	RAMEEJA KODIDELA	A study on inventory management with reference to Nandi Pipes Pvt Ltd
39	19701E0042	RAVI P	A study on Working Capital on Profitability with Dhara Sree Ginning & Pressing Factory
40	19701E0043	REVATHI UGGU	A study on Working Capital Management with reference to AndhraPradesh Mineral Development Corporation Ltd
41	19701E0044	RUSHITHA AYYALA	A study on Consumer Satisfaction with respect to Dimensions of SERVICE QUALITY with reference to Vishnu Supermarket
42	19701E0045	SADIK BASHA BANGASH	A study on Mobile Number Portability Bharathi Airtel Ltd Sri Satya Narayana Distributer
43	19701E0046	SASIDHAR NELLEPALLI	A study on Working Capital Management with reference to Hindustan Coco-Cola Beverages Pvt Ltd
44	19701E0047	SATEESH KUMAR	A study on Working Capital Management with reference to UltraTech

## Academic Year 2020-21

Code	Subject	Credits
7P2B61	Seminar	2
7P2B62	Project Thesis / Dissertation	12

### A LIST OF PROGRAMMES AND STUDENTS UNDERGONE FIELD PROJECTS

S.NO	REGISTER NUMBER	NAME OF THE STUDENT	TITLE OF THE PROJECT
1.	19705F0001	P. ANITHA	A FRAMEWORK FOR REAL-TIME SPAM DETECTIN IN TWITTER
2.	19705F0002	BHARATHI N	RESEARCH AND APPLICATION OF DATA PRIVACY PROTECTION TECHNOLOGY IN CLOUD COMPUTING ENVIRONMENT BASED ON ATTRIBUTES ENCRYPTION
3.	19705F0003	M.BHAVANI	DETECTING FAKE ACCOUNT ON SOCIAL MEDIA USING MACHINE LEARNING ALGORITHMS
4.	19705F0004	GANGULAKUNTA BHAVYA SREE	FRAUD DETECTION IN CREDIT CARD DATA USING UNSUPERVISED MACHINE LEARNING BASED SCHEME
5.	19705F0005	MUNAGAPATI CHANDRA PRASAD	A CATEGORIZATION OF CLOUD-BASED SERVICES AND THEIR SECURITY ANALYSIS IN THE HEALTHCARE SECTOR
6.	19705F0006	J.DEEPA	USING DATA MINING TECHNIQUES TO PREDICT STUDENT PERFORMANCE TO SUPPORT DECISION MAKING IN UNIVERSITY ADMISSION SYSTEMS
7.	19705F0007	N. ESWARA NANDINI	SMS CLASSIFICATION METHOD FOR DISASTER RESPONSE USING NAÏVE BAYES ALGORITHM
8.	19705F0008	GANGA TEJASWI S	FAST SECURE AND ANONUMOUS KEY AGREEMENT AGAINST BAD RANDOMNESS FOR CLOUD COMPUTING
9.	19705F0009	GEETHA VANI D	CASHLESS SOCIETY MANAGING PRIVACY AND SECURITY IN THE TECHNOLOGICAL AGE
10.	19705F0010	ARITAKULA HARIKA	COMMENTS ON PROVABLE MULTI COPY DYNAMIC DATA POSSESSION IN CLOUD COMPUTING SYSTEMS
11.	19705F0011	KOVVURU HARIKA	TRANSFER LEARNING FOR RECOGNIZING FACE IN DISGUISE
12.	19705F0012	SHAIK IMRAN	PRIVACY-PRESERVING MULTI-KEYWORD SEARCHABLE ENCRYPTION FOR DISTRIBUTED SYSTEMS
13.	19705F0013	JILAN BASHA DURGAM	GROUP KEY MANAGEMENT PROTOCOL FOR FILE SHARING ON CLOUD STORAGE
14.	19705F0014	EEPURI JYOTHI	ANALYSIS OF WOMEN SAFETY IN INDIAN CITIES USING MACHINE LEARNING ON TWEETS
15.	19705F0015	KAVITHA C	DEREPO: A DISTRIBUTED PRIVACY PRESERVING DATA REPOSITORY WITH DECENTRALIZED ACCESS CONTROL FOR SMART HEALTH
16.	19705F0016	N. LAKSHMI	NEW FRAMEWORK OF REVERSIBLE DATA HIDING IN ENCRYPTED JPEG BITSTREAMS
17.	19705F0017	B LAKSHMI PRASANNA	MULTI SOURCE MEDICAL DATA INTEGRATION AND MINING FOR HEALTH CARE SERVICES

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

18.	19705F0018	KUNUTHURU MAMATHA	DEEP FACIAL DIAGNOSIS:DEEP TRANSFER LEARNING FROM FACE RECOGNIZATION TO FACIAL DIAGNOSIS
19.	19705F0019	MEESALA MUNEENDRA	IMAGE BASED PLANT DISEASE DETECTION COMPARISON OF DEEP LEARNING AND CLASSICAL MACHINE LEARNING ALGORITHM
20.	19705F0020	U NAVEENDRA KUMAR	DUAL ACCESS CONTROL FOR CLOUD-BASED DATA STORAGE AND SHARING
21.	19705F0021	NAVEEN KUMAR K	A PARALLEL AND FORWARD PRIVATE SEARCHABLE PUBLIC KEY ENCRYPTION FOR CLOUD BASED DATA SHARING
22.	19705F0022	PRASAD KATARI	A SECURE DATA DYNAMICS AND PUBLIC AUDITING SCHEME FOR CLOUD STORAGE
23.	19705F0023	PREETHI N	SCALABLE STRUCTURE LEARNING OF K DEPENDENCE BAYESIAN NETWORK CLASSIFEIR
24.	19705F0024	B.RUCHITHA	PHISHING WEBSITES DETECTION USING MACHINE LEARNING
25.	19705F0025	S. RUKHAYA SULTANA	COST EFFICIENT OUTSOURCED DECRYPTION OF ATTRIBUTE BASED ENCRYPTION FOR BOTH USERS AND CLOUD SERVER IN GREEN CLOUD COMPUTING
26.	19705F0026	SAI KUMAR K	MULTI-AUTHORITY ACCESS CONTROL WITH ANONYMOUS AUTHENTICATION FOR PERSONAL HEALTH RECORD
27.	19705F0027	SAIKIRAN REDDY KOMMA	LEARNING A CONVOLUTION NEURAL NETWORK FOR IMAGE COMPACT RESOLUTION
28.	19705F0028	A.SANDHYA	ANALYZING AND DETECTING MONEY_LAUNDERING ACCOUNTS IN ONLINE SOCIAL NETWORKS
29.	19705F0029	L .SARALA	DESIGNING A DISEASE PREDICTION MODEL USING MACHINE LEARNING
30.	19705F0030	MUTTANA SHASI	A PRIVACY-PRESERVING MULTI-KEYWORD RANKED SEARCH OVER ENCRYPTED DATA IN HYBRID CLOUDS
31.	19705F0031	A.SIDDESWARI	MACHINE LEARNING ALGORITHM FOR STROKE DISEASE CLASSIFICATION
32.	19705F0032	SOUJANYA M	FEATURE-LEVEL RATING SYSTEM USING CUSTOMER REVIEWS AND REVIEW VOTES
33.	19705F0033	A. SREELEKHA	PREDICTING FLIGHT DELAYS WITH ERROR CALCULATION USING MACHINE LEARNED CLASSIFIERS
34.	19705F0034	SRIKANTH E	A RATING APPROACH BASED ON SENTIMENT ANALYSIS FOR FOODAHOLIC
35.	19705F0035	B. SUBAN BASHA	AUTOMATIC COVID-19 DETECTION FROM X-RAY IMAGES USING ENSEMBLE LEARNING WITH CONVOLUTIONAL NEURAL NETWORKS
36.	19705F0036	KOPPARTHI SUNANDA	SPFM: SCALABLE AND PRIVACY-PRESERVING FRIEND MATCHING IN MOBILE CLOUD
37.	19705F0037	THULASI KUMAR MALLEM	NOVEL XG BOOST TUNED MACHINE LEARNING MODEL

## ABSTRACT

Construction Equipment is the important factor to run the project in a successful manner. This paper elevated on benefits of implementing total Productivity. While purchasing, leasing or renting the equipment, and guide in optimizing the profitability. Methods of life cycle cost estimating and decision methods were researched and compared.

Maintenance and it will also focus on calculating the overall equipment effectiveness. Utilization of machine properly and match their capacities to specific project requirements. Current practices and observations made in Indian construction industry.

The effectiveness of construction machineries is a major factor that differentiates construction companies in terms of heavy construction and light construction. The time and cost of project is most important constraint for the success of project.

Data was acquired from equipment rental companies, construction companies and multiple construction projects. Hypotheses on some expected results were tested. Finally, the findings of this study were compared with findings of questionnaire conducted for finding significant commonalities and differences in equipment management practices. Maximizing the equipment effectiveness 81.5% of a production system.

The objective of the work is to enhance the equipment effectiveness at a construction company. This research work revealed different factors of machinery management. Factors causing cost overrun in the construction projects were ranked on the basis of Relative Importance Index (RII).

Top five significant factors identified were frequent equipment breakdowns, maintenance of equipment, insufficient number of equipment, performance and efficiency of equipment and inadequate modern equipment systems.

## CHAPTER 14

### CONCLUSION

Factors affecting productivity in construction can be divided into two categories: human-related factors and management-related factors. These factors affect the morale and motivation of individuals. Quality of supervision, material management, site planning, constructability, and change management are the most significant management-related factors that influence productivity directly. The cost of the project must include the cost of equipment needed to build the project. The constructor must be able to determine, as accurately as possible, the duration of each piece of equipment required for each activity of the project. In our project focused on leading construction equipment planning and management problems in construction projects. The result indicated that idle time, down time, poor equipment maintenance practices, improper determination of economic life and timing of replacement, poor training of equipment operators, equipment breakdown, over maintenance of equipment, huge capital investment during acquisition, balance of interdependent equipment, misunderstanding the scope of work carried out, unit cost of production and equipment suitability for job condition were found to be the major problems that affect construction equipment planning and management. The overall productivity of construction is affected by various reasons. To improve productivity it is essential to improve the performance of the construction systems. The desired production output is achieved through high equipment availability, which is influenced by equipment reliability and maintainability.

The overall equipment efficiency was improved with less idling, low machine breakdown and minimized accident in plants which maximized the productivity rate, optimized process parameter. To improve the production rate of equipment is essential for a construction industry. In equipment management, proper planning, installation, selection, procurement, operation, maintenance and equipment replacement policy plays vital role for successful completion of project. From collected data, it has seen that equipment utilization on site has to be studied in details. The overall productivity of construction is affected by various reasons. The downtime and idle run time of equipment play important role in production. These downtime & idle time factor also effect on total cost of project.

## ABSTRACT

Cement is the main constituent of Concrete as binding and the only component which is scientifically controlled. Now a days, different types of cements are increasingly used in the market asserting the enhanced strength and durability and increase in service life of structure. Laboratory tests like Compressive strength, Wet and Dry, Acid resistance, were conducted to access the robustness of mortar. Graphene is an allotrope of carbon consisting of a single layer of atoms arranged in a two-dimensional honeycomb lattice nanostructure. The use of graphene concrete additives can increase strength, reduce clinker factor in cements (reducing carbon footprint) and potentially increase longevity of products. The technology has the potential to deliver stronger, less permeable concrete structures enabling a new generation of concrete designs. Present research work aims to enhance GO reactivity by increasing its exfoliation and its count by mechanical milling and to exploit it as a low-cost dispersed phase having different sheet thicknesses and sheet sizes for strength enhancement of cementitious matrix by regulating crystal patterns and microstructural features.

**KEY WORDS:** Graphene Oxide, Cement Mortar, Compressive strength, Cementitious matrix.

## CHAPTER 8

### CONCLUSION

The level of increase in compressive strength and the reduction in porosity were strongly correlated. The addition of GO reduced the influence of ITZ on the compressive strength. By considering the micro features of ITZ, the accuracy of prediction at macro level would be significantly improved for cementitious materials.

Basic on the experimental work, it can be concluded that;

Graphene oxide is easy to process; it is dispersible in water and other solvent

1. For 0.06% replacement the compressive strength obtained after 28 days of curing at an increment rate. The increment of compressive strength could be due to development of hydration crystals. And decrease in strength at 0.08% could be due to agglomeration.
2. The Split tensile test of conventional Concrete is  $2.51\text{N/mm}^2$  up to 0.06% of replacement in grapheme oxide there is increase in split tensile test, the test result shows for 28days. The increment is split tensile strength that 0.06% could be due to inter layer bonding between GO sheets.
3. Addition of Graphene Oxide enhance the strength of concrete. The 7 days, 14days, 28days of compressive strength and split tensile strength were maximum at 0.04% GO over and above this dosage both the strengths tends to decrease this could be due to the dispersion and agglomeration of GO flakes.

## ABSTRACT

The plausibility of involving a minimal expense very hydrophobic powder as water opposing admixture or water-repellent surface covering for concrete has been examined. The powder was delivered from paper slop debris (PSA), a result from the production of reused paper. The impact of hydrophobic PSA on functionality, strength and transport properties, including sorptivity, water retention, diffusivity, penetrability and electrical conductivity is accounted for. Tests were ready at water/cement proportion of 0.4, relieved as long as 28 days and adapted at 50 centigrade to steady mass before testing. It was observed that supplanting Portland concrete with 10% hydrophobic PSA diminished water assimilation, sorptivity and conductivity by 84%, 86% separately, with no major hindering consequences for hydration, strength and thickness. At the point when utilized as a surface covering, the hydrophobic PSA diminished both retention and sorptivity by 85 almost 100% relying upon the glue utilized. Tests surface covered with hydrophobic PSA showed fantastic water repulsing and self-cleaning characteristics. The water contact point depends on drop in the outer layer of hydrophobic cement.

Keywords:- Hydrophobicity, quartz, contact angle(CA), Water-repellency, Nanoparticles

## CHAPTER - 6

### CONCLUSION

- ✓ This study analyzed the impact of a super-hydrophobic powder got from squander paper sludge ash(PSA) on a scope of properties of glues and cements at water/concrete proportion of 0.45 and restored for as long as 28 days.
- ✓ The point was to decide the attainability of the super-hydrophobic PSA as an indispensable water-opposing admixture or as water-repellent surface covering for concrete.
- ✓ Super-hydrophobic PSA is exceptionally compelling at diminishing both the sum and pace of fine water assimilation. Incomplete supplanting of concrete with 10% super-hydrophobic PSA and 10%.
- ✓ Quartz diminished water ingestion in concrete by 83-84% and diminished sorptivity by 83-86% comparative with the control concrete ready at a similar water/concrete proportion, relieving age and molding system.
- ✓ Electrical conductivity was diminished by up to 85% in light of the decreased inner dampness content. These impacts expanded with an expansion in PSA content.
- ✓ Examination with information from the writing recommends that the presentation of the super-hydrophobic PSA is comparable/better than many water-opposing admixtures and surface medicines.
- ✓ The super-hydrophobic PSA is likewise ready to diminish sorptivity past the level that can be accomplished by a low w/c proportion, delayed restoring or joining of receptive pozzolans.
- ✓ The utilization of the solidifying assurance materials with substantial blend affects concrete porousness, where the retention of water has decreased emphatically. All admixtures contents reduced concrete porousness yet with various viability.
- ✓ Two percent expansion of the fluid material edge partner upgraded compressive strength, showing better dispersion of watery material in the combination. Despite the moderate decrease in strength due to the addition of cementitious admixture, the pace of solidarity gain was significantly higher.

## Hydrophobic Concrete By Using Waste Paper Sludge Ash

---

- ✓ For instance, 2% cementitious admixture to concrete gave a lift to strength values from day 7 to day 28, where an increment of 37% in strength was accomplished in that period. Though untreated concrete accomplished an increment of 11% during the same period.
- ✓ In general, treating concrete with a grouping of 2% admixture gave ideal execution as far according to meability, and it diminished water assimilation rate to an almost of 0. 81% of the 28-day control strength was accomplished by adding 2% of material LYN-1 to the substantial blend, which makes this extent of admixture the best one regarding this situation of strength.
- ✓ This material has likewise exhibited preferred supportive of section over fluid hydrophobic admixture. Regardless of expanding the functionality of concrete when adding a high rate (8%) of hydrophobic admixture, neither isolation nor warm breaking has taken place.
- ✓ The aimed to transform a porous, hydrophilic cement mortar surface into a hydrophobic surface by chemical modification.
- ✓ Producing a hydrophobic coating with a mortar. The WCA of the hydrophobic coating was  $140^{\circ}$ , and it had good water proofing and wear resistance.
- ✓ Provide durable repairs that will last for long period of times. Strength is same as that of ordinary cement.
- ✓ Sets and hardens fast, normally three minutes after being mixed with water. Setting time is fast, hardens fast, thus it can be painted within one hour of it being applied.

## ABSTRACT

In present days, Concrete is the most widely used structural material for all types of construction. Concrete plays a vital role in the development of infrastructures. Typical concrete mixtures are comprised of water, sand, cement and an aggregate of rock. This project focuses on the coarse aggregate in concrete. Due to required strength properties, long life and sustainability the use of concrete is increasing day by day but for effective utilization of concrete, the required properties has changed along with the technological advancement. This research was conducted to study the possibility of utilizing the crushed over burnt bricks as an aggregate that can be used in the place of natural stone aggregate. And this project presents the effects of Jhama class brick inclusion on the mechanical properties of concrete mix in the hardened state properties. Over brunt bricks are produced by burning the raw materials along with good quality bricks. Due to its distorted shape, over brunt bricks are considered as a source of aggregate. Jhama bricks are solving the problem of shortage of aggregate. The compressive strength and split tensile strength of the concrete is the major concern of this study by replacing the natural aggregate through crushed over burnt brick aggregate. The varying percentage replacement of coarse aggregate by Jhama bricks as 20%, 40%, 60% and 80% respectively. Trail mixes were prepared using the crushed over burnt bricks in place of coarse aggregates for M30 concrete to study compressive strength and split tensile strength. For 40% of the time, the compressive strength and tensile strength is at its maximum

# AN EXPERIMENTAL STUDY ON ECONOMICAL CONCRETE BY PARTIAL REPLACEMENT OF COARSE AGGREGATE WITH JHAMA BRICK AGGREGATES

---

## CHAPTER 10

### CONCLUSION

Based on the results of the experiments, the following conclusions were reached:

- The compressive strength of conventional concrete is  $38.5 \text{ N/mm}^2$  up to 40% partial replacement of Jhama brick aggregate, as the test results reveal for 28 days, and it lowers at 60% partial replacement of Jhama brick aggregates.
- split tensile strength of conventional concrete is  $4.8 \text{ N/mm}^2$  up to 40% of partial replacement of Jhama brick aggregate there is an increase of strength, as the test result shows for 28 days & it decreases at 60% replacement of Jhama brick aggregates.
- So present experimental study concludes that **20% & 40%** replacements can be considered as the optimum percentage replacement of coarse aggregate with Jhama brick aggregate is preferred.

## ABSTRACT

This paper presents the comparative study of basalt fiber and baryte powder on compressive, split tensile and flexural strength of the M30 Grade concrete. The baryte powder is to be mixed in the concrete by the composition of 2.5% to 10% of the total weight of cement in concrete. The basalt fiber is to be mixed in the concrete by 1%, 1.5%, 2% of the total weight of cement in concrete. Basalt is a fiber it will be divided from volcanic rock. Basalt is quarried, crushed and washed and then melted at 1500° C. Basalt fiber has higher working temperature and has a good resistance to chemical attacks, impact load and fire resistance. Barite is a mineral containing barium sulfate. It has a specific gravity of 4.3-5. The barium sulfate barite takes its name from the Greek word berries, which means heavy a reference to its high specific gravity. Barite crystals are colorless, white, light shades of blue, yellow, grey. Glass, Carbon and polyamide fibres are commonly used in manufacturing of reinforcing bars for concrete applications. Recent development in fibre production technology allows the making of basalt fibres which is made from basalt rock. This technology mainly developed in USSR. Basalt fibre have properties such as good range of thermal performance, high tensile strength, good electromagnetic properties, inert nature; and resistance to acid, radiation, UV light, vibration and impact loading. This paper discusses about their mechanical properties of the concrete. The basalt fibres manufactured mainly in Eastern Europe, Russia and USA, now in Israel and China. Finally, it is concluding that this is low-cost material and possible to manufacture in India also because large availability of basalt rock (nearly 5, 00,000 sq. km).

**Keywords:** concrete, compressive strength, split tensile strength, flexural strength, cement, curing

**Chapter - 6**

**6.CONCLUSION.**

1. In the current investigation, 1 %, 1.5%, and 2%, barite powder are used to partially replace cement. 2.5 %, 5%, and 7.5% barite powder are also included.
2. The influence on compressing, breaking tensile and bending strength of concrete M30 is investigated by combining barite powder and basalt fibers.
3. The testing of concrete samples and the combined application for material characteristics of Barite powder and Basalt fibres.
4. Curing was performed at ages 7, 14, and 28 days, with compression, break tensile, and flexure tensile measures performed at 28 days.
5. The mix proportion of concrete using 1 percent basalt fiber replaced along with 2.5 percent barite powder with the cement improves the mechanical properties of concrete, whereas using 1.5 percent basalt fiber replaced along with 5 percent barite powder increases the mechanical properties of concrete, i.e., compressive strength, split tensile strength, and flexural strength. The overall partial replacement of fibers with cement material is 2%. More than 2% of fibers used in mix construction to reduce the mechanical properties of concrete.
6. In the current study, incorporating barite powder and basalt fiber into concrete improves its mechanical properties.

## CONCLUSION

A construction procedure of a hybrid PV-wind energy system with battery was presented. The outlined technique defines optimum hybrid energy system configuration and control criteria. It needs sliding mode control strategy to get the power tracked in the PV and wind power generation. The simulation results are discussed here and the results prove that the proper tracking of MPPT using the sliding mode control.

## VOLTAGE SAG ENHANCEMENT OF GRID CONNECTED HYBRID PV-WIND POWER SYSTEM USING BATTERY AND SMES BASED DYNAMIC VOLTAGE RESTORER

### CONCLUSION

In this paper, a voltage sag enhancement of sensitive load which gets power from grid connected PV-wind power system is demonstrated using HES based DVR. The proposed DVR targets to protect the sensitive load from being affected by any voltage fluctuation which arise either from fault condition or unstable power output of PV-wind system. The control and operations of BES and SMES devices is developed by observing voltage condition of the grid at the PCC and the SOC levels of battery and SMES. In addition to this, for full realization of the proposed DVR system the control and operation of the VSC is developed by observing the voltage level at the PCC. The pre-sag compensation strategy is selected based on the capability of both magnitude and phase jump restoration. Based on the conditions, three operating states of the HES based DVR are defined, which are normal (idle state), charging state and discharging state. The effectiveness of the proposed operating states has been demonstrated in realistic cases. In the simulation, different voltage sag depth scenarios are considered for both symmetrical and asymmetrical voltage imbalances and the HES based DVR works well. A combination of voltage sag, voltage swell and harmonics scenarios will be demonstrated in the future works.

## POWER FLOW CONTROL STRATEGY BASED ON THE VOLTAGE VECTOR DISTRIBUTION FOR A DUAL POWER ELECTRIC VEHICLE WITH AN OPEN END WINDING MOTOR DRIVE SYSTEM

---

### 6.1 CONCLUSION

The proposed voltage vector distribution strategy is based on the analyses of the overlapping area of the two inverters' modulation ranges. The interaction of the two inverters' modulation capability is considered comprehensively. Every vertex and every side of the feasible region of the voltage vector distribution is covered so that this feasible region is fully utilized and the range of power sharing between the two inverters is maximized.

The wide usage of basic and saturated voltage vectors lowers the inverter switching frequency and relieves the defect of high inverter loss of the dual inverter configuration. By programming the power flow properly, this system can also handle the energy management between the two power sources in electric vehicles. The dual-inverter open winding drive system with two isolated power sources could be a competitive candidate for electric vehicle applications.

A Decentralized Dynamic Load Allocation Strategy for Fuel Cell/Supercapacitor-Based APU of Large Electric Vehicles

---

## 7. CONCLUSIONS

A decentralized dynamic load allocation strategy was proposed for FC/SC-APU to be used in large electric vehicles in this project. The proposed strategy adopts a mixed droop control strategy, which uses a VRD for the Fuel Cell unit and an AVID for the SC unit. With the proposed control, the load power can be automatically split into low and high frequency PWM pulses and allocated to the Fuel Cell and SuperCapacitor units respectively. Depending upon the number of charges present in Supercapacitor (It can be known through 'State of Charge' range) load allocation will be done. No communication and common signals are needed in the implementation, which indicates high flexibility and scalability.

## CHAPTER 6 CONCLUSION

Through the connecting of the phases to a series of capacitors, the diode clamped inverter delivers various voltage levels. By increasing the number of capacitors, the principle may be extended to any number of levels. Two capacitors are connected across the dc bus, resulting in one more level, limiting this design to three levels. Because the extra level was the dc bus's neutral point, the name "neutral point clamped inverter" was coined. The neutral point is not accessible when there are an even number of voltage levels, thus the term many points clamped is used. The diode clamped inverter implementation has been restricted to three levels due to capacitor voltage balancing problems. The three-level inverter has become widely utilised in industrial applications as a result of recent technological advancements.

## ABSTRACT

XY Plotter is an embedded system that works based on the principle Computer Numerical Control. XY Plotter basically works with two stepper motors and a servo motor, wherein the robot plots the input given from the computer on the drawing board using ATMEGA328p microcontroller on a open-source physical computing platform Arduino. The XY plotter has a two axis control and a special mechanism to raise and lower the pen. Each axis is powered and driven by using an Arduino compactable driver A4988.

The plotter works more efficiently, which is used to recording or plotting two dimensional data on a rectangular coordinate system. In this, Arduino compatible main board with two stepper motors for ease moving of pen holder and servo motor is used to lift the pen. For this we are using the software like Arduino IDE software and G code converter. This improves the efficiency which produces large and complex drawings.

# CHAPTER – 5

## CONCLUSIONS

### 5.0 EXPERIMENT AND RESULT

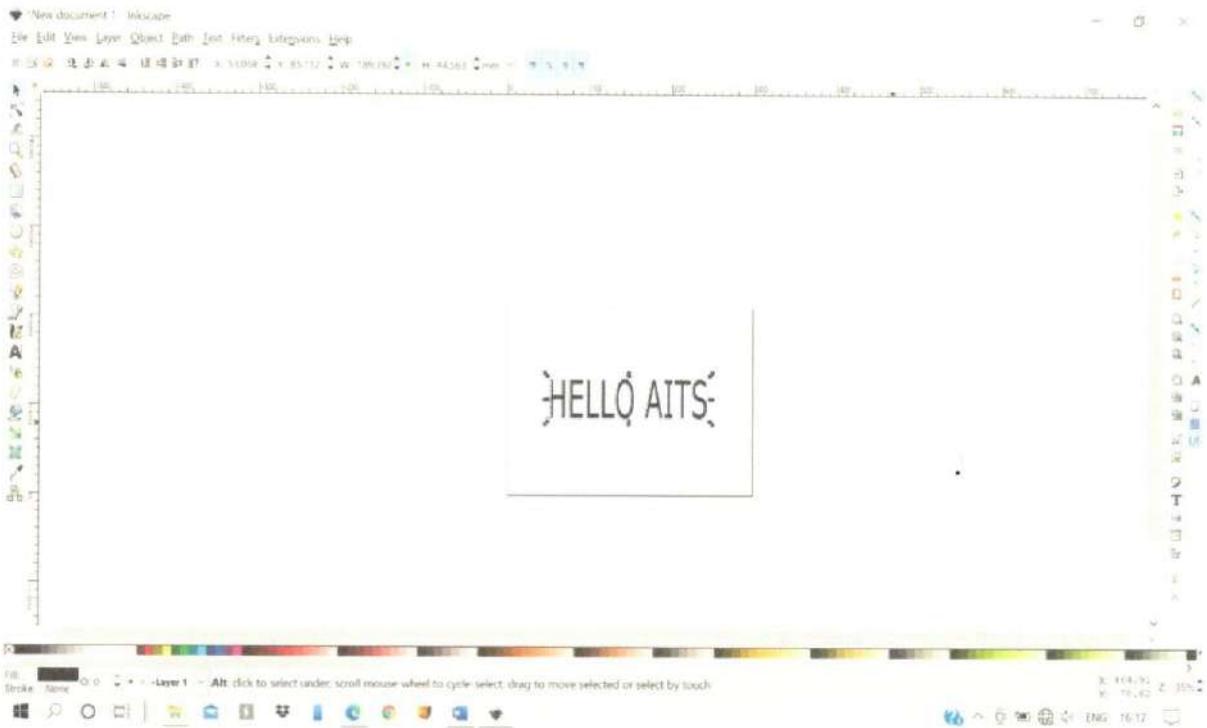

Fig 5.1: INKSCAPE INTERFACE

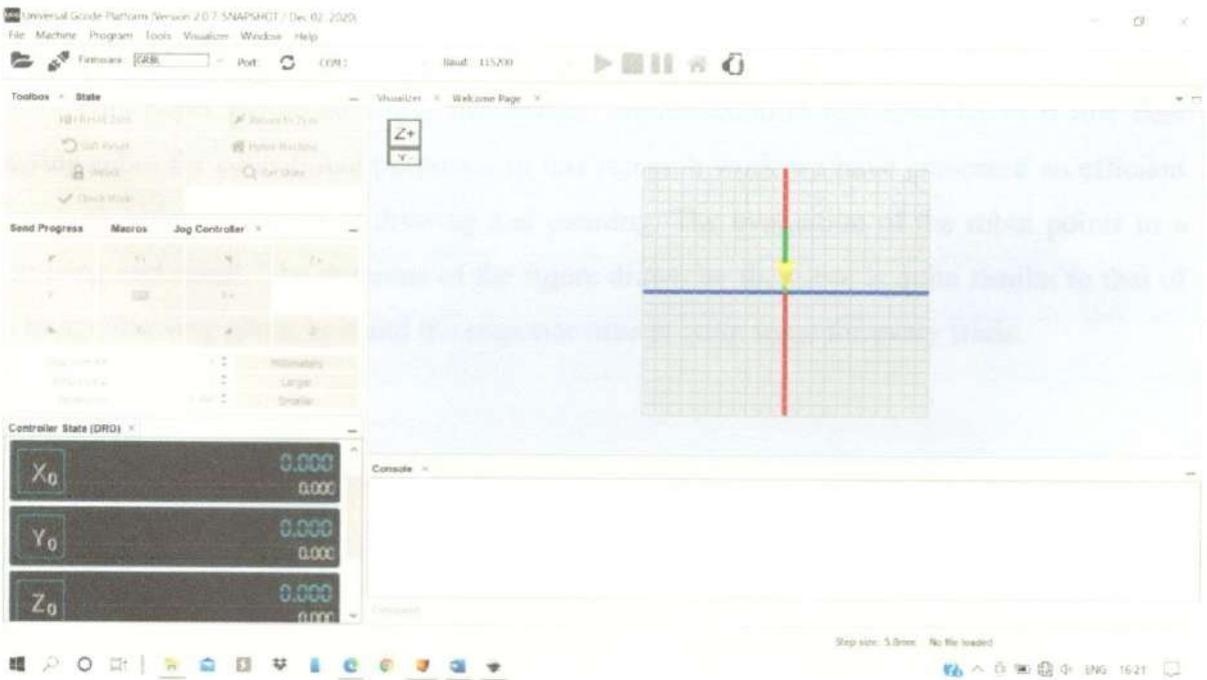

Fig 5.2: Visualization of drawing in UGS

The images to be drawn by the robot is first drawn/imported using Processing software. Then it is converted G-code file. This can be done using the extension that we added to the Processing Software (Inkscape). Processing Software can also be used to control the servomotor for pen up and pen down motion. Here you can adjust the x axis and y axis speed.

Also, we can adjust the servo rotation angle. The grbl library generated is uploaded into Arduino. With the help of Universal G-code sender the COM port and appropriate baud rate can be selected. The drawing robot is adjusted to origin using machine control. We can also see how much time it will take to complete drawing our image as shown in Fig 5.1.

## **5.1 FUTURE WORKS**

Our future work is aimed at increasing the efficiency of the robot by improving its performance. We wish to incorporate image processing tools into the robot to make the robot capable to draw photos by taking input from camera. We aim to investigate haptic technologies that could be incorporated into the robot so that the system could produce 29 drawings simultaneously when the person makes it on a canvas. In addition, we would like to explore the capabilities of the system to function effectively to audio signals provided to it. This would enable the physical challenge students to make optimal use of this robot. The system has large scope for innovations.

## **5.2 CONCLUSION**

This paper discusses about the design, implementation and analysis of a low cost drawing robot for educational purposes. In this research work we have presented an efficient robot with unique abilities of drawing and painting. The evaluation of the robot points to a promising end result. The outcome of the figure drawn by the robot is quite similar to that of the image/drawing given to it and the response time is quite same for every trials.

# CHAPTER-6

## CONCLUSION:

Metal matrix composites are now getting more applications in various fields. But main problem associated with MMC's is we unable provide economical manufacturing and at all quality requirements because of their higher hardness. This project discussed about how to overcome such problems. Al6063 and Al6063/1%SiC /1%Boron carbide were taken as work pieces which are providing same hardness. Results shows that carbide particles in MMC's provides efficient manufacturing and economical manufacturing by attaining high material removal rate (MRR) and low surface roughness (Ra). We are also taken two different tools that are HSS tool and carbide tool. From the results we can say that the effect of type of tool in machining is limited.

A Taguchi method was proposed to study the optimization of CNC drilling process parameters. Surface roughness, material removal rate are selected as quality targets. Sixteen experimental runs based on orthogonal arrays were performed.

GRA optimization technique was applied to find optimum experimental run and most influencing parameters on machining of MMC's. From GRA optimum experimental run was sixteenth experiment and most influencing parameters are cutting speed, work piece, feed, tool respectively.

The contributions of input parameters on individual response are identified by GRA. From GRA surface finish and material removal rate, are mostly affected by cutting speeds, depth of cut.

Taguchi method of experimental design has been applied for optimizing multi-response process parameters. Feed is the most influencing parameters for material removal rate which is followed by depth of cut and cutting speed. Aluminium 6063 by addition of silicon carbide, boron carbide and fly ash. The process of fabrication composite material is prepared by using stir casting method. The addition of silicon carbide 1%, boron carbide 1% and Fly ash 1% with aluminium increasing percentage ratio the mechanical properties of composite material is enhanced. So it is clear that the effect of silicon carbide, boron carbide and fly ash were helpful to increasing properties of pure aluminium by addition. By using taguchi design L-16 orthogonal array we are going to conduct experiments based on design of experiment and we are going to identify which will affects more by using GRA. Results from taguchi method exactly matches with ANOVA and TOPSIS confirmation test results are also matched with the predicted results.

## ABSTRACT

In agriculture sector, spraying of pesticides and weed removal process is an important task to protect the crops from insects for obtaining high yield. However, farmers have been using conventional techniques like hand operated and fuel operated fuel system for spraying pesticides which is very expensive. For hand operated spray systems man power required is more and the efficiency will be low. The use of solar energy systems is an alternative technique for these limitations.

This invention is about a Multi- purpose Solar Sprayer, which is used as a pesticide sprayer and weed remover. It consists of a solar panel, wheel cart, pesticide storage tank, suction pump, battery(12V) .It can be operated by a single person, which is very light and simple in operation.

Multi purpose solar sprayer can be efficiently used with less man power. Considering the economical conditions, cost of the equipment is decreased by RS.7000/-when compared with power sprayer.And it has 2 to 3 years more life than the power sprayer. The emission is also reduced and it has less maintenance cost. This new technique with multi purpose operations is more advantageous for the farmers reducing time and labour cost.

## CHAPTER 6

### RESULTS AND CONCLUSION

#### 6.1 COMPARISION OF POWER SPRAYER & MPS SPRAYER

Table 6.1: Comparison with power sprayer

PARAMETERS	POWER SPRAYER	MPS SPRAYER
COST	RS. 15000/-	RS.8000/-
TYPE OF FUEL	PETROL	SOLAR POWER
POLLUTION	MORE	LESS
NOISE	MORE	LESS
MANUFACTURING	DIFFICULT	EASY
ALTERNATE SOURCE OF POWER	NO	ELECTRICITY
MAINTENANCE COST	RS.100/- PER LITRE OF PETROL	LESS
FABRICATION & MATERIALS	DIFFICULT & HEAVY MATERIALS ARE USED	SIMPLE & LIGHT MATERIALS ARE USED
LIFE	2 TO 3 YEARS	4 TO 5 YEARS

#### 6.2 CONCLUSION:

Multi-purpose of solar sprayer with improved suction have been designed successfully for the village farmer who cannot afford money and utilize of non-conventional energy resources quickly depleting petroleum products.

Finally, the efficiency obtained could be further improved by increasing efficiency of the solar energy and selecting suitable material, We also take this opportunity to which our heart full thanks to all those persons who gave their support and encouragement during the course of project.

## **Abstract:**

This project introduces a mixed-logic design method for line decoders, combining transmission gate logic, pass transistor, dual-value logic and static CMOS. Two novel topologies are presented for the 2-4 decoders: a 14-transistor topology aiming on minimizing transistor count and power dissipation and a 15-transistor topology aiming on high power-delay performance. Both a normal and an inverting decoder are implemented in each case, yielding a total of four new designs. Furthermore, four new 4-16 decoders are designed, by using mixed-logic 2-4 pre decoders combined with standard CMOS postdecoder. All proposed decoders have full swinging capability and reduced transistor count compared to their conventional CMOS counterparts. Finally, a variety of comparative simulations at the 65 nm shows that the proposed circuits present a significant improvement in power and delay, outperforming CMOS in almost all cases.

## **Chapter-8**

### **CONCLUSION**

A proficient blended presence of mind format for decoder circuits, consolidating TGL, DVL and static CMOS. By the utilization of this procedure, we advanced 4 new 2-4 line decoder geographies, especially 2-4LP, 2-4LPI, 2-4HP and 2-4HPI, which give diminished semiconductor matter (therefore surely more modest arrangement place) and ventured forward strength-defer by and large execution corresponding to standard CMOS decoders. Besides, 4 new 4-16 line decoder geographies had been offered, especially four-16LP, four-16LPI, four-16HP and four-16HPI, discovered with the guide of utilizing the utilization of the blended sound judgment 2-four decoders as pre-decoding circuits and blending them in with post-decoders applied in static CMOS presence of mind. These plans coordinate the ventured forward generally speaking execution attributes of by-skip semiconductor good judgment with the reestablishing usefulness of static CMOS. A sort of relative zest recreations changed into executed on the 32 nm, confirming, in greatest cases, a specific addition in pick of the proposed plans. The 2-4LP and four-16LPI geographies are commonly proper for programs wherein spot and strength minimization is of number one concern. The 2-4LPI, 2-4HP and 2-4HPI, notwithstanding the relating four-sixteen geographies (four-16LP, four-16HPI, four-16HP), end up being conceivable and all-round green plans, consequently they can accurately be utilized as developing squares withinside the format of enormous decoders, multiplexers and distinctive combinational circuits of different by and large execution prerequisites. In addition, the offered diminished semiconductor matter and espresso strength characteristics can acquire each mass CMOS and SOI format also. The got circuits are to be applied on design level, making them suitable for general mobileular libraries and RTL format.

## ABSTRACT

In processors the complex and challenging operations are needed to be handled to overcome the demands, which lead to an increase in processor cores. In this paper, propose an approximate multiplier that's high speed yet energy efficient. The approach is to round the operands to the closest exponent of two. This way the machine intensive neighborhood of the multiplication is omitted up speed and energy consumption. The potency of the planned multiplier is evaluated by comparing its performance with those of some approximate and proper multipliers using different design parameters. In this proposed approach combined the conventional RoBA multiplier with parallel prefix adder. The results revealed that, in most (all) cases, the newly designed RoBA multiplier architectures outperformed the corresponding approximate (exact) multipliers. Thus improved the parameters of RoBA multiplier which may be utilized in the voice or image smoothing applications within the DSP. These type of multipliers were designed and specified using VHDL and have been synthesized and simulated using Xilinx ISE project Navigator v.14.7 platform and then compared with the parameters like delay, area (Number of sliced LUT's and Number of bonded IOB's).

## CHAPTER 8

### CONCLUSION

In this study, we propose the RoBA multiplier, a high-speed yet area-efficient approximate multiplier. The proposed multiplier was based on rounding the inputs in the form of  $2^n$  and had a high accuracy. The computationally costly section of the multiplication was omitted in this fashion, resulting in improved speed and energy usage at the cost of a small error. Both signed and unsigned multiplications could be solved using the proposed method. The suggested RoBA multiplier has a computational path delay of 21.41ns by this we can reduce delay 93 percent. And also we can reduce the area 82 percent compared to existing method. Three hardware implementations of the approximation multiplier were presented, one for unsigned operations and two for signed operations. The proposed multipliers' efficiency were assessed by comparing them to the efficiencies of some exact and approximate multipliers with varying design parameters. The results showed that the RoBA multiplier architectures beat the comparable approximation (exact) multipliers in the vast majority (all) of circumstances.

## ABSTRACT

Cracks in cylindrical concrete structures can be indicators of important damages and may significantly affect durability. Their timely identification can be used to ensure structural safety and guide in-time maintenance operations. Structural health monitoring solutions, such as strain gauges and fiber optics systems, have been proposed for the automatic monitoring of such cracks. However, these solutions become economically difficult to deploy when the surface under investigation is very large. Air coupled sensor are used to measure surface wave transmission across surface breaking cracks in the cylindrical concrete. So, air coupled ultrasonic sensors are used to detect propagating cracks within the cylindrical concrete. The accuracy of the detected onset of the crack is evaluated with the nondestructive testing methods such as acoustic emission and Digital Image Correlation. Crack propagation can be detected by using air coupled sensor. By using this technique we can blast the mountains without any damage, this technique is also helpful for demolition of old building without causing any damage.

In this work we are introducing a project that aims in designing crack detection scheme (CDS) using ultrasonic Sensor. This avoids the vehicle accidents by detecting the cracks on bridge tracks. And also capable of alerting the authorities in the form of SMS messages along with location by using GPS and GSM modules. The system also includes distance measuring sensor which displays the track deviation distance between the two tracks. This will save several vehicles in India from unwanted damages from the bridge track.

## CHAPTER-5

### 5. CONCLUSION AND FUTURE SCOPE

In this study, we created a low-cost, low-power embedded technology to help improve safety standards for cylindrical concrete by preventing cracks and impediments on concrete and buildings. The testing crack prototype can identify fractures and impediments on buildings and cracks quickly. The findings indicate that this new creative technology will improve the dependability of car safety systems. By incorporating these characteristics into real-time applications, we can reduce accidents by up to 70%. The suggested crack identification method is separated into three major components: shading correction in the source pictures, crack identification, and mapping. The median filter is used extensively in the first stage of preprocessing. It is involved with picture processing, accentuating fracture pixels while removing background values. The second phase of the detection processing is based on probabilistic relaxation. Furthermore, to avoid noise creation during automatic detection, we used probabilistic relaxation. Then, to detect cracks precisely, an improved locally adaptive thresholding was implemented.

Although more may be done to improve the speed of automated crack detection. Enhancements can also be made to improve accuracy in determining the location of the problem. For example, when bridge tacking, the vehicle's weight can be used to assess track shiftiness, i.e. stress and strain parameters of the track, making this technique more effective.

## ABSTRACT

Since there is many advancement in VLSI technology and there are many efficient styles of designing VLSI circuits. Some of the styles are CMOS, PTL, GDI (Gate Diffusion Input) techniques. GDI technique helps in designing low-power digital combinatorial circuit by which we can eradicate demerits of CMOS, PTL techniques. This technique allows reducing power consumption, propagation delay, and area of digital circuits while maintaining low complexity of logic design. The different methods are compared with respect to the layout area; transistor count, delay, and power dissipation.

Domino logic circuit techniques are extensively applied in high-performance microprocessors due to the superior speed and area characteristics of dynamic CMOS circuits as compared to static CMOS circuits. High-speed operation of domino logic circuits is primarily due to the lower noise margins of domino circuits as compared to static gates. Domino logic offers speed and area advantages over conventional static CMOS and is especially useful for implementing complex logic gates with large fan-outs.

GDI(Gate Diffusion Input) - a new technique of low power digital circuit design is described. This technique allows reducing power consumption, delay and area of digital circuits, while maintaining low complexity of logic design. Performance comparison with traditional CMOS and various PTL design techniques is presented, with respect to the layout area, number of devices, delay and power dissipation, showing advantages and drawbacks of GDI as compared to other methods.

**KEYWORDS:GDI,DOMINO LOGIC,PTL,CMOS**

## CHAPTER VII

### CONCLUSION AND FUTURE SCOPE

#### 7.1 Conclusion and future scope

In this paper using GDI and domino logic techniques we have implemented some basic logic gates and four bit hybrid full adder circuit. The fundamental reason for this paper is to execute the circuits by utilizing GDI and domino rationale procedures in CMOS innovation which serves to diminishes the semiconductor count, area of advanced circuits, suitable for quick plan and for high velocity operations. Domino circuits offers the upsides of quicker changes and glitch free operation. the reproduction was completed utilizing standard devices with 45nm innovation.

## ABSTRACT

A cloud platform gives consumers access to shared data storage. Validating data efficiently is required to ensure shared data integrity. The integrity of shared data is verified using an audit technique that allows group members to edit data, although this technique results in complex calculations for the group members. The designated agent's audit methodology uses a lightweight calculation for group members, but it ignores the security vulnerabilities that exist between group members and agents. A lightweight secure auditing technique for shared data in cloud storage (LSSA) is suggested using Hashgraph technology and a Third Party Medium (TPM) management method, which results in group security management as well as a lightweight calculation for group members. Meanwhile, to improve agent security, a virtual TPM pool is created by combining Transmission Control Protocol (TCP) sliding window technology and interconnected functions. We test our scheme using numerical analysis and experiments, and the results show that it achieves lightweight computing for group members while also ensuring data verification for security.

## 9. CONCLUSION

In this project, we proposed a provable shared data possession for a lightweight and security audit process in cloud storage. By introducing a Hashgraph, the traceability of group membership is achieved, and the illegal behaviours of group members can be contained through Hashgraph technology. By specifying multiple TPMs for calculation and management according to the TPM management strategy, each group member and each TPM are independent of one another, which ensure that the cloud data verification process is secure and achieves a lightweight calculation of the TPM. Through a security analysis, the scheme in this paper can avoid replay attacks and replace attacks while protecting the identity privacy and data privacy of group members and ensuring secure storage of the shared data. Therefore, this scheme has important significance and value for the secure storage of shared data.

## **ABSTRACT**

A person's emotional, mental, and social well-being is reflected in their mental health; it affects how a person thinks, feels, or treats a situation; Positive mental health helps individuals work productively and reach their full potential. Mental health is vital in life, from childhood through adulthood. Numerous factors contribute to mental health problems that lead to mental illnesses such as stress, social anxiety, depression, obsessive-compulsive disorder, drug addiction, work problems, and personality disorders. It is imperative that they be determined in order to maintain an adequate life balance.

We have collected data from data sets available online. The data has been tagged for better prediction. The data is subjected to various machine learning techniques in order to obtain labels. Used to build a model for predicting a person's mental health. The algorithm's accuracy is analyzed before it is used to build the model. We plan to implement classification algorithms such as Decision Tree, Random Forest and Naive Bayes. Our target group is the working class, i.e., people over the age of 18. Once the model is built, it is incorporated into a website so that you can predict the outcome based on the details provided by the user.

## 9. CONCLUSION AND FUTURE ENHANCEMENT

---

Mental fitness is an exceedingly touchy and crucial topic currently. It is crucial for dwelling a wholesome and balanced life. Mental fitness affects one's thoughts, behaviour and emotions. It can have an effect on the productiveness and effectiveness of an individual. As consistent with the look at with the aid of using WHO, despair might be a main motive of intellectual contamination with inside the global and those want to take extra care approximately their intellectual properly-being for a balanced social and expert life. People who're hesitant to method people for analysis can employ online predictors for results.

To do the prediction, we've encoded the facts first. We have then used the selection tree set of rules and skilled a model which we've used on our website. The accuracy we received with selection tree became 82% with 258 times of facts being labelled successfully out of 315 times. When the user solutions the questions about our webpage, he/she receives an opportunity in their intellectual fitness situation as properly as recommendations. Due to the accuracy, we achieved, it may be concluded that the output shows the appropriate end result and the danger of the contamination being misclassified is minimal.

### Future Work:

In the future, we are able to create a machine which predicts a selected intellectual infection that someone suffers from, but large facts series wishes to be finished for it.

# ABSTRACT

## TABLE OF CONTENTS

This paper provides an overview about how to predict house costs utilizing different regression methods with the assistance of python libraries. The proposed technique considered the more refined aspects used for the calculation of house price and provide the more accurate prediction. It also provides a brief about various graphical and numerical techniques which will be required to predict the price of a house. This paper contains what and how the house pricing model works with the help of machine learning and which dataset is used in our proposed model.

2.1 HOUSE PRICE FORECASTING USING DATA MINING 72  
2.1.1 MODULES

2.2 HOUSE PRICE PREDICTION FORECASTING AND RECOMMENDATION SYSTEM USING MACHINE LEARNING

2.3 TYPES OF MACHINE LEARNING ALGORITHMS

2.3.1 LEARNING WITH PYTHON

CHAPTER 3 SYSTEM ANALYSIS

3.1 EXISTING SYSTEM

3.1.1 DISADVANTAGES

3.1.2 PROPOSED SYSTEM

3.1.3 ADVANTAGES

3.2 MODULES

3.2.1 DATA COLLECTION & PREPROCESSING

3.2.2 CLASSIFICATION MODEL

3.2.3 PREDICTION MODEL

CHAPTER 4 SYSTEM REQUIREMENTS

4.1 HARDWARE CONSIDERATIONS

4.2 SOFTWARE CONSIDERATIONS

4.3 FEASIBILITY STUDY

4.3.1 TECHNICAL FEASIBILITY

4.3.2 ECONOMIC FEASIBILITY

## 9. Conclusion & Future Enhancement

The house price data set obtained by crawlers is mostly used in this work. The updated SVM classification technique is initially used to categorise house prices after data preparation. The proposed system will predict the price of the house. The total amount of time taken for preprocessing and classification is very less. Hence SVM algorithm will work faster and give the accurate results when compared to other algorithms. Thus this work has a successful house price prediction. After the successful completion of the proposed system, the system is implemented in real time. And also, system needs to produce accuracy by increasing the size of training dataset. In the future more no. of attributes like parking space, swimming pool are added to predict the house price accurately.

## ABSTRACT

Agriculture app is a mobile application that is basically built on the idea that an app can keep a farmer updated with all the information related to crop, pesticides, insecticides, financial sector etc. It provides detailed information about which crop to grow in which season and which crop is suitable for that particular area in which the farmer is living. It also provides details regarding various banks loan rates and the current schemes provided by the government that are beneficial to farmer. The app will contain a feature in which the farmer has to select the crop sowed and then the app will automatically tell the farmer about the diseases that are prone to that particular crop. Main objective of our project is to educate the farmer on their work. Farmers are getting loss while doing their old farming techniques; those are not suitable for getting profit according to present weather conditions.

## **9. CONCLUSION & FUTURE ENHANCEMENT**

In this project I even have concluded that confirms that consistent knowledge about farms results in optimal decisions. An efficient Novel Approach for Crop Management system can handle farm data in such how that results are orchestrated to deal with customized solutions for every farm. This aid for farmers within the sort of digital solutions combines forces. After thirty years of great expectations-and disappointments-by the appliance of robotics to agriculture, the timing seems right for the primary time. However, so as to require the foremost advantages from Agriculture.

### **FUTURE ENHANCEMENT:**

- With this project we plan to enable a farmer to step into a replacement reality, where he becomes an actual "node in farming in android".
- Farming includes crop, livestock, poultry, fish, sericulture etc. a mixture of 1 or more farming with cropping when carefully chosen, planned and executed gives greater dividends than one enterprise, especially for little and marginal farmers.
- Soil and climatic features of the chosen area.
- Availability of the resources, land, labor & Capital.

## **ABSTRACT:**

The end of 2019 witnessed the outbreak of Coronavirus Disease 2019 (COVID-19), which has continued to be the cause of plight for millions of lives and businesses even in 2020. As the world recovers from the pandemic and plans to return to a state of normalcy, there is a wave of anxiety among all individuals, especially those who intend to resume in person activity. Studies have proved that wearing a face mask significantly reduces the risk of viral transmission as well as provides a sense of protection. However, it is not feasible to manually track the implementation of this policy. Technology holds the key here. We introduce a Deep Learning based system that can detect instances where face masks are not used properly. Our system consists of a dual stage Convolutional Neural Network (CNN) architecture capable of detecting masked and unmasked faces and can be integrated with pre-installed CCTV cameras. This will help track safety violations, promote the use of face masks, and ensure a safe working environment.

## 9. CONCLUSION & FUTURE ENHANCEMENT

In this application, a two-stage Face Mask Detector was presented. The first stage uses a pretrained caffe model for robust face detection, after comparing its performance with Dlib and CNN. An unbiased dataset of masked and unmasked faces was created. The second stage involved training three different lightweight Face Mask Classifier models on the created dataset and based on performance, the deploy prototxt based model was selected for classifying faces as masked or non-masked. Furthermore, Centroid Tracking was added to our algorithm, which helped improve its performance on video streams. In times of the COVID-19 pandemic, with the world looking to return to normalcy and people resuming in-person work, this system can be easily deployed for automated monitoring of the use of face masks at workplaces, which will help make them safer.

### **FUTURE SCOPE:**

The current framework is assessed with various classifiers. The best framework might be carried out alongside interfacing with caution and alarming frameworks soon. This framework might be incorporated with a framework which can coordinate with a framework carrying out friendly separating which can make it a healthy framework which can welcome sensational effect on the spread.

In the wake of playing out the underlying examination, the framework orders each individual as "wearing a veil" or banners as "not wearing a cover" and sends a moment alert, so you can make a further move — dispatch a public sound declaration, send a custom message to a computerized screen, or a customized message to the individual's telephone.

## **ABSTRACT:**

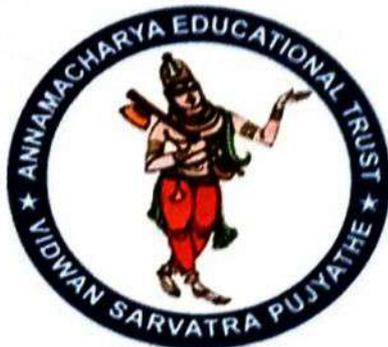

Stroke is the number one leading cause of mortality and obesity in many countries. This study pre-processing data to improve the image quality of CT scans of stroke patients by optimizing the quality of image to improve image results and to reduce noise, and also applying machine learning algorithms to classify the patient's images into two sub-types of stroke disease, namely ischemic stroke and stroke haemorrhage. Eight machine learning algorithms are used in this study for stroke disease classification, namely K-Nearest Neighbours, Naive Bayes, Logistic Regression, Decision Tree, Random Forest, Multi-layer Perceptron (MLP-NN), Deep Learning and Support Vector Machine. Our results show that Random Forest generates the highest level of accuracy (95.97%), along with precision values (94.39%), recall values (96.12%) and f1Measures (95.39%).

## **CONCLUSION:**

This study uses machine learning algorithms to classify stroke data on CT Scan image data. Before classification, image processing and feature extraction are performed on image data. And after that the comparison of 8 (eight) algorithms is used to do the classification, namely: K-Nearest Neighbors, Naive Bayes, Logistic Regression, Decision Tree, Random Forest, Multi-layer Perceptron (MLP-NN), Deep Learning and Support Vector Machine. Based on our experiment, classification algorithm using the Random Forest method has the highest level of accuracy compared to other tested classification algorithms. However, the accuracy of classification method using optimization default parameter value has not been carried out. Henceforth there is a possibility for the classification model to be improved to achieve. Parameter tuning needs to be done to machine learning algorithm used to increase its accuracy.

## **Abstract**

Schnorr signature is a digital signature produced by the Schnorr signature algorithm that was described by Claus Schnorr. Signatures prevent forgeries, infeasible to sign a message without knowledge of key. There has been a lot of hype about Schnorr signatures lately. The reason being that the patent expired few years ago and numerous people are working on using them instead of ecdsa.

The Elliptic Curve Cryptography (ECC) is modern family of public-key cryptosystems, you can use an Elliptic Curve algorithm for public/private key cryptography. To be able to use ECC; cryptographic signatures, hash functions and others that help secure the messages or files are to be studied at a deeper level.

It implements all major capabilities of the asymmetric cryptosystems: Encryption, Signatures and Key Exchange The main advantage is that keys are a lot smaller. With RSA you need key servers to distribute public keys. With Elliptic Curves, you can provide your own public key.

In python, the above described method can be implemented using the library fastecdsa. However, there are many more libraries written to use for elliptic curve cryptography. We use python IDE for coding.

Implementation of Schnorr digital signature has to be done to every document using Elliptic curve cryptography. Later the documents are to be verified by creating a platform where it shows the status of any document, whether it may be successfully secured or not. Schnorr signatures are both a fairly simple signature scheme yet very powerful at the same time.

## 9. CONCLUSION

Elliptic Curve Digital Signature Algorithm (ECDSA), one of the Elliptic Curve Cryptography (ECC) variants proposed as an alternative to established public key systems such as Digital Signature Algorithm (DSA) and Rivest Shamir Adleman (RSA), has recently received a lot of attention in industry and academia. The fact that no sub exponential technique exists to solve the elliptic curve discrete logarithm problem on a well designed elliptic curve is the key reason behind ECDSA's appeal. As a result, it takes full exponential time to unravel, but the simplest approach for solving the underlying integer factorization for RSA and discrete logarithms takes only a fraction of that time. Due to the tiny key size used by elliptic curves, the key generated by the method is exceptionally secure and consumes minimal bandwidth. ECDSA uses significantly fewer parameters than competing systems like RSA and DSA, yet with comparable degrees of security. Faster computing times, lower processing power, less storage space, and more bandwidth are some of the advantages of reduced key sizes. As a result, ECDSA is well-suited to limited contexts such as pagers, PDAs, cell phones, and smart cards. These benefits are especially valuable in other contexts with limited computing power, storage space, bandwidth, or power usage.

## ABSTRACT

Intelligent Transportation Systems (ITS) research and applications benefit from accurate short-term traffic state forecasting. To improve the forecasting accuracy, this paper proposes a deep learning based multitask learning Gated Recurrent Units (MTL-GRU) with residual mappings. To enhance the performance of the MTL-GRU, feature engineering is introduced to select the most informative features for the forecasting. Then, based on real-world datasets, numerical results show that the MTL-GRU can well estimate traffic flow and speed simultaneously, and performs better than other counterparts. Experiments also show that the deep learning based MTL-GRU model can overpower the bottleneck caused by enlarging training datasets and continue to gain benefits. The results suggest the proposed MTL-GRU model with residual mappings is promising to forecast short-term traffic state.

## 11. CONCLUSION

This project proposes a deep learning based multitask model (i.e., MTL-GRU) for traffic flow and speed forecasting. Combined with feature engineering, the MTL-GRU model with residual mappings achieves the best results compared with other approaches. Then, traffic data from PeMS are used to perform numerical experiments. Meanwhile, both classic methods and state-of-the-art deep learning approaches (i.e., LSTM, Conv-GRU, GRU, TCN, and MTL-GRUOrig) are introduced as the comparison counterparts. Based on the numerical results, some useful findings are concluded.

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
0	0	0	6

**Course Objectives:**

- To make the students familiar to apply the knowledge gained from the theoretical subjects in the entire course.

Students are required to take up a project work, in which the student can choose any specific problem of industry or industry-based project work. Alternatively, it can be secondary source based or field-based project work. Before the commencement of the project work, each student is required to submit a synopsis indicating the objectives, methodology and frame work for analysis. The project should have an internal faculty has guide. The student can initiate the project work in the penultimate semester of the course

**Course Outcomes:**

At the end of the course, the student will be able to apply the various concepts in real time scenarios Blooms Level of Learning  
L3

**CO-PO Mapping:**

**PROGRAM OUTCOMES:**

1. **Management Knowledge:** Apply knowledge of Management Theories and Practices to solve Business Problems.
2. **Critical Thinking:** Foster Analytical and Critical thinking abilities for Data – based decision making.
3. **Value Based Leadership:** Ability to develop value-based Leadership.
4. **Communication and Ethics:** Ability to understand, analyse and communicate global, economic, legal, and ethical aspects of business.
5. **Multidisciplinary Environment:** Ability to lead themselves and others in the achievement of organisational goals, contributing effectively to a team environment.
6. **Entrepreneurship:** Ability to evaluate best entrepreneurial opportunities and manage start-ups in the present Business world.
7. **Social Responsiveness:** Apply ethical principles and understand the impact of the Professional management solutions in societal and environmental contexts.
8. **Life Long Learning:** Ability to engage in independent and life long learning in the context of managing unpredictable Societal and Global issues.

## INTRODUCTION

Finance is the **lifeblood** of the organization, irrespective of its size mission. Management of finance in the organization has been changing at a rapid pace after the inception of the computers in the field. In the modern phase the financial manager is not in a passive role of a scorekeeper of accounting information and arranging funds, when ever diversified to do so. Rather, he is confronted with various issues and decisions to ensure that the funds are raised economically and canalised in most effective manner.

## FINANCIAL MANAGEMENT

Financial Management emerged as a **distinct field** of study at the turn of this century many eminent persons defined it in the following ways.

### DEFINITIONS:

According the **BONNEVILLE AND DEWEY:**" Financing consists in the rising, providing and managing of all the money, capital or funds of any kind to be used in connection with the business".

According to Prof. **SOLOMAN:**" Financial Management is concerned with the efficient use of any important economic resource, namely capital funds.

### FINANCE FUNCTIONS:

It may be difficult to separate the finance functions from production, marketing, and other functions, but the functions themselves can be readily identified. The functions of raising funds investing them in assets and distributing returns earned from assets to shareholders are respectively known as.

- Long – Term Assets- Mix (or) Investment Decision
- Capital- Mix (or) Financing Decision
- Profit Allocation (or) Dividend Decision
- Short- Term Asset – Mix (or) Liquidity Decision

## **5.3 CONCLUSION**

Surya Elevators Private Ltd., over all financial performance is good. If the credit collection period could be reduced. The company has to increase the current ratio, and then only the liquid position is good. The company can perform still better to achieve good performance in all the regards than it is possible to earn more profits in future.

# CHAPTER 1

## INTRODUCTION

Finance is one the basic foundations of all kinds of economic activities. It is the master key, which provides access to all the sources for being employed in manufacturing. Hence it is rightly said that finance is lifeblood of any enterprise, besides being the scarcest elements, it is also the most indispensable requirement. Without finance neither any business can be started nor successfully run. Provision of sufficient funds at the required time is the key to success of concern. As master of fact finance may be said to be the circulatory system of economic body, making possible the needed co-operation among many units of the activity.

Working capital management or administration of all aspects of working capital, which manage the firm's current assets and current liabilities in such a way that a satisfactory level of working capital is maintained.

According to **smith** "working capital management is concerned with the problem that arise in attempting to manage the current assets, current liabilities, and the inter-relationship that exist between them".

Working capital management is concerned with the problem that arises in attempting to manage the current assets, the current liabilities and the interrelationship that arise between them.

Current assets refer to those assets, which in the ordinary course of business can be or will be turned into cash within one year. The major current assets are cash, marketable securities, accounts receivables and Inventory. Current liabilities are those liabilities, which are intended, at their inception, to be paid in the ordinary course of business, with in a year. The basic current liabilities are Accounts payable, Bills payable, Bank Overdraft and Outstanding expenses.

The goal of working capital management is to manage the firms Current Assets and Current Liabilities in such a way that a satisfactory level of working capital is maintained.

## 5.2 SUGGESTIONS

- ❖ There is a scope for the company to reduce the current assets especially debtors, and inventories to reduce the networking capital and improve the profitability.
- ❖ The company has to implement strict credit policy & procedures to collect the dues from debtors in time.
- ❖ The company has to achieve its set targets by striving for its fulfillment.
- ❖ The company has to utilize its fixed assets properly to generate sales.
- ❖ The company can make use of its financial strength to borrow and improve returns for the share holder
- ❖ Current assets and current liabilities should be efficiently utilized in order to increase the Working Capital Ratio.
- ❖ The company may follow the same level of working Capital in Future Ratio.
- ❖ To improve current assets and decrease current liabilities, stock debtors should be properly utilized.

## 5.3 CONCLUSION

- The project was aimed finally at knowing financial stages of , SHIRDI Sai Electricals Limited. Over a period of five years and it is trend over these years. A project in for three years has been made with positive results.
- The area of Finance is very sensitive and a very important area in all files with out existence of company will be a great question

## CHAPTER – I

### INTRODUCTION

#### 1.1 BACKGROUND OF THE STUDY:

Sales promotion describes promotional methods using special short-term techniques to persuade members of a target market to respond or undertake certain activity. As a reward, marketers offer something of value to those responding generally in the form of lower cost of ownership for a purchased product (e.g., lower purchase price, money back) or the inclusion of additional value-added material (e.g., something more for the same price).

Sales promotions are often confused with advertising. For instance, a television advertisement mentioning a contest awarding winners with a free trip to a Caribbean island may give the contest the appearance of advertising. While the delivery of the marketer's message through television media is certainly labeled as advertising, what is contained in the message, namely the contest, is considered a sales promotion. The factors that distinguish between the two promotional approaches are:

1. whether the promotion involves a short-term value proposition (e.g., the contest is only offered for a limited period of time), and
2. The customer must perform some activity in order to be eligible to receive the value proposition (e.g., customer must enter contest). The inclusion of a timing constraint and an activity requirement are hallmarks of sales promotion.

Sales promotions are used by a wide range of organizations in both the consumer and business markets, though the frequency and spending levels are much greater for consumer products marketers. One estimate by the Promotion Marketing Association suggests that in the US alone spending on sales promotion exceeds that of advertising.

Sales promotion is one of the four aspects of promotional mix. (The other three parts of the promotional mix are advertising, personal selling, and publicity/public relations.) Media and non-media marketing communication are employed for a pre-determined, limited time to increase consumer demand, stimulate market demand or improve product availability.

### 5.3 CONCLUSION

The sales promotions given by Honda are very unique attractive. Most of the customers are aware of the offers but the satisfaction levels of overall offers are average and need to be improved. The offers are also executed well as maximum customers have received an offer. Overall the offers given by Honda are properly communicated.

## CHAPTER 1

### INTRODUCTION

#### 1.1 BACKGROUND OF THE STUDY

Whatever may be the organization, working capital plays an important role, as the company needs capital for its day to day expenditure. Thousands of companies fail each year due to poor working capital management practices. Entrepreneurs often don't account for short term disruptions to cash flow and are forced to close their operations.

In simple terms, working capital is an excess of current assets over the current liabilities. Good working capital management reveals higher returns of current assets than current liabilities to maintain a steady liquidity position of a company otherwise, working capital is a requirement of funds to meet the day to day working expenses. So

a proper way of management of working capital is highly essential to ensure a dynamic stability of the financial position of an organization.

#### INTRODUCTION TO WORKING CAPITAL:

Companies that manage their working capital will have relatively strong profit and their shareholders have been rewarded with capital appreciation despite an overall trend of declining share prices. Others especially, commodity producers and companies whose products take cyclic demand have floundered.

Many a times, the main causes of the failure of business enterprise have been found to be shortages of current assets and their mishandling. Inside amount working capital is a serious handicap in business whereas fixed capital investment generates products companies competent and administration of current assets sales the problems of underutilization of capacitance.

A firm contains input to make a finished product, which is sold to make a profit. These sales proceeds are re-invested to make such products and generate for the profits.

The problem is, there is a lag between the time a finished product is ready and the time its sales, proceeds are realized. If a company waited till their products come in, its plant and machinery would lie this time lag, every business activity makes funds. This is its working capital, the rationale for the superior valuation. Since there is its working capital, the

## 5.2. SUGGESTIONS

1. The present study with title working capital management at Chaitanya Chemicals Rajampeta reveals some facts about the financial strengths and some areas to be studied for further effective monitoring and maintenance.
2. For this study with the help of the analysis I would like to express some useful areas of interests which can add some value to the organization; those are as follows,
3. The company is maintaining good volume of current assets at present by taking the support of this it is to recommend that planning for future courses of actions like expansion, new business adding new reach of market could help the company to reach further accomplishments.
4. As the companies working capital turnover ratio is showing fluctuating trend, it is recommended to have more vigilance and automation and
5. Chaitanya Chemicals Rajampeta. Is having good sales volume in the market further to compete with the competitors it is recommended to have quality and productive staff at concern levels.

## 5.3 CONCLUSION:

From the study, it is observed that a significant positive relationship between the length of WC and the profitability of firm in terms of return on total assets giving a strong indication to the firm manager/owners that longer the Working Capital turnover in days, lesser capital will be deployed in current assets and eventually there will be more capital investment leading towards a higher profitability of the firm. The Working Capital in terms of days and profitability in terms of return on equity appears to be negatively correlated with the firm's profitability. It means company with shorter Working Capital turnover days is more profitable than the firms with longer Working Capital. The problem of longer be the outcome of longer inventory turnover and accounts receivable turnover in terms of days

## **1.1 INTRODUCTION**

Working capital is that amount of funds which is required to carry out the day-to-day operations of an enterprise. It may also be regarded as that portion of an enterprise's total capital, which is employed in its short-term operations. This operation consists of primarily such items such as raw materials, semi-finished goods, finished goods, sundry debtors, short-term investments etc., Thus working capital also refers to all the short-term assets known necessary. There is no such a business for which working capital is not needed. The main aim every firm is to maximize shareholders wealth.

Firm must earn sufficient returns to increase the shareholder wealth. To earn steady amount of profit, a successful sales activity is necessary. Firm can generate sales if sufficient amount is invested in Current assets. The need of current assets is necessary because sales do not convert into cash immediately. There is always an operating cycle involved in the conversion of sales into cash. Working capital management is one of the most important aspects of financial management. It forms a major function of the finance manager and accountant. It is concerned with the problems that arise in attempting to manage the current assets, the current liabilities and the interrelationship that exists between them. The management of current assets is similar to that of fixed assets in the sense that in both cases a firm analyses their effects on its return and risk.

### **THEORETICAL BACKGROUND**

One of the most important areas in the day-to-day management of the firm is the management of working capital. Working capital management is the functional area of the finance that covers all the current accounts of the firm. It is concerned with management of the level of individual current assets as well as the management of total working capital. Financial management means procurement of funds and effective utilization of these procured funds. Procurement of funds is firstly concerned for financing working capital requirement of the firm and secondary for financing fixed assets.

### 5.3 CONCLUSION

The working capital management system followed by Heritage Foods India Ltd, Kasipentla works shows a satisfactory position. Proper working capital management is used to establish a cause and effect, relationship between variables to help the management in making effective strategic planning to forecast the future and take necessary steps to reach the organizational goals. Various crucial areas that need attention were identified and practical suggestions were given to improve performance.

## ABSTRACT

The learning a convolutional neural network problem of image super resolution. The term image compact-resolution, the image resolution that a visually plausible high resolution image given a low-resolution input, image provides a low-resolution version of a high-resolution image, such that the low-resolution version is both visually pleasing and as informative as possible compared to the high-resolution image. We propose a convolutional neural network (CNN) for image CR, namely CNN-CR, inspired by the great success of CNN for image SR. Specifically, we translate the requirements of image CR into operable optimization targets for training CNN-CR: the visual quality of the compact-resolved image is ensured by constraining its difference from a naively down-sampled version, and the information loss of image CR is measured by up-sampling/superresolving the compact-resolved image and comparing that to the original image. The convolutional neural network (CNN) for image compact resolution, the requirements of image capture into operable optimization targets for training image resolution, the visual quality of the compactresolved image is ensured by constraining its difference from a naively normalsampled version, and the information loss of image is measured by up-sampling/super resolving the compact-resolved image and comparing that to the original image.

## CONCLUSION

We have proposed a learning approach for image compact resolution using convolutional neural network (CNN-CR). The problem of image CR is formulated as to jointly minimize the reconstruction loss and the regularization loss. CNN-CR can be trained either separately, or jointly with a CNN for image SR. We investigate network structures and training strategies used for CNN-CR. Our experimental results show that the proposed CNN-CR outperforms simple down-sampling with a noticeable margin in terms of the reconstruction quality. The compact-resolved images look visually pleasing thanks to the proposed regularization loss. We also investigate applications of CNN-CR in low-bit-rate image compression and image retargeting, and results demonstrate the effectiveness of our method.

## ABSTRACT

This work studies how we can obtain feature level ratings of the mobile products from the customer reviews and review votes to influence decision making, both for new customers and manufacturers. Such a rating system gives a more comprehensive picture of the product than what a product-level rating system offers. While product-level ratings are too generic, feature-level ratings are particular; we exactly know what is good or bad about the product. There has always been a need to know which features fall short or are doing well according to the customers perception. It keeps both the manufacturer and the customer well-informed in the decisions to make in improving the product and buying, respectively. Different customers are interested in different features. Thus, feature-level ratings can make buying decisions personalized. We analyze the customer reviews collected on an online shopping site (Amazon) about various mobile products and the review votes. Explicitly, we carry out a feature-focused sentiment analysis for this purpose. Eventually, our analysis yields ratings to 108 features for 4k+ mobiles sold online. It helps in decision making on how to improve the product (from the manufacturer's perspective) and in making the personalized buying decisions (from the buyers perspective) a possibility. Our analysis has applications in recommender systems, consumer research, etc.

## CONCLUSION

They have developed a system to rate mobile phones in terms of 108 features based on customer reviews and review votes. We could rate 4000+ phones; this can help make personalized buying decisions and improve the products. We accomplish this by first converting the unstructured data into structured data; then, we extract the sentences comprising our feature keywords; then, we were able to provide the feature-level ratings through sentiment analysis of these sentences. We rank the phones based on the number of features that they are best at, and accordingly, we were able to recommend the best phones for a feature. We tested our methodology on the "phone" named feature by considering the overall customer ratings as ground-truth ratings. The performance of our method is found to be decent. We obtain MAE of only 0.555, i.e., approximately just half a star. We get 52.3% accuracy if exact integer ratings have to be predicted. However, if we can tolerate the one-star integer rating error, the accuracy jumps to 93.8%. The proposed approach is unsupervised. As an extension, we will work on improving the performance by taking a weakly supervised or supervised approach to this problem, for which we will have to annotate the available data in terms of all our 108 features.

## ABSTRACT

Smart health has attracted a huge amount of attention nowadays with the advancement of information and communications technology. Meanwhile, the medical data is imperative to support smart health techniques. However, the storage of medical data faces serious security and privacy issues from the hackers, cloud service providers and even medical institutions. Therefore, I propose a repository named Derepo to address these issues by securing the storage with the decentralized access control mechanism and preserving privacy via the homomorphic encryption scheme. I adopt the distributed ledger technology to endow the access control mechanism with trustworthy properties such as Byzantine fault tolerance. Besides, I utilize the fully homomorphic encryption scheme to protect data privacy and preserve the computability in the meanwhile. The design of Derepo is user-centric. Only the data owner can make the access control policy and decrypt their data while the authorized third parties can enforce the data processing processes on their encrypted data without knowing the original values.

## CONCLUSION

To address the security and privacy issues of medical data persistence in smart health, we have proposed Derepo to decentralize the access control and encrypt the data without losing computability that are two significant challenges extracted from the adversary model. The double-layered architecture is formalized together with static structures and dynamic processes. Which also preserves controllability , manageability and pseudo. The FHE scheme is adopted to ensure confidentiality and resolve the privacy issues caused by both internal and external adversaries

## ABSTRACT

Here the project says that the security measures of all web transactions not only in health sector but in all sectors should always be taken and constantly updated due to the fact that new electronic threats appear every day. Only under this condition, cloud services have positive impact to health, saving more lives than in the past instantly. The contribution of cloud-based services in the healthcare environments is a vital issue in the 21st century. So, we provide and presenting its benefits and tools in hospitals, clinics as well as diagnostic centers, Early year existing applications and services are separated in categories, which basically concern data storage, computing power, network, PaaS, SaaS, data analytics, business intelligence and project management. Then, some security and risk assessment issues in cloud-based services are analyzed thoroughly together with some case studies.

## CONCLUSION

The project is implementing an eye-catching categorization of cloud benefits and threats in the healthcare sector providing many important tools and applications. The information exchange and management are boosted because less time is consumed. This fact is a necessary precondition for the implementation of the future trends which are next described. It is concluded that cloud computing helps the IT evolution in healthcare as all hospitals/diagnostic centers have access to the same cloud services. However, the security measures of all web transactions not only in health but in all sectors should always be taken and constantly updated due to the fact that new electronic threats appear every day.

## ABSTRACT

A cashless society is an economic state which hold financial transactions not in the way of traditional mediums of currency, such as cash or coins, but by transferring digital data (usually by electronic means, like credit cards and mobile data) in the middle of the participating parties. Participants of a cashless society must figure out a way to protect their transaction information, acknowledging the risks of institutions collecting mass amounts of said data, which result in a reducing of personal privacy. Balancing independent privacy with data security is essential in the information age, especially considering the increasing possibility of data breaches and exploitation. In order to grow privacy in a cashless society, a few courses of action can be combined to produce a lasting and desirable result for users: A new type of banking service that assigns randomized numbers to their credit cards, the use of block chain to monitor all transactions from individuals, and a campaign to educate and inform key stakeholders about the security and privacy risks to give the necessary tools and background knowledge to safeguard their own data before interactivity with a foreign entity (or) other third parties (i.e. cyber security departments, IT technicians, etc).

## CONCLUSION

A cashless society poses risks for its members because data and metadata(data about data) about their transactions are being gathered and used. The members of said cashless society will have to figure out a way to protect their data in order to increase their privacy. Our group has found the idea of a cashless society to involve many systemic complexities. Within the complex system, opportunities arise to appliance solutions to privacy and security problems. The various actors in said system have various or different desires and will respond in unique or individual ways to changes made. Sometimes the best solution to a problem is the culmination of multiple approaches. Spreading information to the general public helps people learn about the systems they are using and allows for them to make informed decisions. Block chain helps promote privacy and security through its authentication process. Randomized credit cards help users keep their account numbers private or personal. All 3 approaches are effective ways of adapting to a dynamic currency system.

## LIST OF PROJECT TITLES FOR THE ACADEMIC YEAR 2019-20

S.N O	Hall ticket No	Name of the Student	Name of the Title
1	18701E0001	AMARANATHA REDDY REDDEM	A STUDY ON WORKING CAPITAL MANAGEMENT
2	18701E0002	ANITHA BANDI	A STUDY ON CASH FLOW ANALYSI WITH REFERENCE TO MSN LABORATORIES PVT LTD
3	18701E0003	ANJALI YARAM	A STUDY ON FINANCIAL PERFORMANCE WITH REFERENCE TO ZUARI CEMENT
4	18701E0004	ANUSHA CHAVVA	A STUDY ON CUSTOMER SATISFACTION WITH REFERENCE TO RELIANCE JIO INFOCOM LTD. PULIVENDULA
5	18701E0005	BHARATH KUMAR NUNISSETTY	A STUDY ON BRAND AWARENESS AND CUSTOMER SATISFACTION TOWARDS CEAT TYRES, KADAPA
6	18701E0006	BRAMHAM GONGI	A STUDY ON WORKING CAPITAL MANAGEMENT WITH REFERENCE TO CHAITANYA CHEMICALS KADAPA
7	18701E0007	CHAITHANYA DEBAKU	A STUDY ON PURCHASING DECISION AND SATISFACTION OF CONSUMERS TOWARDS SRI DURGA AUTOMOTIVES
8	18701E0008	CHANDRA NALLA	A STUDY ON DEALER SATISFACTION WITH REFERENCE TO PENNA CEMENT INDUSTRIES LIMITED, HYDERABAD.
9	18701E0009	CHANDRAKALA YERASI	A STUDY ON INVENTORY MANAGEMENT WITH REFERENCE TO PENNA CEMENT, TADIPATRI
10	18701E0010	CHANDRIKA RAMIREDDY	A STUDY ON RATION ANALYSIS WITH REFERENCE TO ZUARI CEMENTS PVT LTD, YERRAGUNTALA
11	18701E0011	DAMODARA SANJEEVA MIDDE	A STUDY ON CONSUMER BUYING BEHAVIOUR WITH REFERENCE TO AMRUTH AGRO FARM'S PVT. LTD (SRI AMRUTH MILK DAIRY) PRODDUTUR (516361) KADAPA
12	18701E0012	DHANA LAKSHMI KONATHALAPALLI	A STUDY ON FUNDSFLOW WITH REFERENCE TO EMPRADA MINES & MINERALS LTD
13	17701E0013	GOPALA KRISHNA G	A STUDY ON FINANCIAL RATIO ANALYSIS WITH REFERENCE TO SUPER SPINNING MILLS LTD. HINDUPUR
14	18701E0013	DIVAKAR BABU PEDULLAPALLE	A STUDY ON LIQUIDITY AND PROFITABILITY WITH REFERENCE TO RAYALASEEMA HI-STRENGTH HYPO PVT LTD
15	18701E0014	HARI PRASAD KONETI	A STUDY ON CASH FLOW STATEMENT WITH REFERENCE ANANTHA PVC PIPES PVT LTD ANANTHAPURAMU
16	18701E0015	HARINATHREDDY LINGEPALLI	A STUDY ON DEALER SATISFACTION WITH REFERENCE TO JINDAL STEEL POWER LTD BELLARY KARNATAKA
17	18701E0016	IMRAN KHAN PATAN	A STUDY ON PURCHASING DECISION AND SATISFACTION OF CONSUMERS TOWARDS VK HONDA SCOOTERS
18	18701E0017	JAYACHANDRA KORVI	A STUDY ON WORKING CAPITAL ON PROFITABILITY WITH REFERENCE TO EMPRADA MINES AND MINERALS PVT LTD RAJAMPET
19	18701E0018	KALYAN LAKIDI	A STUDY ON LEVERAGE ANALYSIS WITH REFERENCE TO DODLA DAIRY
20	18701E0019	KALYANI PALLETI	IMPACT OF BACKGROUND MUSIC AND AMBIENT LIGHTING ON STORE SATISFACTION, SHOPPING, ENJOYMENT AND PATRONAGE
21	18701E0020	LAKSHMAN RAO KATIKA	A STUDY ON SUPPLY CHAIN FINANCE MANAGEMENT WITH REFERENCE TO ANANTHA PVC PIPES PVT LTD ANANTHAPURAMU
22	18701E0021	MANI KARTHIK DONADI	A STUDY ON CUSTOMER SATISFACTION WITH REFERENCE TO HAROON MOTORS

# ANNAMACHARYA INSTITUTE OF TECHNOLOGY & SCIENCES

(Approved by A.I.C.T.E, New Delhi & Affiliated to JNTU Anantapur, Anantapuramu)  
(Institute Accredited by NAAC, Bangalore) (Institute Accredited by IE (I), Kolkata)

23	18701E0022	MANOHAR REDDY MARTHALA	A STUDY ON CUSTOMER RELATIONSHIP MANAGEMENT WITH REFERENCE V K HONDA KADAPA
24	18701E0023	MOUNIKA MADINENI	A STUDY ON CUSTOMER SATISFACTION WITH REFERENCE TO ANANTHA P.V.C PIPES PVT. LTD, ANANTAPUR
25	18701E0024	NAGA VENKATA SAI RAM MANIKANTAN V	A STUDY ON CASH FLOW ANALYSIS WITH REFERENCE TO CHAITANY CHEMICALS KADAPA
26	18701E0025	NARESH BATALA	A STUDY ON FINANCIAL PERFORMANCE WITH REFERENCE TO ANANTHA PVC PIPES
27	18701E0026	NASMITHA GANDLURI	A STUDY ON FINANCIAL PERFORMANCE ANALYSIS WITH REFERENCE TO LAKSHMI NIVITHA MINERALS LTD
28	18701E0028	PAVAN KUMAR PYDAKULA	A STUDY ON WORKING CAPITAL MANAGEMENT WITH REFERENCE TO ANANTHA PVC PIPES PVT LTD. ANANTHAPUR
29	18701E0029	PAVANI T	A STUDY ON LIQUIDITY AND PROFITABILITY ANALYSIS WITH REFERENCE TO CHAITANY CHEMICALS KADAPA
30	18701E0030	PICHAIAH CHINTHAKUNTA	A STUDY ON CAPITAL STRUCTURE WITH REFERENCE TO BHARATHI CEMENT PVT LTD.
31	18701E0031	PREM SUKUMAR THORIVEMULA	A STUDY ON CONSUMER PERCEPTION TOWARDS BIG BAZAR VIJAYABADA
32	18701E0032	PURUSHOTHAM KANCHARLA	A STUDY ON CONSUMER BEHAVIOUR WITH REFERENCE TO HINDUSTAN COCA-COLA BEVERAGES PVT LTD. SRIKALAHASTHI
33	18701E0033	RAMBABU ADIANDHRA	A STUDY ON ASSETS MANAGEMENT WITH REFERENCE TO SRIKALAHASTHI PIPES LTD CHITTOR
34	18701E0034	RANI MUTTALUR	A STUDY ON LIQUIDITY MANAGEMENT WITH REFERENCE TO SREE RAYALASEEMA HIGH STRENGTH HYPO LTD.
35	18701E0035	RANI YAPATI	A STUDY ON CONSUMER PERCEPTION WITH REFERENCE TO HINDUSTAN COCA-COLA BEVERAGES PVT LTD SRIKALAHASTHI
36	18701E0036	SAI CHANDANA SINGAMSETTY	EMPLOYEE PERFORMANCE MANAGEMENT WITH REFERENCE TO ZUARI CEMENT PVT LTD YERRAGUNTLA
37	18701E0037	SANDEEP GAYINI	A STUDY ON FUND FLOW STATEMENT WITH REFERENCE TO SUJALA PIPES NANDYAL
38	18701E0038	SASIKALA NAGABUSIGARI	A STUDY ON TRAINING AND DEVELOPMENT WITH REFERENCE OF BHARATHI CEMENT CORPORATION PVT LTD YERRAGUNTLA
39	18701E0039	SIRISHA KARAM	A STUDY ON FINANCIAL LIVERAGES WITH REFERENCE TO CHAITANYA CHEMICALS
40	18701E0040	SIVAJI VEERABALLI	A STUDY ON FINANCIAL PERFORMANCE WITH REFERENCE TO VK HONDA KADAPA
41	17701E0041	RAJA SEKHAR RAJU LAGIDI	A STUDY ON FUND FLOW STATEMENT WITH REFERENCE TO AMARAJA BATTERIES LTD CHITTOR
42	18701E0041	SIVAKRISHNA POLI	A STUDY ON LIQUIDITY AND PROFITABILITY MANAGEMENT WITH REFERENCE TO AMARA RAJA BATTERIES
43	18701E0042	SIVANAGAVARDH AN REDDY KARRA	A STUDY ON CUSTOMER PERCEPTION WITH REFERENCE TO BHARATHI CEMENT PVT LTD
44	18701E0043	SRAVANI G	A STUDY ON FUND FLOW MANAGEMENT WITH REFERENCE TO ANANTH MONARCH PIPES PVT LTD
45	18701E0044	SRAVANI KUMARI LAKKIREDDY	A STUDY ON BRAND AWARENESS AMONG AIRPORT PASSENGERS

## *Reverse Voltage Topology for 3- $\phi$ 9-Level Inverter Fed Induction Motor Drive*

---

### CONCLUSION

A topology for reversing voltage is implemented which has superior characteristics over traditional topologies in terms of the required components such as switches, control specifications and reliability. It can be observed that the THD performance of proposed strategy is comparable to two common MLI Inverters (DC and CHB), and the output of the proposed RV topology does not even contain harmonics in the output phase and line voltages.

By duplicating the middle switch the proposed topology can be easily applied to a higher level and this method is very simple to implement. This topology is known to be a good candidate for converters used in power applications like Details, HVDC, PV, UPS, etc. In the described topology the switching operation is divided into high and low frequency sections. It will add to the efficiency of the converter, and increase the final size and cost of the prototype. IPD-SPWM and APOD-SPWM are the control methods used to switch the inverter forward. For this topology, PWM has fewer applications.

## Management of rapid current in small size power systems by using multi level converter

### CONCLUSION

In this project, we investigated multi-level converters to realize faster current control in a dc microgrid with extremely low-impedance interconnections. The design procedure for the output filter of the power flow controller was deliberated considering the number of the output levels, steady-state ripple, and gradient of the transient change in the output current. The current-control performances of the two-level and seven level converters were investigated using simulations and experiments. The project established that a power flow controller using a multi-level converter realizes faster current control, fixing the current ripple in the same level. In this way, the multilevel power flow controllers are expected to strike a significant impact on small-scale dc distribution networks providing higher stability and reliability based on their faster power flow control.

## Fully automated solar power multipurpose robot

### Conclusion

It established the integration of features of all of the hardware components used. The existence of each module was reasoned out and carefully placed, thereby contributing to the unit's best functionality. Secondly, the project was successfully implemented using highly advanced ICs, with the aid of increasing technology. So the project was designed and tested successfully.

### Future Scope

The project "Fully Automated Solar Power Multi-Purpose Robot" is mainly intended to design a Robot, which is capable of controlling through predefined voice commands. This system has Bluetooth module which is capable of recognizing the voice commands, Two DC motors interfaced to microcontroller through L293D Dc motor driver for controlling robot directions and solar natural energy used to robot for long back up. The micro controller is programmed in such a way that if any obstacle is present in its way it moves in the backward direction. Whenever the user can say voice command based on that the robot can be controlled.

This project can be extended by using, Zigbee, Wi-Fi, GSM module for robot controlled from longer distance through voice. By interfacing the GSM module which can observe the robot status through sends SMS are can be controlled.

Wireless Notice Board With Text And Voice Input Along With Home Automation

## FUTURE SCOPE

The project "**WIRELESS NOTICE BOARD WITH TEXT AND VOICE INPUT ALONG WITH HOME AUTOMATION**" is mainly intended to display the information on P10 LED display setup what we given by the user in program.

The project can be extended using **IOT** technology, by using this we can send the information from mobile and it will get displayed on P10 LED display from any Web based Servers and databases with predefined messages. And home automation is also possible with IOT as per requirements.

## CONCLUSION

The proposed method of implementing notice board is the one which contribute work easily i.e., displaying information without any delays. All the required wireless modules are fixed at it's respective positions and programming integrated with arduino. The normal notice board can be replaced by this digital notice board. Whatever the circular, information required can be displayed and published easily with in no time from distant places like home or other places.

## ABSTRACT

In this work we investigated the cheapest way to develop the Three Dimensional(3D) scaffold. Three dimension

## CHAPTER-5

### CONCLUSION

This work investigated the feasibility of fabricating a scaffold with Bio-polymer and Tri-calcium phosphate (TCP) composite utilizing a vertical CNC milling machine with addition of automatic Pneumatic extrusion system. This method would allow the process to incorporate organic solvent during the printing of a scaffold unlike other processes where heating of the biopolymer is involved. Scaffolds were printed and near optimal printing parameters for Bio-polymer/TCP compositions were determined. Scaffolds fabricated with a 60:40 (in weight percentage) Bio-polymer /TCP composite utilizing the parameters of 5.5 bars, 5 g of Bio-polymer to 4 ml of organic solvent, 1.19 mm filament spacing and 55mm/min feed rate were easy to handle with sufficient mechanical integrity. The porosity is observed that various from 700 to 800 $\mu$ m. A continuation of this study would include increasing the height of the scaffold. To achieve this, the scaffold fabrication process will be modified by avoiding the continuous printing of the single layer and incorporating start-stop operations to deposit each filament in the layer. Such an operation would avoid the excess build-up of material at the scaffold edge which aids in building thicker scaffolds. Finally in this study we develop the scaffold with the less cost with good properties.

## ABSTRACT

Automation was the rage of the engineering world. The investigation on the existing vegetables cutting machine reviews the following drawbacks such as high investment cost, the contamination, additional manpower and time consumption caused by manual processing. The setup involves a hopper arrangement and the rotational motion of the motor is fixed to shaft it is connected to rotational disc it is used to slice the vegetables into pieces. The primary objectives, upon which, the present work is based are providing an alternative to the existing automated system mainly, targeting the initial investment factor, and to power a domestic product using the rotation cutter blade is tapered flat disc made of stainless steel material. There by eliminating the associated difficulties of manual vegetable cutting. The vegetables are fed in hopper. Hopper is the part through which the vegetables are fed towards the blade in the slicing chamber for slicing. For a safety purpose, there is a considerable distance from the top of the hopper to the point where the blade performs to the slicing action. It made of stainless steel. The plate or tray carriage is the steel component that conveys the sliced vegetable from the slicing chamber to the outlet. In modifying this component, a movable tray carriage is adopted in the place of a framed one. This modification aids in reducing vegetable wastage due to the compactness of the design.

## 6.1 Conclusion

Over the years, the traditional process of slicing vegetable has always been slow, tedious, boring, time consuming and in some cases unhygienic. Designing and fabricating a machine capable of slicing vegetable which will mechanize the slicing process for both domestic and commercial consumption becomes a necessity. The design demonstrates that simple member elements can be assembled to make a functional engineering device. Engineering materials that are rust free were selected. Simple design equations involving Cutting force, Torque, Bending moment and shear forces, etc were related in the course of going through the design process. The results and fabrication of this project has shown the possibility of manufacturing a relatively cheap, easy to use and reliable machine for slicing vegetable which reduces human effort, variation of slicing speed by the user based on the nature of the vegetable to be sliced, as a variable speed motor is utilized. Its flexibility and wide range of applicability is an added advantage. The machine was safely operated. This design is environmentally friendly as it does not use an internal combustion engine but requires power for just the electric motor, thus the production of fumes is entirely eliminated. Almost Every home in Nigeria eats vegetables. Hence, the vegetable slicing machine would serve perfectly in slicing of these vegetables into edible sizes.

## ABSTRACT

We know that the accidents are caused due to bad weather, sudden entrance vehicles, and invisibility of objects etc. By this project, we are proposing a platform that could improve vehicle passenger's safety from occurring accidents from the sudden objects or vehicles and due to rain fall or fog etc.

Our solution can support the driver by getting warning about imminent obstacles and approaching vehicles that can lead to collision. In addition to this we also incorporate an Auto Retardation System that helps to prevent accidents from such conditions. We also implemented an automatic wiper speed control which controls the Wiper speed of the vehicles based on the rainfall intensity.

For obstacles or vehicles detection, we use an Ultrasonic Sensor and for rainfall intensity testing, we use the rain drop sensor which works with the principle of total internal reflection this is very useful in rain conditions as the car wind shield obstructs the vision of driver and may lead to accidents and the advantage of our system is that it does the work of adjusting the speed of wiper without the need of the driver to respond. In previous projects, mainly microcontrollers are used as the main part but that have not provided the required results. So as in extension we developed our project with the help of MSP430 Microcontroller which works with either analog or digital signals and gives the vital output.

## CHAPTER 5

### CONCLUSION:

We conclude that by using Raindrop and Ultrasonic module, we have been successful in implementing the Anti-collision and Auto Retardation System along with Wiper Speed Control System in the vehicles. Ultrasonic sensors are used for better performance in our anti-collision system. The raindrop detector is very sensitive in the wiper speed control system, and can detect very small quantities of moisture. In the event that only mild rainfall stimulates the system, the motor runs faster in higher levels of rain, which ensures that the wiper runs faster and saves the driver. Commercially these anti-collision and automatic wiper systems are available in high-end cars as standard and are available at excess cost. For Future Purpose, we can inhibit the Dual Tracking System on the top of the vehicles for the effective results in while need to be available for everyone. So, we are expecting that this solution can help for the reduction of crashes by improving the safety of the driver.

## ABSTRACT

Due to the existence of weakly linked and undefined multiple regions of interest, satellite image segmentation is difficult. A number of bio-inspired algorithms have been developed to produce equilibrium threshold values for efficient

## CHAPTER 4

### CONCLUSION AND REFERENCES

#### 4.1 CONCLUSION:

A comprehensive and efficient method for removing shadows from satellite images using Cuckoo Search Algorithm and generating IOOPL. Photograph segmentation considering shadows is introduced first in order to get a shadow identification test. Then, suspicious shadows are chosen through spectral functions and object spatial statistics, and fake shadows are removed. In the meantime, they also show the results of different measures with the proposed methodology. For shadow removal, IOOPL matching was achieved after the homogeneous parts.

## ABSTRACT

*This paper presents analog to digital conversion, using the background calibrated fine and coarse comparator, 8-bit successive approximation register. Comparator consists of a specialized differential amplifier for the high gain. These coarse and fine comparators are used to measure and also digitize analog to digital converters.*

*A successive approximation register ADC combined with time interleaving can obtain a high conversion rate with low power consumption. Low-power coarse and low-noise comparators are used to increase the performance of the comparator. For rising power consumption these comparators are proposed.*

*In addition to this a background calibrated method is proposed for the purpose to offset in between different bytes of comparators by using a reference comparator. The technique that is background calibrated; it does not require any additional bit for the calibration regarding comparator. So, that there will be an improvement in the analog to digital conversion speed.*

## CONCLUSION

A novel SAR architecture with coarse and fine comparators is employed in this design to minimize the power consumption. A design methodology is proposed for optimizing the configuration of coarse/fine comparators. Offsets between different comparators are calibrated in fully background mode using the proposed reference comparator calibration scheme, which removes the calibration time from the SAR timing budget completely. So, we can improve the ADC conversion speed by using this 25nm CMOS technology in Tanner EDA 16.1 version.

## Abstract

In order to promote the performance of infrared and visual image fusion and provide better visual effects, this paper proposes a hybrid fusion method for infrared and visual image by the combination of discrete stationary wavelet transform (DSWT), discrete cosine transform (DCT) and local spatial frequency (LSF). The proposed method has three key processing steps. Firstly, DSWT is employed to decompose the important features of the source image into a series of sub-images with different levels and spatial frequencies. Secondly, DCT is used to separate the significant details of the sub-images according to the energy of different frequencies. Thirdly, LSF is applied to enhance the regional features of DCT coefficients, and it can be helpful and useful for image feature extraction. Some frequently-used image fusion methods and evaluation metrics are employed to evaluate the validity of the proposed method. The experiments indicate that the proposed method can achieve good fusion effect, and it is more efficient than other conventional image fusion methods.

**Keywords:** Infrared and visual image fusion; Discrete stationary wavelet transform; Discrete cosine transform; Spatial frequency

- As camera fused is performed utilizing a single object tracking process, photos have reduced strength under climatic conditions.
- Seeing at night is not quick, mainly due to the extreme camera settings, whether it is nighttime or daytime.
- Better source of energy is necessary for a reasonable representation of wizards based on spectral frequencies.
- In this type of setting, the worst output is not resolved due to rain or fog simulator if one clicks on both the 2 source pictures.
- Throughout this phase, there are huge possibilities of data loss which require careful monitoring.
- While melding images, the computing is rather slow.

### 6.3. Conclusion:

This document proposes hybrid IR and VI fusion method based on the DSWT, DCT, and LSF. DSWT is used to rot the source photo into local constituency sub-images at varying scales and frequencies. In the DSWT system, DCT is used to monopolize critical sub-image knowledge as per the energy of the various frequency. LSF would be used to improve the spatial properties of the DCT coefficients. The fused DCT correlations are acquired by fused rule, in conjunction with LSF values in the DCT domain. Finally, it executes IDCT and IDSWT to fuse the file. The experiments on numerous IR and VI pairs demonstrate that the suggested approach will successfully incorporate the observable details in VI and the IR infrarot areas into the final pictures. And several widely used visual measurement indexes were used to calculate the precision of the fused pictures; the findings suggest that the suggested IR and VI fusion system will obtain higher efficiency than the traditional methods. Similar with traditional approaches, the latest approach will fuse more information of the target images and obtain better fusion performance. The findings indicate that the integrated solution significantly outshines the alternatives in multiple samples of IR and VI.

The work reviewed in this thesis revolves around the issue of rotating medical images and size invariants. The study discussed in this job provides methods with rotate invariance traits for analyzing and classifying the pictures. Compared to other existing methods, texture analysis-based extraction of features is implemented and deemed the strongest technique. Picture diffusion is consider once of the significant steps which helps to make a proper diagnosis through fuse different photo methods. The work also works with the various image fused processes. The research explored in this study is ultimately divided into both the following sources

## ABSTRACT

### ***LOW COST SORTING NETWORK CIRCUITS USING UNARY PROCESSING***

*Sorting is an important task in applications ranging from data mining to databases, scientific computing, to scheduling, artificial intelligence, robotics and signal processing. Sorting is a common task in applications from signal and image processing to switching systems. Based on the target applications, hardware sorting units vary greatly in the way that they are configured. The usual approach is to wire up a network of compare-and-swap units in a configuration called a Bitonic network.*

*This project proposes a novel area and power-efficient approach to sorting networks, based on "unary processing". In unary processing, numbers are encoded uniformly by a sequence of one value followed by a sequence of the other value in a stream of 0's and 1's with the value defined by the fraction of 1's in the stream. However, the latency of the system got increases. To reduce the increased latency, the time-encoding of data is used. The result is a low-cost, energy-efficient with only a slight accuracy loss, compared to conventional implementations. This project is implemented by using tanner tool.*

## **CHAPTER-6**

### **CONCLUSION**

This work proposes an area and power efficient implementation of sorting networks based on unary processing. The latency, energy-efficient was decreased, and cost is low compared to binary method.

The VLSI cost increases significantly with increasing resolution of the input data. The high hardware cost and the high power consumption of such networks restrict their application.

#### **ADVANTAGES:**

1. It improves latency
2. Decreases area
3. Low power consumption

#### **APPLICATIONS:**

1. machine learning,
2. neural networks,
3. signal processing systems,
4. image,
5. video, and
6. coding.

#### **FUTURE SCOPE:**

We are processing 8-bits in this project. In the future the number of bits will be increased

## **ABSTRACT**

*There are hundreds of kinds of trees in the natural ecosystem, and it can be very difficult to distinguish between them. Botanists and those who study plants however, are able to identify the type of tree at a glance by using the characteristics of the leaf. Machine learning is used to automatically classify leaf types. Studied extensively in 2012, this is a rapidly growing field based on deep learning. Deep learning is itself a self-learning technique used on large amounts of data, and recent developments in hardware and big data have made this technique more practical. We propose a method to classify leaves using the CNN model, which is often used when applying deep learning to image processing.*

## **8. CONCLUSION AND FUTURE ENHANCEMENT**

Several reliable automated procedures are used for leaf pattern recognition. This paper mainly Reviews the advantages of each classifier and compares their compatibility with leaf features Recognition process. A computer vision approach which can completely neglect the background of the image is speeding up the recognition process and it is suitable for highly complex plant leaf samples. A system that neglects distortion tremendously enhances the recognition technology and even makes the recognition of aquatic fauna more feasible since aquatic plants or algae may not have a definitive shape. The current image processing technique should be robust under diverse intensity of lighting. This new algorithm can be developed by tweaking the detection technique which may lead to detection of specific diseases. The advantage can also be applied for herbal plants recognition to prevent adulteration for better quality control, especially for product and safety.

In future research we will attempt to recognize leaves attached to branches, in order to develop a visual system that can replicate the method used by humans to identify plant types.

## ABSTRACT

Recently, student's attendance has been considered as one of the crucial elements or issues that reflects the academic achievements and the performance contributed to any university compared to the traditional methods that impose time-consuming and inefficiency. Differing programmed distinguishing proof advances have been more stylish, for example, the wireless technology like Radio Frequency Identification (RFID). A broad look into and a few applications are delivered for exploiting this innovation. RFID is a remote innovation used as a reason for recognizing an item through radio waves to move data from an electronic tag, called RFID tag or mark to transfer

information. RFID is \$2 per user. The present investigation centers around proposing a RFID based Attendance Management System (AMS) and furthermore data administration framework for a scholastic area by utilizing RFID innovation notwithstanding the programmable Logic Circuit, (for example, Raspberry Pi), and PHP Server.

## 8.CONCLUSION

### CONCLUSION

An understudy participation and data framework are planned and actualized to deal with understudy's information and give capacities to following understudy participation, evaluating understudy marks, giving data about timetable, address time, room number, and other understudy related data. Likewise, the proposed framework gives effectiveness to the staff where there is no requirement for additional paper works and extra storage spaces for sparing information. Results accomplished the advancement of building up the framework demonstrated solid to help the participation the executives framework for a scholastic division in the use of the RFID innovation and microcontroller board with PHP Server. It may be considered as a fruitful execution.

## **Abstract**

*Lung cancer prediction is the most difficult problem due to cancer cell composition, where most of the cells overlap. The image processing techniques are often used to predict lung cancer and also to identify and treat early lung cancer to prevent it. Therefore different features are extracted from the images to predict lung cancer, pattern recognition based methods are useful for predicting lung cancer. Recently, image processing techniques are commonly used in many medical fields to enhance image in earlier identification and treatment stages, where the time factor is very critical to detect anomalies in target images.*

*Particularly in specific cancer tumors such as lung cancer, breast cancer and so on. The key factors of this research are image quality and accuracy, image quality evaluation as well as improvement depending on the stage of enhancement where low pre-processing techniques are used based on filter. Following the principles of segmentation, an improved region of the object of interest is obtained which is used as the basic foundation for extraction of features. A comparison of normality is made, based on general features. Here a systematic analysis is presented using image processing techniques for the prediction of lung cancer by previous researches. The description from previous for predicting lung cancer.*

# Small Lung Nodules Detection Based on Local Variance and Probabilistic Neural Network

---

## 10. CONCLUSION

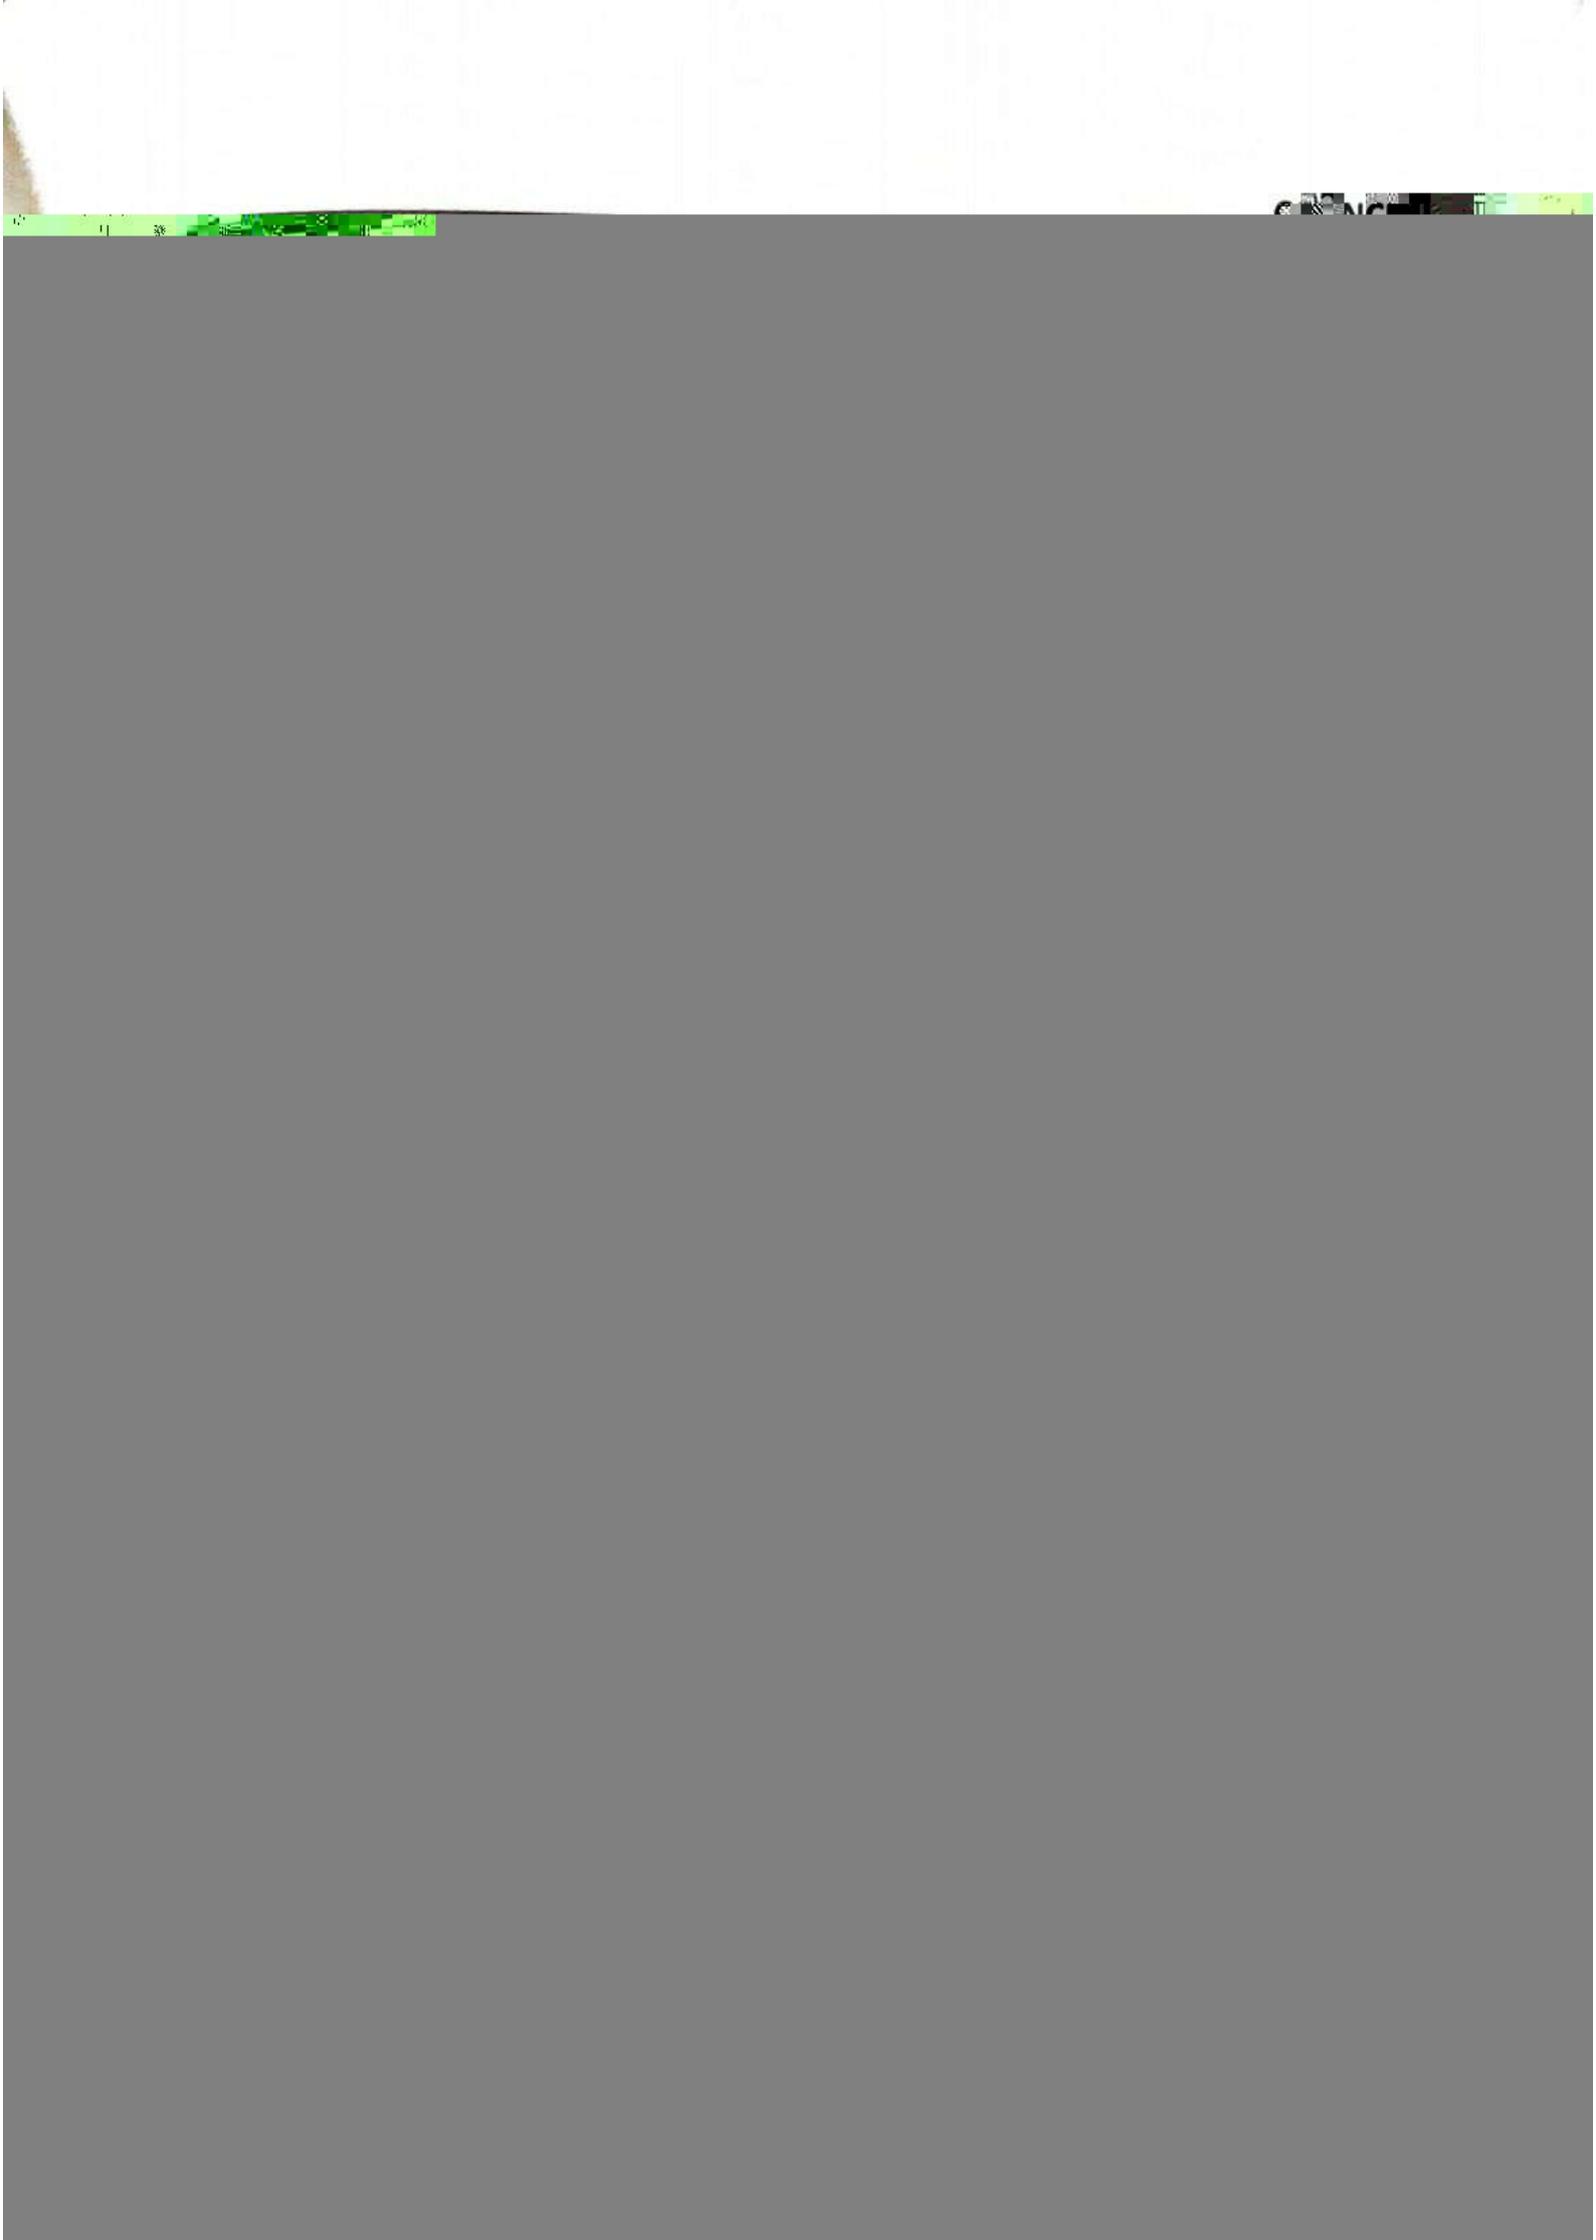

Ultimately, the proposed strategy is simple, but it does produce great results. A list of comparable methodologies for identification of lung knobs is provided in Table 1. Contrary to various approaches, the fundamental priorities of the proposed strategy are: a higher right grouping rate (92 percent) and the way to discern small differentiated knobs and lung

Course Objectives:

- To make the students familiar to apply the knowledge gained from the theoretical subjects in the entire course.

Students are required to take up a project work, in which the student can choose any specific problem of industry or industry-based project work. Alternatively, it can be secondary source based or field-based project work. Before the commencement of the project work, each student is required to submit a synopsis indicating the objectives, methodology and frame work for analysis. The project should have an internal faculty has guide. The student can initiate the project work in the penultimate semester of the course

Course Outcomes:

At the end of the course, the student will be able to apply the various concepts in real time scenarios

## INTRODUCTION

### **1.1 Background of the Study**

To study on consumer buying behavior towards coca-cola beverages. The first and for most in research process, step happens so that of selection and properly defining a research problem. We must find the problem and formulated it so that it becomes susceptible to research. Examine and concurring a problem before we can diagnose correctly.

### **1.2 Statement of the Problem**

The project is mainly focus to find out the consumer preference in purchase of soft drinks in Kadapa. Therefore the survey was conducted in those areas to know about the consumer preference towards coca-cola soft drinks. The questionnaire was framed in such away to collect overall information about the factors which influence consumer preference to purchase coca-cola soft drinks.

### **1.3 Objectives of the study**

- To know factors which lead to preferring soft drinks.
- To know which motives on purchase of coca-cola brands.
- To find out the Customer's Perception towards Coca – Cola Beverages.
- To study the factors influencing the sales of Coca – Cola Beverages.
- To study the behaviour of Customer's in general towards Coca – Cola Beverages in Kadapa District.

### **1.4 Limitations of the Stud**

- The study was confined to limited consumers only and deals with coca-cola-brand.
- The duration of the study was restricted for 8 weeks only, which is not sufficient to study the entire consumers in the market.

### **1.5 ORGANIZATION of the Study**

The study aims at ascertaining customer perception on beverages. The study is restricted to the information regarding the customer's likes and dislikes, personal decisions and family decisions and loyalty of the customers. The study has been restricted to Kadapa

## CONCLUSION

Buying behavior of consumer is a complex task. Many factors influence on them to buy the products. Before going to purchase the product, they seek information from different sources, after that they go for evaluation which is best product to us, then they will take right decision about the product.

COCA-COLA company brands are well known to customers. So many times, accidental buying influence on the consumers. To influence the consumers buying behavior, the company should maintain good quality, availability and create awareness, brand image towards their products in the mind set of consumer, by this sales may increase.

## **Chapter – 1**

### **INTRODUCTION**

#### **1.1 BACKGROUND OF THE STUDY**

##### **INTRODUCTION TO FINANCE**

Financial is the life blood of the organization, irrespective of its size and mission. Management of financial in the organization has been changing at a rapid pace after the inception of the computers in the field. In the modern phase the financial manager is not in a passive role of a scorekeeper of accounting information and arranging funds, whenever diversified to do so. Rather, he is confronted with the various issues and decisions to ensure that the funds are raised economically and canalized in the most effective mane.

##### **FINANCIAL MANAGEMENT:**

Financial management emerged as a distinct field of study at the turn of this century. Many eminent people defined it in the following ways.

##### **DEFINITIONS;**

According to GUTHMANN AND DOUGHAL: "Business finance can broadly be defined as the activity concerned with the planning, rising, controlling and administrating of funds used in the business".

According to BONNEVILLE AND DEWEY: "Financing consists in the rising, providing and managing of all the money, capital or of any kind to use in the connection with the business".

##### **FUNCTION OF FINANCIAL MANAGERS:**

The financial function of raising funds, investing them in assets and distributing returns earned form assets to shareholders are respectively known as financing investment and divided decisions. While performing these functions, a fine attempt to balance cash inflows and outflows. This is called as liquidity decision.

The finance functions can lie divided into four broad categories.

1. Investment or long-term asset mix decision
2. Financing or capital mix decision
3. Dividend or profit allocation decision and,
4. Liquidity or short — term Asset mix decision.

##### **INVESTMENT DECISION:**

Investment or capital budgeting involves the decision of allocation of cash or commitment of funds to long-term assets, which would yield benefits in future. It involves

### 5.3 CONCLUSION

Except of the first year of the study of period, funds were utilized for financing the Current assets. Indicating that the overall financial position of the srikalahasti pipes industries limited is not satisfactory. However, there is scope for improving and in the area of cash management and Current assets. The Srikalahasti Pipes industries it was the following fixed management method. Depreciation method are very good and also the company utilizing its assets up to optimum level over the life time.

## Chapter 1

### 1.1.Introduction:

At the end of the accounting period normally every business concern prepares two statements i.e. the income statement and balance sheet. These statements do not provide necessary information to the interested parties like investors, debenture holders, creditors, government and workers. The profit and loss account contains a summary of expenses incurred and the revenue realized in the accounting period. It does not highlight the changes in the financial position of a business. The balance sheet gives a static view of the resources of a business and the uses to which these resources have been put at certain period of time. It does not disclose the caused for changes in the assets and liabilities between two different points of time. It does not lend itself to detailed analysis relating to increase or decrease of working capital. Hence, another statement has to be prepared to show the changes in the assets and liabilities form the end of one accounting period to another. This statements is called "Funds Flow Statement".

Funds Flow Statement mainly disclosed information concerning financing and investing activities of a business concern and the consequent changes in its financial position of a period. This statement helps the owners and creditors to judge the financial management with respect to its ability in generating the funds from various sources and effectively utilizing them for various productive used without effecting device to analysis the changes in the financial condition of a business enterprise between tow accounting dates.

It is not mandatory on the part of Business concerns to prepare a Funds Flow Statement. But for their benefit they have to prepare a Funds Flow Statement in addition to Income Statement and balance sheet.

### 1.2.Definition:

**Robert N. Anthony:** "The Funds Flow Statement described the sources from which additional funds derived and the uses to which these funds were put".

**Fouke:** A Statement of sources and application of funds is a technical device designed to analysis the changes in the financial condition of a business enterprises between to dates".

## CONCLUSION

Fund flow statement is very important for every organization. It can really determine how the business should be carried on in the future. We can proper utilize the budget of the company and the strategy to cope the financial problems of the company through the preparation of the fund flow statement. As we known the aim of fund flow statement is to know the working capital of the company whether it increases or decreases during a given period of time. So it is a main tool to make a organization to survive in the future.

## INTRODUCTION

Employee Performance Management is about aligning the organisational objectives with the employees' agreed measures, skills, competency requirements, development plans and the delivery of results. Managing employee performance is one of the key drivers for organizational success in the present context of firms trying to adopt a resource centred view of the organization. The emphasis is on improvement, learning and development in order to achieve the overall business strategy and to create a high performance workforce.

### 1.1 BACKGROUND OR HISTORY OF EMPLOYEE PERFORMANCE MANAGEMENT:

Performance Management began around 60 years ago as a source of income justification and was used to determine an employee's wage based on performance. Organisations used this new method to drive behaviours from the employees to get specific outcomes. In practice this worked well for certain employees who were solely driven by financial rewards. However, where employees were driven by learning and development of their skills, it failed miserably. The gap between justification of pay and the development of skills and knowledge became a huge problem in the use of Performance Management. This became evident in the late 1980s; the realisation that a more comprehensive approach to manage and reward performance was needed. This approach of managing performance was developed in the United Kingdom and the United States much earlier than it was developed in Australia.

In recent decades, however, the process of managing people has become more formalised and specialised. Many of the old performance appraisal methods have been absorbed into the concept of Performance Management, which aims to be a more extensive and comprehensive process of management. Some of the developments that have shaped Performance Management in recent years are the differentiation of employees or talent management, management by objectives and constant monitoring and review.

Its development was accelerated by the following factors:

- The introduction of human resource management as a strategic driver and integrated approach to the management and development of employees; and
- The understanding that the process of Performance Management is something that's completed by line managers throughout the year - it is not a once off annual event coordinated by the personnel department.

### 5.3 Conclusion

Most of the employees are satisfied by their work process but changes are required. According to changing scenario as recruitment process has great impact on working of company. Employee works are well assigned to the people which make them well satisfied with their work. Evaluation of the employee performance make it more effective to have a clear idea of work and also help in working prominently.

**CHAPTER 1**

**1.1 INTRODUCTION**

Training and development play an important role in the effectiveness of organizations and to the experiences of people in work. Training has implications for productivity, health and safety at work and personal development. All organizations employing people need to train and develop their staff. Most organisations are cognisant of this requirement and invest effort and other resources in training and development. Such investment can take the form of employing specialist training and development staff and paying salaries to staff undergoing training and development. Investment in training and development entails obtaining and maintaining space and equipment. It also means that operational personnel, employed in the organisation's main business functions, such as production, maintenance, sales, marketing and management support, must also direct their attention and effort from time to time towards supporting training development and delivery. This means they are required to give less attention to activities that are obviously more productive in terms of the organisation's main business. However, investment in training and development is generally regarded as good management practice to maintain appropriate expertise now and in the future.

**Definition:**

Training and Development is a subsystem of an organization which emphasize on the improvement of the performance of individuals and groups. Training is an educational process which involves the sharpening of skills, concepts, changing of attitude and gaining more knowledge to enhance the performance of the employees. Good & efficient training of employees helps in their skills & knowledge development, which eventually helps a company improve.

**1.2 IMPORTANCE OF TRAINING AND DEVELOPMENT**

For companies to keep improving, it is important for organizations to have continuous training and development programs for their employees. Competition and the business

### 5.2 SUGGESTIONS

- Most experienced and efficient trainers should be appointed to improve the effectiveness of training Programmes.
- Conduct more of the job programme also.
- Training Programmes should be given in accordance with the change in technology.
- More concentration is to be given on marketing related topics to give adequate knowledge to the level of employees.
- The present frequency of training programme may be increased.
- The management has to provide good support to improve the work through proper training programme.
- To get better productivity results the duration of training programme has to be increased

### 5.3 CONCLUSION

After conducting an intense study of Training and development in Bharathi Cement Corporation Pvt Ltd, I have arrived to the following conclusions.

- Relevant topics are covered in the training programme.
- Management encourages training schedules in the organization.
- Training Programme was organized in a well manner in the organization.
- Training and development programmes help to eliminate performance deficiency among employees.
- The training is the process of learning to do the job effectively & efficiently.
- Training increases the skill & knowledge of a worker.

This is to confirm and certify **Miss.B. PADMAVATHI, M.C.A**, student of **Annamacharya Institute of Technology & Sciences (Autonomous), Rajampet**. With **Reg.No.17701F0026** has successfully completed her project work titled **“KEY MANAGEMENT SCHEME FOR SECURE CHANNEL ESTABLISHMENT IN FOG COMPUTING” on JAVA Technologies** as part of her course curriculum.

She has done this project using **JAVA** during the period of December 2019 to April 2020 under the guidance and supervision of **Mr. RAVI KUMAR**, Sr. Software Engineer from **Agudo IT Solutions Pvt.Ltd.**

She has completed the assigned project well within the time frame. She is sincere, hardworking and her conduct during the project is commendable.

For Agudo IT Solutions Pvt.Ltd.

  
Project Guide.

## ABSTRACT

Fog computing is a promising extension of cloud computing, and enables computing directly at the edge of the network. Due to the decentralized and distributed nature of fog nodes. Key management schemes are usually employed to generate, distribute and maintain the secret keys. In this project, a key management scheme is proposed called Dynamic contributory broadcast encryption (DConBE) for secure channel establishment in fog computing. Only selected fog nodes in the system can decrypt the encrypted messages using their respective decryption key. New key management scheme also achieves the properties of fog node dynamics, fully collusion-resistant and stateless. Any end user may encrypt messages under the public encryption key sort cipher texts to any subset of the fog nodes in the system.

**Conclusions:**

An end user wants to send encrypted messages to its preferred fog nodes in a fog system, the user has to know the structure of the fog nodes. As future work, it would be interesting to design a key management scheme without using the structure of the fog nodes is defined the notion of DConBE and proposed a concrete DConBE scheme for key management in fog computing. In DConBE, any end user can send encrypted messages to any subset of fog nodes in a fog system without requiring a trusted dealer.

## CERTIFICATE

This is to confirm and certify **Mr. B.Naveen Kumar M.C.A**, student of **Annamacharya Institute of Technology & Sciences (Autonomous), Rajampet.** With **Reg.No.17701F0023** has successfully completed his project work titled **“SUPERMAN: Security Using Pre-Existing Routing for Mobile Ad hoc Networks”** on **JAVA Technologies** as part of his course curriculum.

He has done this project using **JAVA** during the period of **12/12/2019** to **21/04/2020** under the guidance and supervision of **Mr.N.Narayana Reddy** from **Logic Systems.**

He has completed the assigned project well within the time frame. He is sincere, hardworking and his conduct during the project is commendable.

For Logic Systems,  
*Narayana Reddy*  
(Project Guide)

## ABSTRACT

The flexibility and mobility of mobile Ad-hoc networks have made them increasingly popular in a wide range of use cases. To protect these networks, security protocols have been developed to protect routing and application data. However, these protocols only protect routes or communication not both. Both secure routing and communication security protocols must be implemented to provide full protection. The use of communication security protocols originally developed for wire line and Wi-Fi networks can also place a heavy burden on the limited network resources of a mobile Ad-hoc networks. To address these issues, a novel secure framework is proposed. The framework is designed to allow existing network and routing protocols to perform their functions, whilst providing node authentication and access control and communication security mechanisms. Simulation results comparing security using pre-existing routing for mobile Ad-hoc networks with IPsec, Secure Ad-hoc On-demand distance vector (SAODV) and secure optimized link state routing (SOLSR) are provided to demonstrate the proposed frameworks suitability for wireless communication security.

## CONCLUSION

Security using pre-existing routing for mobile Ad-hoc networks is a security framework that protects the network and communication in mobile Ad-hoc networks, when you send a data source to destination in different routes the hackers stole our data using network, and then superman networks find that node and provide protection to every node, The primary focus is to secure access to a virtual closed network (VCN) that allows expedient, reliable communication with confidentiality, integrity and authenticity services. Security using pre-existing routing for mobile Ad hoc networks addresses all eight security dimensions outlined in X.805. Security using pre-existing routing for mobile Ad-hoc networks can be said to implement a full suite of security services for autonomous MANETs. It fulfills more of the core services outlined in X.805 than IPsec, due to being network focused instead of end-to-end oriented.

## TO WHOMSOEVER IT MAY CONCERN

This is to certify that Ms. Jangamsetty Mounika (Reg. No.17701F0022) final year Master of Computer Applications student of Annamacharya Institute of Technology & Sciences (Autonomous) New Boyanapalli, Rajampet has successfully completed her project work titled "Achieving Data Truthfulness and Privacy Preservation in Data Markets" Using JAVA during December 2019 to April 2020 in our organization.

We wish her all success for her future endeavors.

For Global Techno Solutions

Jeya Gopi. D  
H.R. Manager

## ABSTRACT

Data mining applications have obtained massive growth in today's internet era. It eventually leads to a serious threat to the security of an individual's personal and sensitive information. Raw data of millions of users are collected by the service provider's through data contributors and they are shared with the data consumers. Existing systems use Privacy Preserving data mining(PPDM) which modifies the data without compromising the security of the sensitive information contained in the data. In this project, proposed a new technique called Truthfulness Preserving Data Mining(TPDM) which is structured as encrypt-then-sign fashion. It uses partial homomorphism encryption and identity-based signature that provides batch-verification and data confidentiality. Performance of the model was evaluated using Yahoo! Music rating dataset and 2009 RECS dataset. Performance measures show that TPDM incurs low computation and communication overheads when compared to existing models. Keywords Natural hazards, Disaster Response, Drones, Clustering, Flood Monitoring, classification

## CONCLUSIONS

In this project, the first efficient secure scheme TPDM for data markets, which simultaneously guarantees data truthfulness and privacy preservation. In TPDM, the data contributors have to truthfully submit their own data, but cannot impersonate others. Besides, the service provider is enforced to truthfully collect and process data. Furthermore, both the personally identifiable information and the sensitive raw data of data contributors are well protected. In addition, I have instantiated TPDM with two different data services, and extensively evaluated their performances on two real-world datasets. Evaluation results have demonstrated the scalability of TPDM in the context of large user base, especially from computation and communication overheads. At last, I have shown the feasibility of introducing the semi-honest registration center with detailed theoretical analysis and substantial evaluations.

As for further work in data markets, it would be interesting to consider diverse data services with more complex mathematic formulas, e.g., Machine Learning as a Service (MLaaS). Under a specific data service, it is well-motivated to uncover some novel security problems, such as privacy preservation and verifiability.

### Future Enhancement

It is not possible to develop a system that makes all the requirements of the user. User requirements keep changing as the system is being used. Some of the future enhancements that can be done to this system are:

- Based on the future security issues, security can be improved using emerging technologies.
- Adding more GUI to user convenient.
- Data storage and retrieval will become faster and easier to maintain.
- Time updated key module can be added.

## ABSTRACT

The quick upgrading of motorbike-sharing constructions has announced creatures vast comfort all through the beyond decade. On the opposite hand, high shipping flexibility gives upward push to issues for each users and operators. For customers, dynamic distribution of shared bikes because of uneven consumer demand often leads to the test in or check out carrier unavailable at a few stations. For operators, unbalanced motorbike usage comes with more motorcycle broken and developing maintenance value. We take into account to beautify consumer reports and rebalance bicycle usage by using directing customers to specific stations with a better fulfillment fee of rental and return. For the first time, we devise a trip advisor that recommends motorcycle test-in and check-out stations with joint consideration of carrier nice and bicycle utilization. To ensure provider firstrate, we firstly expect the person call for of each station to acquire the achievement charge of condominium and return inside the future. Experiments suggest that the precision of our method is as a good deal as 0.826, which has raised by means of 25.9% compared with that of the historical common approach. To rebalance motorcycle utilization, from historical facts, we identify that biased bike usage is rooted from circumscribed bicycle circulate among few active stations. Therefore, with described station activeness, we optimize the motorbike move by using main customers to shift bikes between pretty energetic stations and inactive ones.

## Conclusions

Supported the analysis of general characteristics, abstraction temporal patterns and bike utilization in bike sharing, we have a tendency to propose a completely unique design of a utilization aware utilization we have a tendency to are trip consultant that engages users to balance bike usage and prolong the upkeep intervals of bikes. Ranging from guaranteeing users' success rate of rental and come, the consultant is meant to dynamically suggest the best stations supported their current activeness of motorbike usage. We have a tendency to evaluate the planned system through in-depth simulations mistreatment historical records from the world's largest bike-sharing system, confirming the effectiveness of our framework.

## Abstract

Where as associate lay to rest cloud is associate interconnected international "cloud of clouds" that enables each cloud to regulator into resources of different clouds, lay to rest cloud stakeholders unit advanced as a results of lay to rest cloud resources unit distributed and controlled by utterly totally different clouds. "Agent-based cloud computing" involves the event of agents for bolstering discovery, matching, selection, composition, scheduling, workflow, and observation of lay to rest cloud resources. associate agent may be a ADPS that is capable of constructing selections severally and interacting with various agents through cooperation, coordination, and negotiation. victimization associate agent-based approach, characteristics associated with intelligent behaviors of agents like interacting with socially through cooperation coordination, and negotiation are built into clouds. This survey 1) discusses the importance associated advantages of victimization associate agent 2) reviews representative models of agent-based lay to rest cloud resource allocation and provides a comparison among these models 3) compares agent-based and non-agent-based approaches for executions in multiple clouds 4) provides tips that might future directions.

## Conclusion:

In this survey paper, an exposition of agent-based problem solving approaches for intelligent Inter cloud resource allocation is provided. The contributions of this paper are manifold. Section 1 defines agent-based cloud computing and cloud intelligence. It describes the motivation, advantages, and significance of adopting an agent paradigm for intelligent Inter cloud resource allocation. Section 2 provides a comprehensive overview of the state-of-the-art research on adopting an agent-based paradigm for Inter cloud resource allocation by reviewing representative agent-based Inter cloud resource allocation models. Section 3 provides a comparison and critique of the state-of-the-art agent-based Inter cloud resource allocation models. Summarizing and comparing the features of existing agent-based Inter cloud resource allocation models provide designers with pointers to and guidelines on some of the essential design considerations for developing new agent-based techniques for Inter cloud resource allocation.

## ABSTRACT

Network communications can easily be disrupted by the failure of networking equipment, ranging from a single accidental link cut, to a wide swath of links and nodes wiped out simultaneously by a natural disaster. To mitigate the impact of these failures, survivability solutions involving precomputed backup paths can be used to help maintain connectivity and reduce service downtime. Further improvements to reliability can be gained through the use of on-path caching inherent in Content Centric Networking (CCN). CCN is an alternative networking paradigm that puts the focus on efficiently providing consumers access over the network to content held by producers. As content is returned from a producer, it can be cached at the intermediate routers, allowing that content to be replicated and forwarded out to all known consumers asking for that content. The aim is to improve the reliability of CCN by proposing routing algorithms for connecting many consumers to a set of producers with paths that are survivable in respect to a flexibly-sized failure set. These survivable routes are enhanced through the use of failure aware on-path caching that allows consumers to access content even after the primary connections to producers are severed.

**Conclusion:**

The have presented a number of novel routing solutions that can adaptively find low cost path sets that protect against any number of failures while connecting any number of sources to any number of destinations. This is ideal for CCN, where a large number of consumers could simultaneously demand content from an array of producers that offer that content. By adding in caching strategies designed around putting content in locations accessible on backup paths, content accessibility post-failure can be maximized.

## ABSTRACT

Current CHARON, a cloud-backed computing infrastructure designed to safely, accurately and effectively store and exchange big data using various service services and database servers to satisfy the regulatory specifications of personal data which are private. CHARON integrates three distinctive features, it doesn't need trust in any single person, it doesn't need a client-managed server, and it doesn't require handling huge files efficiently across a number of geo-dispersed computing devices. We have also developed a novel Byzantine-resilient data-centered leasing protocol to avoid write-write conflicts between clients accessing shared repositories. To test CHARON, we can use micro- and application-based simulations to model symbolic workflows from bioinformatics, a common big data field. The results reveal that our creative design is not only realistic, but better than every other cloud-based solution with an end-to - end performance.

## CONCLUSION

CHARON is a cloud-backed file system for storing and sharing big data. Its design relies on two important principles: files metadata and data are stored in multiple clouds, without requiring trust on any of them individually, and the system is completely datacentric. This design has led us to develop a novel Byzantineresilient leasing protocol to avoid write-write conflicts without any custom server.

## FUTURE ENHANCEMENT

In our research work Our results show that this design is feasible and can be employed in real-world institutions that need to store and share large critical datasets in a controlled way.

## ABSTRACT

Co-location information about users is increasingly available online. For instance, mobile users more and more frequently report their co-locations with other users in the messages and in the pictures, they post on social networking websites by tagging the names of the friends they are with. The users IP addresses also constitute a source of co-location information. Combined with location information, such co-locations can be used to improve the inference of the users' locations, thus further threatening their location privacy. As co-location information is taken into account, not only a user's reported locations and mobility patterns can be used to localize her, but also those of her friends. In this paper, study this problem by quantifying the effect of co-location information on location privacy, considering an adversary such as a social network operator that has access to such information. In this Project formalize the problem and derive an optimal inference algorithm that incorporates such co-location information, yet at the cost of high complexity. In this paper some approximate inference algorithms, including a solution that relies on the belief propagation algorithm executed on a general Bayesian network model, and we extensively evaluate their performance. Our experimental results show that, even in the case where the adversary considers co-locations of the targeted user with a single friend, the median location privacy of the user is decreased by up to 62% in a typical setting.

## Conclusion

In this project, we have contemplated the impact on clients' area security when co-area data is accessible, notwithstanding individual (muddled) area data. Apparently, this is the main paper to measure the impacts of co-area data that originates from social connections between clients on the spot security; as such it comprises an initial move towards overcoming any issues between concentrates on the spot protection and informal communities. Without a doubt, most examinations on geo-area and interpersonal organizations take a gander at how social ties can be construed from co-areas among people and how social ties can be utilized to de-anonymize versatility follows. We have indicated that, by considering the clients' areas together, a foe can misuse co- area data to all the more likely restrict clients, thus diminishing their individual security. In spite of the fact that the ideal joint confinement assault has a restrictively high computational intricacy, the polynomial-time estimated derivation calculations that we propose give great limitation execution. A significant perception from our work is that a client's area security is no longer completely in her control, as the collocations and the individual area data revealed by different clients essentially influence her own area protection.

The message of this work is that security instruments must not disregard the social parts of area data. Since it isn't alluring to report sham arrangements of assembled clients (as this data is shown on the clients' profiles on interpersonal organizations), an area security safeguarding instrument needs rather to sum up data about co-found clients or to sum up the hour of a get-together, just as the areas of clients at different areas, so as to decrease the adequacy of the assaults we proposed in this paper. As a first endeavor to

## ACKNOWLEDGEMENT

An endeavor over a long period can be successful only with the advice of many well wishers. I take this opportunity to express my deep gratitude and appreciation of all those who encouraged me to successfully complete the project.

My sincere thanks are due towards to **Dr. S.M.V Narayana**, Principal, Annamacharya Institute of Technology and Sciences (Autonomous), New Boyanapalli, Rajampet, who made me to become a complete student from this college with his dynamic decisions.

With profound sense of gratitude and regards, I acknowledge with great pleasure the guidance and support extended by

**Dr. C. Madana Kumar Reddy**, Head of The Department, Department of MCA, Annamacharya Institute of Technology and Sciences (Autonomous), New Boyanapalli, Rajampet.

I express my sincere thanks to my guide **Mrs. P. Swathi**, Assistant Professor, Department of MCA for her valuable guidance and suggestions in analyzing and testing throughout the period of my project work.

Last but not least, I would like to thank my friends, teaching and non teaching, one and all those who helped me to complete this project successfully.

**P.VENKATA LAKSHUMMA**

**(Regd No: 18705f0021)**

## **Conclusion**

Data has protection in cloud computing through the use of AES algorithm

Under HEROKU Cloud in this project. Data is secured delay for data

Encryption using AES cryptography. The implementation to deploy HEROKU as a cloud platform consists of multiple steps of encryption calculation

Showing that the data is large. HEROKU platform is a secure platform for the

Use of Cloud-based data several issues. HEROKU is mainly used for secure the data by using AES algorithm.

## CERTIFICATE

This is to confirm and certify **Mr. A.Kesava M.C.A**, student of **Annamacharya Institute of Technology & Sciences (Autonomous), Rajampet**. With **Reg.No.18705F0006** has successfully completed his project work titled **“Improving Automated Bug Triaging with Specialized Topic Model”** on JAVA Technologies as part of his course curriculum.

He has done this project using **JAVA** during the period of December 2019 to April 2020 under the guidance and supervision of **Mr.N.Narayana Reddy** from **Logic Systems**.

He has completed the assigned project well within the time frame. He is sincere, hardworking and his conduct during the project is commendable.

For Logic Systems,  
  
(Project Guide)

## ABSTARCT

Bug triage refers to the process of assigning a bug to the most appropriate developer to fix. It becomes more and more difficult and complicated as the size of software and the number of developers increase. In this project, propose a new framework for bug triaging, which maps the words in the bug. propose a specialized topic modeling algorithm named multi-feature topic model (MTM) which extends Latent Dirichlet Allocation (LDA) for bug triaging. MTM considers product and component information of bug reports to map the term space to the topic space. Finally, we propose an incremental learning method named Topic Miner which considers the topic distribution of a new bug report to assign an appropriate fixer based on the affinity of the fixer to the topics. We pair Topic Miner with MTM (Topic Miner MTM). We have evaluated our solution on 5 large bug report datasets including GCC, Open Office, Mozilla, Net beans, and Eclipse containing a total of 227,278 bug reports. We show that Topic Miner MTM can achieve top-1 and top-5 prediction accuracies of 0.4831 - 0.6868, and 0.7686 - 0.9084, respectively. We also compare Topic Miner MTM with Bugzie, LDA-KL, SVM-LDA, LDA-Activity, and Yang et al.'s approach.

## CONCLUSION

Propose a new topic model based bug triaging approach, named Topic Miner and a new topic model, named multi- feature topic model (MTM), which takes into consideration the features of a bug report when assigning topics to words in the report. We have evaluated our solution on 227,278 bug reports from five software systems and demonstrate that Topic Miner MTM outperforms Bugzie, LDA-KL, SVM-LDA, LDA- Activity, and Yang et al.'s approach by substantial margins. Testing can be performed beginning from littlest and most minimal level modules and continuing each in turn. For every module in base up testing a short program executes the module and gives the required information so the module is approached to play out the manner in which it will when installed within the bigger framework.

## ABSTRACT

The various ways of transporting the men materials are high ways railways, waterways, ropeways, pipe ways, airways, belt conveyors etc. Highway engineering deals with designing construction and maintaining the road. Research and development main components are improving road design. Modernization of construction techniques. Introduction of improved material conforming to latest trends. Evolving better and appropriate specifications, encouraging development and use of new technologies etc.

Our project emphasizes on importance of roads, classification of roads, tests conducted on soil in the field for knowing the engineering properties of soil. Design of road by using California bearing ratio method test also conducted on materials used in different layers of road construction. Estimation of materials used in construction of road also included in our project. A good design of roads results in good transportation. Designer should consider volume of traffic in that way which is useful for future expansion of road and should know the properties of materials used in construction for getting our desired strength to the road.

Keywords: Roads, Railways, tests on soils etc.

# CONCRETE PAVING BLOCKS BY USING PVC AND CRUMB RUBBER

## ABSTRACT:

Disposal of crumb rubber and pvc waste in environment is consider to be a big problem due to its low biodegradable and presence in large quantities. Therefore, finding alternative method of disposing waste by using friendly methods are becoming a major research issue. In this research, crumb rubber and pvc waste are mixed in concrete to investigate the possibility to produce concrete paving blocks, and also to study the effect of replacing of cement and sand by fine pvc and crumb rubber waste respectively with different percentages .The experiments were done by replacing of sand with 15% of crumb rubber and replacing of cement with pvc in percentages of 10%,15%,20%,25%,30%.the results show that there is a possibility in increasing ductility and the workability ,which leads to light weight materials.

## CHAPTER 9

### CONCLUSION

This paper discusses a series of tests conducted to characterize concrete paving blocks made with partial replacement of fine aggregates with waste rubber in the form of fine shredded crumbs and replacement of cement with pvc powder. The tests conducted include strength tests i.e., compressive, flexure and impact strengths. Comparisons to conventional concrete paving blocks include derived parameters, such as the impact energy and ductility index. The test results support the initial assumption that concrete pavement blocks have superior toughness and strength compared to conventional concrete blocks. These blocks help mechanize the combined load bearing mechanisms that combine the hinge formation at joints and flexural bending of blocks. Observations from this study are summarized as follows.

- Based on the test results of this study, which show that there is an increase in slump values when crumb rubber content increases up to 20%. This means that the workability of rubberized concrete improves due to the addition of rubber crumbs and is acceptable in terms of the ease of handling, the placing and finishing of wet concrete as compared to normal concrete.
- Compressive strength for various replacement of fine aggregate by crumb rubber there is a decrease in compressive strength with the increase of crumb rubber content. So that the strength goes on decreasing. Crumb rubber can be effectively used as replacement up to 15% by weight of fine aggregate, lightly decreasing the strength compared to controlled concrete.
- The rubberized and pvc concrete pavement blocks have superior toughness and strength compared to conventional load concrete block.
- The flexural strength of concrete increases up to 20% of the crumb rubber and pvc replacement. When the percentage of crumb rubber and pvc replacement increases over 20% the flexural strength begins to decrease. An explanation may be based on tension stain hardening.
- If the suggested fracture arrested by the embedded crumb rubber, then the integration of flexural hardening and joint interlocking would make RCBP a superior roadway pavement system. Future studies should focus on demonstrating the global behaviors of a block pavement system with joint response monitoring.

- The impact resistance of the paving blocks was calculated in two stages: (i) first cracks impact resistance and (ii) failure impact resistance. Both stages of impact resistance were increased by the replacement of sand with crumb rubber up to 20% by volume of sand and cement by pvc up to 20% by volume of cement. The ductility index also increased when the pvc and crumb rubber content increased up to 20% & 15%.
- The incorporation of rubber content to concrete, changes the failure pattern from a brittle mode to ductile mode, which displays the beneficial effects of Portland cement block with crumb rubber, used in absorbing vibrations.
- It is eco-friendly by the use of waste tire for construction applications involved shredding the waste tires into small particles, then using them as replacement for coarse aggregate in concrete and also by the use of waste pvc pipes for construction applications involved shredding the waste pipes into powder form, then using them as replacement for cement in concrete.
- These rubberized and pvc concrete paving blocks in the use of interlocking pavements as alternative for conventional rigid and asphalt pavements reduces maintenance cost and ICB pairs easy to repair.

## ABSTRACT

In India, a major portion of total land area is covered by clayey soil. Of this, a large proportion is expansive soil. Structures constructed over this expansive soil may be severely damaged due to its high swell-shrinkage behavior. So such soils need to be stabilized to increase its strength, durability and to prevent erosion. Various studies have been carried out on expansive soils to improve its properties. Soil stabilization is one of the promising techniques used to improve the geotechnical properties of soil and has become the major practice in construction engineering. This project aims to conduct a study to check the improvements in properties of clayey soil by adding polypropylene fiber. By varying percentage of reinforcement (0%, 0.6%, 1.2%, 1.8%, and 2.4%), the soil parameters such as OMC and UCS may be studied. These values are compared to that of a control specimen.

**Key Words:** Swell, Liquid Limit, Plastic limit, Standard proctor compaction test, Unconfined compressive strength (UCS), Polypropylene fiber and clayey soil.

## CHAPTER 6

### CONCLUSION

#### CONCLUSION

This study investigated the effect of adding polypropylene fiber and strength behaviour of clayey soil. The effect of fiber reinforcement on clayey soil was studied by using the results obtained from a series of liquid limit, compaction and unconfined compression test. Based on the result presented in this paper the following conclusions are drawn.

1. Based on widespread proctor check on soil sample with fiber reinforcement of 0.6%, 1.8% and a pair of 2.4 %, the increase in superior moisture content material (OMC) turned into determined to be 25%, 22% and 15% respectively . The boom within the dry density changed into located to be 1.39g/cc, 1.48g/cc and 1.65g/cc respectively.
2. The consequences from the U.S. Check for soil pattern also are similar, for reinforcements of 0.6%, 1.8% and a pair of. Four%, the growth in unconfined compressive values are 0.0562, 0.0631, 0.0637 and 0.0643 respectively
3. In view of increase in the fiber content, the OMC values of reinforced soil increases up to 0.6% fiber and decreases with the addition of 2.4 % fiber
3. Overall it can be concluded that fiber strengthened soil may be taken into consideration to be appropriate ground development approach especially in engineering projects on susceptible soils where it can act as a substitute to deep/raft foundations ,reducing the cost as well as energy.
4. Also the strength of the clayey soil was improved due to fiber addition and can be concluded that PP fiber can be used effectively for the stabilization of clayey soil.

## ABSTRACT

Concrete is most widely used construction material in the world. The present trend in concrete technology is towards increasing strength and durability of concrete to meet the demands of the modern construction. Concrete plays a vital role in construction field. It is a fact that concrete is strong in compression but brittle and weak in tension. In order to overcome this problem generally steel reinforcement is used. Fiber reinforced concrete (FRC) is a concrete in which small and discontinuous fibers are dispersed uniformly. The fibers used in fiber reinforced concrete may be of different materials like steel, carbon, glass, aramid, nylon, asbestos, polypropylene, etc. The addition of these fibers into concrete mass dramatically increase the compressive strength, tensile strength, flexural strength and impact strength of concrete.

In the present experimental investigation the glass fiber and nylon fiber have been used to study compressive strength and tensile strength on M30 grade concrete. In this study we choose five percentages of glass fiber and nylon fiber as 0%, 1%, 1.25%, 1.5%, 1.75% & 2% by cement weight. As a part of experimental work standard size cubes & cylinders were casted and tested to evaluate 14 & 28 days compressive and split tensile strength of the above concrete mixes.

**Key words:** Glass fiber, Nylon fiber, compressive strength, Split tensile strength.

## CHAPTER-5

### CONCLUSION AND RECOMMENDATIONS

#### 5.1: Conclusions:

The following conclusions may be drawn from the present experimental work:

1. The compressive strength of the cubes of 14 days as well as 28 days the strength has been increased at 1.25% with glass fiber and then the strength has reduced after further addition of glass fiber.
2. The split tensile strength of cylinders of 14 & 28 days the highest strength attained at a percentage of 1.25% glass fiber and above 1.25% of fibers shows reduction in tensile strength.
3. The compressive strength of the cubes of 14 days as well as 28 days the strength has been increased at 1% of replacement of cement with nylon fiber and then the strength has reduced after further addition of nylon fiber.
4. The split tensile strength of cylinders of 14 & 28 days the highest strength attained at a percentage of 1% addition nylon fiber and then after that the tensile strength decreases
5. The comparison of compressive strength of glass and nylon fiber shows that the glass fiber has more effect than the nylon fibers in increasing the compressive strength.
6. The comparison of tensile strength of glass and nylon fiber shows that the glass fiber has more effect than the nylon fibers in increasing the tensile strength.
7. There is improvement on mechanical properties of concrete with addition of both nylon and glass fibers up to certain percentage in the present case -.

## ABSTRACT

Cement concrete continuous pre-eminent construction materials for use in any type of civil engineering applications. Performance of any civil engineering structures in terms of their strength and stability has with stood the test of time but the life span of the structures has become a matter of concern. The calcium bentonite clay is replaced as a partial replacement of cement, it is also termed as Indian Bentonite Cement (IBC) when it is replaced with cement. Bentonite is an eco-friendly material, doesn't cause any damage to the environment. It is also a binding material. In this project we are using ordinary Portland cement of M50 grade, the cement is partially replaced with (0%,5%,10%) of Calcium Bentonite. Firstly, the basic tests are carried with the cement. Then experimental tests are compressive strength, split tensile strength, flexural strength are done for cubes, cylinders and beams casted with M50 design mix with a water-cement ratio 0.38. The strength can be calculated for 7,14,28 days for the specimens.

# EFFECT ON STRENGTH PROPERTIES OF CONCRETE BY PARTIAL REPLACEMENT OF CEMENT WITH CALCIUM BENTONITE CLAY

---

## CHAPTER -7

### CONCLUSION AND SCOPE FOR FUTURE INVESTIGATION

#### 7.1 GENERAL

The present study reported the efficiency of using calcium bentonite clay (waste recyclable material) for the partial replacement of cement in concrete. Since calcium bentonite is very fine material having the bonding property as the cement .

#### 7.2 CONCLUSION

Based on the investigation , the following results were stressed.

- The exploitation of calcium bentonite in concrete provide additional environmental as well as technical benefits to the related industries. Partial replacement of calcium bentonite with cement reduces the cost of making concrete.
- Replacement of calcium bentonite with cement decreases the self weight of concrete specimen slightly because the specific gravity of calcium bentonit clay is less as compared with cement
- Initial setting time decrease with increase of percentage of calcium bentonite in cement and the setting time of concrete also decreases.
- The water absorption capacity of calcium bentonite is more therefore the workability of concrete decreased with increase in percentage of calcium bentonite in cement.
- The compressive strength increases when the cement is replaced with small amount of calcium bentonite clay. Further increases the strength decrease gradually.
- At small amount of calcium bentonite with cement the bonding nature is high for calcium bentonite . By increase of percentage it loses the bonding capacity with coarse aggregate.
- Split tensile strength and flexural strengths are also high at small percentage of 5% replacement only.
- There was additional than 5% the strength parameters are decreased.

## **EFFECT ON STRENGTH PROPERTIES OF CONCRETE BY PARTIAL REPLACEMENT OF CEMENT WITH CALCIUM BENTONITE CLAY**

---

- Consumption of calcium bentonite as Portland cement replacement in concrete and a cement raw material has the dual benefit of eliminating the cost of disposal and lowering the cost of the concrete .
- Experiential that , the calciumbentonite replacement is more effective than conventional concrete .
- If the water content increases the mixer may gives the satisfactory results\* in case of workability with no effect on strength.

### **7.3 Scope for future investigation**

- This investigate was to examine the influence of calcium bentonite additions in concrete and RCC elements .
- From 5% the strength parameters increased. So it may increases the strength in between 0% to 5% replacement .
- Calcium bentonite can be efficiently replaced in making paving blocks .
- Calcium bentinite also have the geo technical scope assoil stabilizer.

## *SMART DRIVING LICENSE AUTHENTICATION USING IOT/LabVIEW*

### **CONCLUSION AND FUTURE SCOPE**

In this project a prototype robot vehicle is developed and five sensors are fixed at various positions to sense the path travelled by robot. For sending the information from sensors to the computer based system Zigbee module and Arduino controllers are utilized. The original path on which driver has to drive the vehicle is primarily stored in the computer and actual path driven by the driver is received from the sensors and based on this information computer will generate a message that the license generated successfully or not. This system will bring the transparency into the driving license systems and also helpful to issue driving license to the peoples who is having good driving skills.

#### **Future scope**

Due to the limitations of cost and time this project is implemented on a proto type models. For testing purpose, a proto type driving track is utilised. This project may be implemented on real time driving track.

## 7.CONCLUSION

The proposed ANFIS-based IFOC for an IM drive fed by FSTP inverter has been effectively implemented by a computer simulation. The dynamic speed response of the IM drive at low speeds is improved using the ANFIS which is designed with low computation burden to be appropriate for real-time applications. The validity of the proposed ANFIS has been examined both in simulation at various speed reference tracking and load torque disturbances, particularly at low speeds. To confirm the efficacy of the proposed controller, a fair performance comparison of the proposed ANFIS-based IM drive with FLC has been presented. The robustness of the two controllers has been also examined under parameters variation, especially motor inertia, and stator and rotor resistances. Comparative simulation results demonstrate that the proposed ANFIS of a 63 level MLI inverter fed IM drive is superior to the FLC under speed tracking, load disturbances, and parameters variation. The usefulness of the ANFIS has been verified by its high dynamic speed response without overshoot and undershoot, and with zero steady-state error, and less THD of stator currents. This shows the good capability of ANFIS controller during speed tracking performance, disturbance rejection, and parameters variation. The proposed IM drive system is also suitable for cost-effective low power industrial applications.

## CONCLUSION

The proposed micro-grid system fed from REGS has been found suitable for meeting load requirement of a remote isolated location comprising few households. REGS comprises of wind and solar energy blocks, which are designed to extract the maximum power from the renewable energy sources and at the same time, it provides quality power to the consumers. The system has been designed for complete automated operation. This work also presents the sizing of the major components. The performance of the system has been presented for change in input conditions for different type of load profiles.

Under all the conditions, the power quality at the load terminals, remains within acceptable limit. The effectiveness of the system is also presented with test results with prototype in the laboratory. The system has also envisaged the external battery charging by utilizing the rotor side converter and its sensors for achieving rectifier operation at unity power factor.

## CONCLUSION

The proposed micro-grid system fed from REGS has been found suitable for meeting load requirement of a remote isolated location comprising few households. REGS comprises of wind and solar energy blocks, which are designed to extract the maximum power from the renewable energy sources and at the same time, it provides quality power to the consumers. The system has been designed for complete automated operation. This work also presents the sizing of the major components. The performance of the system has been presented for change in input conditions for different type of load profiles.

Under all the conditions, the power quality at the load terminals, remains within acceptable limit. The effectiveness of the system is also presented with test results with prototype in the laboratory. The system has also envisaged the external battery charging by utilizing the rotor side converter and its sensors for achieving rectifier operation at unity power factor.

## ABSTRACT

Mild steel is an attractive option for structural components in industrial and mechanical applications due to its low cost and high availability factors. Low carbon alloys are easy to form good structures. Weldability is the major concern for joining the structural components where it leads to micro structural changes, variation in mechanical properties and more corrosion when compared to a base metal. An attempt is made to weld the base metal joining by using fusion welding processes such as Shielded Metal Arc Welding (SMAW) and applied metal coating on the welded joint to overcome the above said problems. Even though different coating materials are available, Ni-Cr is selected as coating material because of its good properties and having more elasticity. The coated weld specimen is tested for tensile strength on an universal testing machine by conducting tensile test. The tensile test results are analyzed and observed that there is an improvement in the tensile strength of the mild steel welded joints by Ni-Cr coating to a maximum thickness of 300microns on weld area when compared with non coated mild steel welded joints.

---

## CHAPTER 6

### CONCLUSION

The welded joint of mild steel plates is coated with Ni-Cr [60%, 20%] by plasma spray coating process. After coating process the workpiece is tested for tensile strength. Out of four specimens three specimens are coated with Ni-Cr mixture and one specimen is uncoated. The tensile strength of the coated specimen is slightly increased on comparing with the uncoated specimen with increasing coating thickness as 200, 250, 300 microns. But the thickness of coating cannot be increased beyond 300 microns ( $\mu\text{m}$ ) as the coating may not adhered firmly to the work piece at higher coating thickness. The Tensile strength of uncoated specimen is 145MPa and tensile strength of the coated specimens is 147.5MPa, 162.5MPa, and 163.75MPa. for 200  $\mu\text{m}$ , 250  $\mu\text{m}$ , 300  $\mu\text{m}$  respectively. Hence the strength of the welded joint is improved by coating with Ni-Cr mixture.

## ABSTRACT

Materials play an important role in the development of product for many applications. Biomaterials is defined as any nonliving materials used in medical devices intended to interact systems. Biomaterials are the class of materials abundantly used as dental implants, orthopedic implants, tissue replacements, supports, replacement of joints in human body parts like HIP, Knee etc in biomedical field. Biomaterials are biocompatible which are having an appropriate response with the host for a specific application. Medical implants can improve the lives of patients and quite often it can bring patients to normal activity in personal and professional life. In a recent study in India, about seven crore people suffer from joint related problems, and this incidence is expected to raise. Further more, the worldwide sale of orthopedic implants in 2003 alone was \$ 8.7 billion and projected to increase at an annual growth rate of 12.5%. In order to control the biodegradation of magnesium alloys, their surface is to be modified. The ZM21 alloy is coated with zirconium oxide and tricalcium phosphate by plasma spray coating technique. The degradation behaviour is studied by conducting corrosion test and electrochemical testing. A comparable is made by coated and uncoated material. There is a improvement is observed in the degradation of coated ZM21 alloy. Compared to uncoated and coated material.

## CONCLUSION AND FUTURE SCOPE

In the present work ZM21 Mg alloy is coated with ZrO<sub>2</sub> and TCP particles by using plasma spray method. The corrosion test on coated samples and uncoated samples is performed by using electro chemical test. A comparison is made between the coated and uncoated Mg alloys. ZM21 Mg alloy coated with ZrO<sub>2</sub> and TCP particles exhibit good corrosion resistance comparing samples without ZrO<sub>2</sub> and TCP particles. The percentage of improvement in the corrosion resistance is about 72%.

**Table 7.1 Comparison is made between the coated and uncoated Mg alloys:**

Specimen	E <sub>corr</sub> (mV)	I <sub>corr</sub> (μAcm <sup>2</sup> )	β <sub>a</sub> (mV/dec)	β <sub>b</sub> (mV/dec)	Corr. Rate (mmpy)
ZM21 Mg alloy	-1023.424	61.19	111.8	148.6	0.453
	-1015.457	72.015	111.0	96.5	0.311
ZrO <sub>2</sub> and TCPcoated Mgalloy	-1041.092	130.929	139.3	43.9	0.127
	-1030.73	306.956	235	131.8	0.119

## FUTURE SCOPE

1. The work can be carried with different coating materials
2. The porosity and grain structural modifications may also be carried effective functioning under physiological conditions.
3. To observe the microstructure difference between coated sample and uncoated samples.
4. Medical and automotive applications

Scaffolds are promising for treating bone defects in bone tissue engineering. Such scaffolds should be osteoconductive, degradable and bioactive, and should have a complex three-dimensional (3D) interconnected porous network and strong mechanical loading properties. The study showed that Sr-MBG scaffolds had uniform interconnected macropores and high porosity. The physicochemical and biological properties of Sr-MBG scaffolds were good in ion dissolution, apatite-forming ability and proliferation and extracellular matrix mineralization of osteoblast-like cells MC3T3-E1. We fabricated strontium-containing mesoporous bioactive glass (Sr-MBG) scaffolds with controlled architecture using a three-dimensional (3-D) printing technique of pneumatic extrusion. Morphological and Elemental compositions for the developed were analysed using SEM and ADEX techniques. Finally, we identified that, developed scaffolds has good morphological details as specified.

## CONCLUSION

This work investigated the feasibility of fabrication on human bone scaffolds with bio polymer by utilizing 3D printed machine this method would allow the process to incorporate heat to the polymer to extrude the material freely .Temperature that has been maintained for the extrusion of polymer is about 90<sup>0</sup>C to develop the required shape with the developed machine 50mm/min feed rate was maintained for both X and Y axis. Layer thickness of the product is 85% for the 0.3mm inner diameter of nozzle. The infill percentage is about 50%. Finally we developed tailored bone scaffold successfully.

## ABSTRACT

Electrochemical Machining (ECM) process, removal of metal by electrochemical dissolution, one of the contactless processes where the electrical energy is used to produce the chemical reaction. Due to huge demand in the complex profile machining in the industries, the ECM offers such as impressive advantages like machining of curved shapes, single tool to machine a large number of pieces, tool life is high etc., in machining of high strength temperature resistant alloys, cutting of curvilinear slots, production of long curved profiles, machining of gears and connecting rods. Such a kind of processes required number of input and outputs are to be considered together. The work uses decision-making techniques called Multi-objective Optimization based on the ration analysis (MOORA), in solving four illustrative examples. This method was compared with the Technique for order preference and similarity to ideal solution (TOPSIS) in terms of the flexibility and computation time. A MATLAB code was developed to solve the examples and considered as one of the decision support systems. This proves the application of MOORA in adaptability to the real world manufacturing system.

**CONCLUSIONS**

The application of MOORA method for decision making in the electrochemical process to select the optimal machining parameters for the four illustrative examples was evaluated. This method is simple and computational easy for the decision maker in the evaluation of the alternatives. The calculation time taken for the evaluation is also less compared to the TOPSIS method. With the developed MATLAB code the decision maker can easily select or interchange the process parameters with high flexibility. Development of graphic user interface for such kind of problems can be done in the future.

## ABSTRACT

This Studies discuss an investigation into the use of Taguchi Parameter Design methodology for Parametric Study of CNC turning operation for surface roughness as a response variable. The Taguchi parameter design method is an efficient experimental method in which a response variable can be study, using experimental runs than a factorial design method. The control parameters for this operation include speed, feed rate, and depth of cut. A entire of 09 experimental runs were conduct by means of an orthogonal array, and the model arrangement of convenient factor levels was determined for the surface roughness and signal-to-noise ratio. Taking major cutting parameters into consideration and using multiple regressions, numerical models relating to surface roughness (Ra) are recognized to investigate the influence of cutting parameters during turning. A affirmation run was used to confirm the results, which indicated that this method was both capable and effectual in determining the best turning parameters for the surface roughness. Affirmation test results established the fact that the numerical models are found to be effectively when representing the machining performance criteria.

## CHAPTER-9

### CONCLUSION

This examination existing a proficient technique for deciding the ideal turning task parameters for surface completion under shifting conditions using the Taguchi parameter configuration process. This procedure was connected utilizing a particular arrangement of control and commotion parameters, and a reaction variable of surface harshness. The utilization of the L9 (3 ) symmetrical cluster, with four control parameters enabled this investigation to be directed with an example of 27 work pieces. The examination found that the control factors effectually affected the reaction alterable, with feed rate and instrument nose range having the most noteworthy impacts. The sound elements, then again, were found to not have a factually recognizable impact. The investigation prompted the decision of a blend of levels for each control parameter, which were utilized to make an extra example of 10 work pieces. The amount of the work pieces in this affirmation run prompted the end that the chose parameter esteems from this procedure delivered a surface unevenness that was much lower than the other mix tried in this examination. Taguchi strategy has been extremely winning in planning great items and procedures of a wide range of fields. In it the plan skyline is expanded to trouble specialized and economical properties critical to the item. The arranged investigation on the impact of clamors in the early plan stage is better than regular methodology. The various blends of structure parameter settings can't effectively be constrained by human judgment, which results in time and cost wild however can without much of a stretch, be constrained by utilizing DOE system. The Taguchi strategies offer a technique for finding ideal, stable outcomes dependent on a predefined set of investigated limitation mix. Vigorous Design takes up the ideas of the Taguchi technique and offers a standard, homogenous methodology dependent on real and specialized learning. Plan of examination is required to acquire right answers on framework activities and association impacts, exceptionally when made on premise of partial factorial structures.

## ABSTRACT

Friction Stir Welding (FSW) is a solid state joining process the frictional heat is generated between the wear-resistant tool and the work pieces this heat along with that generated by the mechanical mixing process and the adiabatic heat within the material cause the stirred materials to soften without melting. As the tool is moved forward a special profile on the probe forces plasticized material from the leading force to the rear, where the high forces assist in a forged consolidation of the weld.

Friction Stir Welding creates high quality high strength joints with low distortion and is capable of fabricating either butt or lap joints in a wide range of material thickness. The solid state nature of FSW leads to several benefits over fusion welding methods as problems associated with cooling from the liquid phase are avoided. Issues such as porosity, solid redistribution, solidification cracking and liquation cracking do not arise during FSW. In general, FSW has been found to produce a low concentration of defects and is very tolerant of variations in parameters and materials.

In this study, Friction Stir Butt Welds made of similar materials namely Aluminium 2618 performed with various welding parameters. This study deals with the influence of process parameters on friction stir welded butt joint. FSWW parameters such as tool rotational speed, welding speed, tool tilt angle and addition of alumina and silicon carbide powders in percentages as reinforcements in groove prepared at weld portion are play a significant role in the assessment of mechanical properties that decide the weld quality. Experiment has been conducted in 9 joints for each weld plate of 6mm thick tested for its tensile test and hardness test. Using Taguchi influence of FSW process parameters were predicted.

↳ PC

# CONCLUSION AND FUTURE SCOPE

## 6.1 Conclusion

- ❖ From the results obtained for 2618A it can be concluded that
  - The ultimate tensile strength is 128.809 MPa, determined at specimen weld no.3 gives nearer to base material strength is 115.50 MPa as compared to other specimen welds and its parameters are 700 rpm, 25 mm/min, 1 degree and 2618A(Al<sub>2</sub>O<sub>3</sub>+SiC)
  - By increasing the Tool Rotational Speed, the Tensile Strength increases effectively and the same result will be observed from Welding Speed but when weld speed increases the Tensile Strength is fluctuates.
  - The hardness of base material is 60.5 BHN is increased to 80.8 BHN at welded portion, determined at specimen weld no.5 and no.7 gives higher hardness as compared to other specimen welds and its parameters are 900rpm, 20 mm/min, 1 degree and 2618A(Al<sub>2</sub>O<sub>3</sub>+SiC) and 1100 rpm, 16 mm/min, 1 degree and 2618A(Al<sub>2</sub>O<sub>3</sub>+SiC) respectively.
  - By increasing the Tool Rotational Speed the Hardness decreases, but the Hardness increases when Welding Speed increases.

## ❖ From the Taguchi for 2618A

- From the main effect plot graph shown in figure 6.1 obtained from Taguchi, good Tensile Strength can be obtained at these optimum parameters i.e., 700 rpm, 25 mm/min 1° and 2618A(Al<sub>2</sub>O<sub>3</sub>+SiC) which is most significant and applicable value among all input parameters.
- From the main effect plot graph shown in figure 6.3 obtained from Taguchi, higher Hardness can be obtained at these optimum parameters i.e., 900 rpm, 16 mm/min and 1100 rpm, 20 mm/min, 1° and 2618A(Al<sub>2</sub>O<sub>3</sub>+SiC)and 2618A(Al<sub>2</sub>O<sub>3</sub>+SiC), which is most significant and applicable value among all other parameters.

## ❖ 6.2 Future Scope

- ❖ In the present work, tool Rotational speed, Traversing speed and Axial force are considered as main influencing parameters. Tool geometry, vibration and temperature effects can also be taken as influencing parameters.
- ❖ Effects of selected parameters on Fractography technique can be studied.

- ❖ Finite Element Analysis can also be conducted to predict the strength of the joint.
- ❖ The use of Immune algorithm, ABC algorithm and Fuzzy logics may have the ability to adapt the problem being solved.

## ABSTRACT

*The detailed study of blood vessels structure in the fundus images of retina of eye is an indicator of many diseases like glaucoma, cataract and blindness etc., The accuracy of the image obtained by retinal blood vessel segmentation determines the efficiency of the retinal image analysis which is used in the diagnosis methods in the ophthalmology. Enhancing the contrast of an image is one of the vital steps in any of retinal blood vessel segmentation approaches that we are using. The dependency of the segmented image depends on the exactness of the contrast over the entire image. The proposed paper gives an assessment of the compatibility of a newly invented spatial adaptive contrast enhancement technique for enhancing fundus images of retina for the blood vessel segmentation. The proposed enhancement technique was combined with a special algorithm called Coye algorithm, which uses blood vessel reconstruction method based on improved hough line transformation. The obtained results conveys that the employed enhancement technique is amply suitable for the specified application in the medical field.*

## **CONCLUSION AND FUTURE SCOPE**

By observing the output images of the fundus images which are taken from the fundus camera, we can clearly see that the output of the tyler coye algorithm performed better result . It clearly enhanced the output of the contrast limited adaptive histogram equalization method of segmenting the fundus images. This output of the proposed method is used for determining the type of pathology more accurately as the blood vessels are very clearly visible. Tyler Coye algorithm also reduced the computational power and time as the unwanted data (back ground) is excluded at the beginning of the processing. Future work is to provide quantitative method of analysing the various parameters like true positive rate, false positive rate, and accuracy

## ABSTRACT

With the appearance of innovation scaling, the principle adage of planning the hardware gadgets as low power utilization. The use of the electronic gadgets expanded step by step. The general population wishes to purchase an electronic gadget like less weight and low power utilization. So getting ready of low power and less weight electronic gadgets turns into a noteworthy test to all the electronic creators. We propose a hybrid full adder comprises of low power utilization and postponement. adaptation 13.0. In these circuits for XOR/XNOR and synchronous XOR- XNOR capacities are proposed. The proposed circuits are exceptionally upgraded regarding the power utilization and delay. We additionally propose new hybrid 1-bit full-Adder (FA) circuits dependent on the novel full-swing XOR- XNOR or XOR/XNOR gates. Every one of the proposed circuits has its very own benefits regarding speed, power utilization, driving capacity, etc. To research the execution of the proposed circuits, T-Spice and Tanner EDA Tool of version 13.0 simulations are performed. The simulation results, in CMOS process technology model, demonstrate that the proposed circuits have high speed and power against other Full Adder structures. The proposed circuits are examined as far as varieties of the supply and threshold voltages, the size of transistors.

## **CHAPTER 7**

### **CONCLUSION**

In this, we initially assessed the XOR/XNOR and XOR- XNOR circuits. The assessment uncovered that utilizing the NOT gate on the critical path of a circuit is a disadvantage. Another disadvantage of a circuit is to have a positive feedback on the yields of the XOR- XNOR gates for repaying the output voltage level. The feedback circuits consume more power. At that point, we proposed new XOR/XNOR and XOR- XNOR gates that don't have the referenced detriments.

At long last, by utilizing the proposed XOR and XOR- XNOR gates, we offered FA cells for different applications. The proposed Full Adders are simulated and the Full Adders have good performance. Additionally, this cell has better speed and energy at all supply voltages going from 0.65 to 1.5 V when is contrasted and other FA cells.

## ABSTRACT

Remote Sensing has been globally used for knowledge elicitation of earth's surface and atmosphere. Land cover mapping, one of the widely used applications of remote sensing. Remote Sensing is the science of acquiring information about the earth's surface without actually being in contact with it. This is done by sensing and recording reflected or emitted energy and processing, analyzing, and applying that information. Remote sensing is very useful in the formulating and implementation of the spatial and temporal changes which are essential component of regional planning to ensure the sustainable development.

Land is the basic building block of human civilization. By nature, this precious gift cannot be expanded. To make best use of land and its natural resource, we need good factual knowledge of the land and its features. Accurate knowledge on land-use is very vital for planning and efficient operation. The satellite image is one of the sources which can capture the temporal nature of this knowledge for land utilization. A wide research area has been established in solving the problem of automatic image classification and Land cover mapping. Land cover mapping information can be used to audit land usage, in the context of city planning and land-usage. The processing of producing thematic map from remotely sensed imagery is called image classification. In one or more spectral bands digital numbers are used to represent to spectral information. This information is used for digital image classification. Individual pixels are classified using this spectral information. For classification multispectral satellite images are used. Image classification can be supervised and unsupervised. This project deals with unsupervised classification.

In this project a state of art optimization technique is proposed to classify the satellite images and the performance is measured and compared with the existing algorithms in terms of classification accuracy and kappa coefficient. This project will be implemented on MATLAB software .

## CHAPTER-6

### CONCLUSION

In this project, Satellite image classification done with sensitivity (PSO) and proposed method (PSO+SVM). This proposed method contains 3 Stages. First stage is pre-processing where the input image can be deposed and enhanced using median filter. Second stage the objectives are classified with the optimization. In third stage the features of classified image can be obtained statistically. From statistical values it is concluded that proposed method as better values than existing method.

In future some advanced pre-processing techniques and other optimization algorithms can be used to improve the classification accuracy.

# A RETINAL BLOOD VESSEL TRACKING BY USING GAUSSIAN PROCESSING AND RADON TRANSFORM

## ABSTRACT:

The main objective of tracking and diameter estimation of retinal blood vessels can be important for diagnosis of several pathologies related to diabetes, cardiovascular disorders, and hypertension. The need of Extraction of blood vessels in retinal images is an important step for computer-aided diagnosis of ophthalmic pathologies.

We will propose an approach for blood vessel tracking and diameter estimation. In this we will estimate the analysis by using existing and proposed methods. The existing methods also discriminate in to two types those are Gaussian process and radon transform for better illustration.

The proposed method is divided into three main steps: Developing a probabilistic algorithm for tracking the centerline in a simple vessel which is the base algorithm, Generalizing the basic algorithm to detect bifurcations and extracting the whole vessel tree, Estimating the diameters of the vessel lumen through an approach similar to the basic algorithm.

The performance is evaluated based on classification of pixels into positive (vessel) and negative (background) groups. At the final stage of the tracking step, the centerline and diameter tracking results are used to construct a binary image, segmenting the vascular network from the background.

## **CHAPTER 7**

### **CONCLUSION AND FUTURE SCOPE**

Thinking about the flare-up of diabetes, its impact on retinal vessels and the expanding interest for occasional examination of retinal pictures, the programmed investigation of retinal pictures is a pertinent issue in the preparing of medicinal pictures. In this paper, we displayed another way to deal with following the middle lines of veins and their widths dependent on GP and Radon change. We expected that the ebb and flow and distance across of a solitary section of a vessel are GPs whose piece parameters are advanced by amplifying the information likelihood. The proposed strategy has been appeared to be strong to commotion and consequently fit for following slight structures and focal blood vessel reflexes where the nature of the flag drops extensively. This property is first because of nearby power mix used to figure the Radon changes. What's more, the middle line smoothness is authorized by spatial relationships of GP forecasts. Contrasted with different techniques, the outcome is an expanded dimension of particularity. The proposed technique estimates the vessel breadths legitimately and distinguishes the bifurcation focuses which might be valuable for further post - quantitative and compositional investigation. The technique proposed depends on turning around covariance frameworks and PC line integrals for radon changes, which can be computationally costly. The improvement of an instrument to make the calculation computationally increasingly effective is one conceivable intriguing exploration course.

## **PROTECTION OF CROPS FROM WEATHER CALAMITIES USING SATELLITE COMMUNICATION AND WIRELESS SENSOR NETWORK**

### **ABSTRACT**

Agriculture is a backbone of our country. About 70% of our country's revenue comes from agriculture. During heavy rain falls, the farmers face lot of problems because their cultivated crops get washed off or destroyed. So in order to avoid this problem this project is designed, which helps in protecting the crops from heavy rainfall and saving that rain water to use it for other purposes. To protect the crops, farmers deploy labour during day and night or if fields are small, farmers on their own protect the crops and also the farmers are take crops which is totally depends on the weather or natural conditions. The saved water can be used for feeding animals, washing, cooking etc. In this system an automatic roof is inculcated which works by taking the signals from the rain and soil moisture sensors and covers the whole field to protect it from heavy rains. In this system an automatic roof is inculcated which works by taking the signals from the rain and soil moisture sensors and covers the whole field to protect it from heavy rains. Whenever there is rainfall the rain sensor gets activated. GSM (Global System for Mobile communication) is a digital mobile network that is widely used by mobile phone users in Europe and other parts of the world. So that GSM is used to report the details about irrigation. The report from the GSM is send through the android mobile.

## CHAPTER 5

### CONCLUSION

In day to day life agriculture is one of the most important parts in every human's life. Many farmers are carried out on road and on field operations this will increase the time and man power. This paper is effectively used for the farmers for reducing the man power and accesses their crops in an efficient way. This might reduce the time and work ors that are used of the farmers. This is a less cost process that contains various sensors to sense various parameters and this can be used effectively by the farmers using their mobile phone. And this can be carried out using GSM protocol where it uses a normal hardware and software components.

In our project we have designed a model to help the farmers in rural zones.

- Our Remote Controller could be installed on existing pump sets for a nominal cost.
- Operating our Remote Controller does not require any special skills. It is as simple as sending a SMS or a missed call.
- The user can send a SMS message from anywhere in the world to operate this equipment. The security feature in the software will make sure that it works only with pre-assigned phone numbers.
- Implementation of Wireless Sensor Networks

#### 5.1 ADVANTAGES

- Low power consumption and easy to install.
- Field protection against storms, floods etc
- Safety against rains and Excess Solar Energy
- Increase in Yield
- Wastage of water can be reduced.
- By automatic control of DC motor, we can reduce power consumption.
- Easy of operation

#### 5.2 APPLICATIONS

It can be applied in the following areas,

- Gardens
- Farms
- Agriculture

## ABSTRACT

Secure secret word stockpiling is an indispensable viewpoint in frameworks dependent on secret key verification, which is as yet the most generally utilized validation strategy, regardless of its some security flaws. In this paper, we propose a secret phrase validation structure that is intended for secure secret phrase stockpiling and could be effectively incorporated into existing confirmation frameworks. In our system, first, the got plain secret phrase from a customer is waded through a cryptographic hash work (e.g., SHA-256). Then, the hashed password is converted into a negative password. At long last, the negative secret word is scrambled into an Encrypted Negative Password (shortened as ENP) utilizing a symmetric-key calculation (e.g., AES), and multi-cycle encryption could be utilized to additionally improve security. The cryptographic hash work and symmetric encryption make it difficult to split passwords from ENPs. Besides, there are bunches of relating ENPs for a given plain secret word, which makes precomputation assaults (e.g., query table assault and rainbow table assault) infeasible. The calculation intricacy investigations and correlations demonstrate that the ENP could oppose query table assault and give more grounded secret key insurance under wordreference assault. It merits referencing that the ENP does not present additional components (e.g., salt); other than this, the ENP could at present oppose precomputation assaults. In particular, the ENP is the first secret phrase insurance plot that consolidates the cryptographic hash work, the negative secret phrase and the symmetric-key calculation, without the requirement for extra data aside from the plain secret word.

## **Authentication Using Encrypted Negative Password**

---

### **12. CONCLUSION**

In this system, the passages in the verification information table are ENPs. At last, we dissected and thought about the assault multifaceted nature of hashed secret word , salted secret phrase , key extending and the ENP. The outcomes demonstrates that the ENP could oppose query table assault and give more grounded secret word insurance under lexicon assault. It merits referencing that the ENP does not require additional components while opposing query table assault.

## ABSTRACT

A cloud platform gives consumers access to shared data storage. Validating data efficiently is required to ensure shared data integrity. The integrity of shared data is verified using an audit technique that allows group members to edit data, although this technique results in complex calculations for the group members. The designated agent's audit methodology uses a lightweight calculation for group members, but it ignores the security vulnerabilities that exist between group members and agents. A lightweight secure auditing technique for shared data in cloud storage (LSSA) is suggested using Hashgraph technology and a Third Party Medium (TPM) management method, which results in group security management as well as a lightweight calculation for group members. Meanwhile, to improve agent security, a virtual TPM pool is created by combining Transmission Control Protocol (TCP) sliding window technology and interconnected functions. We test our scheme using numerical analysis and experiments, and the results show that it achieves lightweight computing for group members while also ensuring data verification for security.

## 9. CONCLUSION

In this project, we proposed a provable shared data possession for a lightweight and security audit process in cloud storage. By introducing a Hashgraph, the traceability of group membership is achieved, and the illegal behaviours of group members can be contained through Hashgraph technology. By specifying multiple TPMs for calculation and management according to the TPM management strategy, each group member and each TPM are independent of one another, which ensure that the cloud data verification process is secure and achieves a lightweight calculation of the TPM. Through a security analysis, the scheme in this paper can avoid replay attacks and replace attacks while protecting the identity privacy and data privacy of group members and ensuring secure storage of the shared data. Therefore, this scheme has important significance and value for the secure storage of shared data.

## ABSTRACT

Wireless sensor networks (WSNs) are increasingly being deployed in security-critical applications. Because of their inherent resource-constrained characteristics, they are prone to various security attacks, and a black hole attack is a type of attack that seriously affects data collection. To conquer that challenge, an active detection-based security and trust routing scheme named ActiveTrust is proposed for WSNs. The most important innovation of ActiveTrust is that it avoids black holes through the active creation of a number of detection routes to quickly detect and obtain nodal trust and thus improve the data route security. More importantly, the generation and distribution of detection routes are given in the ActiveTrust scheme, which can fully use the energy in non-hotspots to create as many detection routes as needed to achieve the desired security and energy efficiency. Both comprehensive theoretical analysis and experimental results indicate that the performance of the ActiveTrust scheme is better than that of previous studies. ActiveTrust can significantly improve the data route success probability and ability against black hole attacks and can optimize network lifetime.

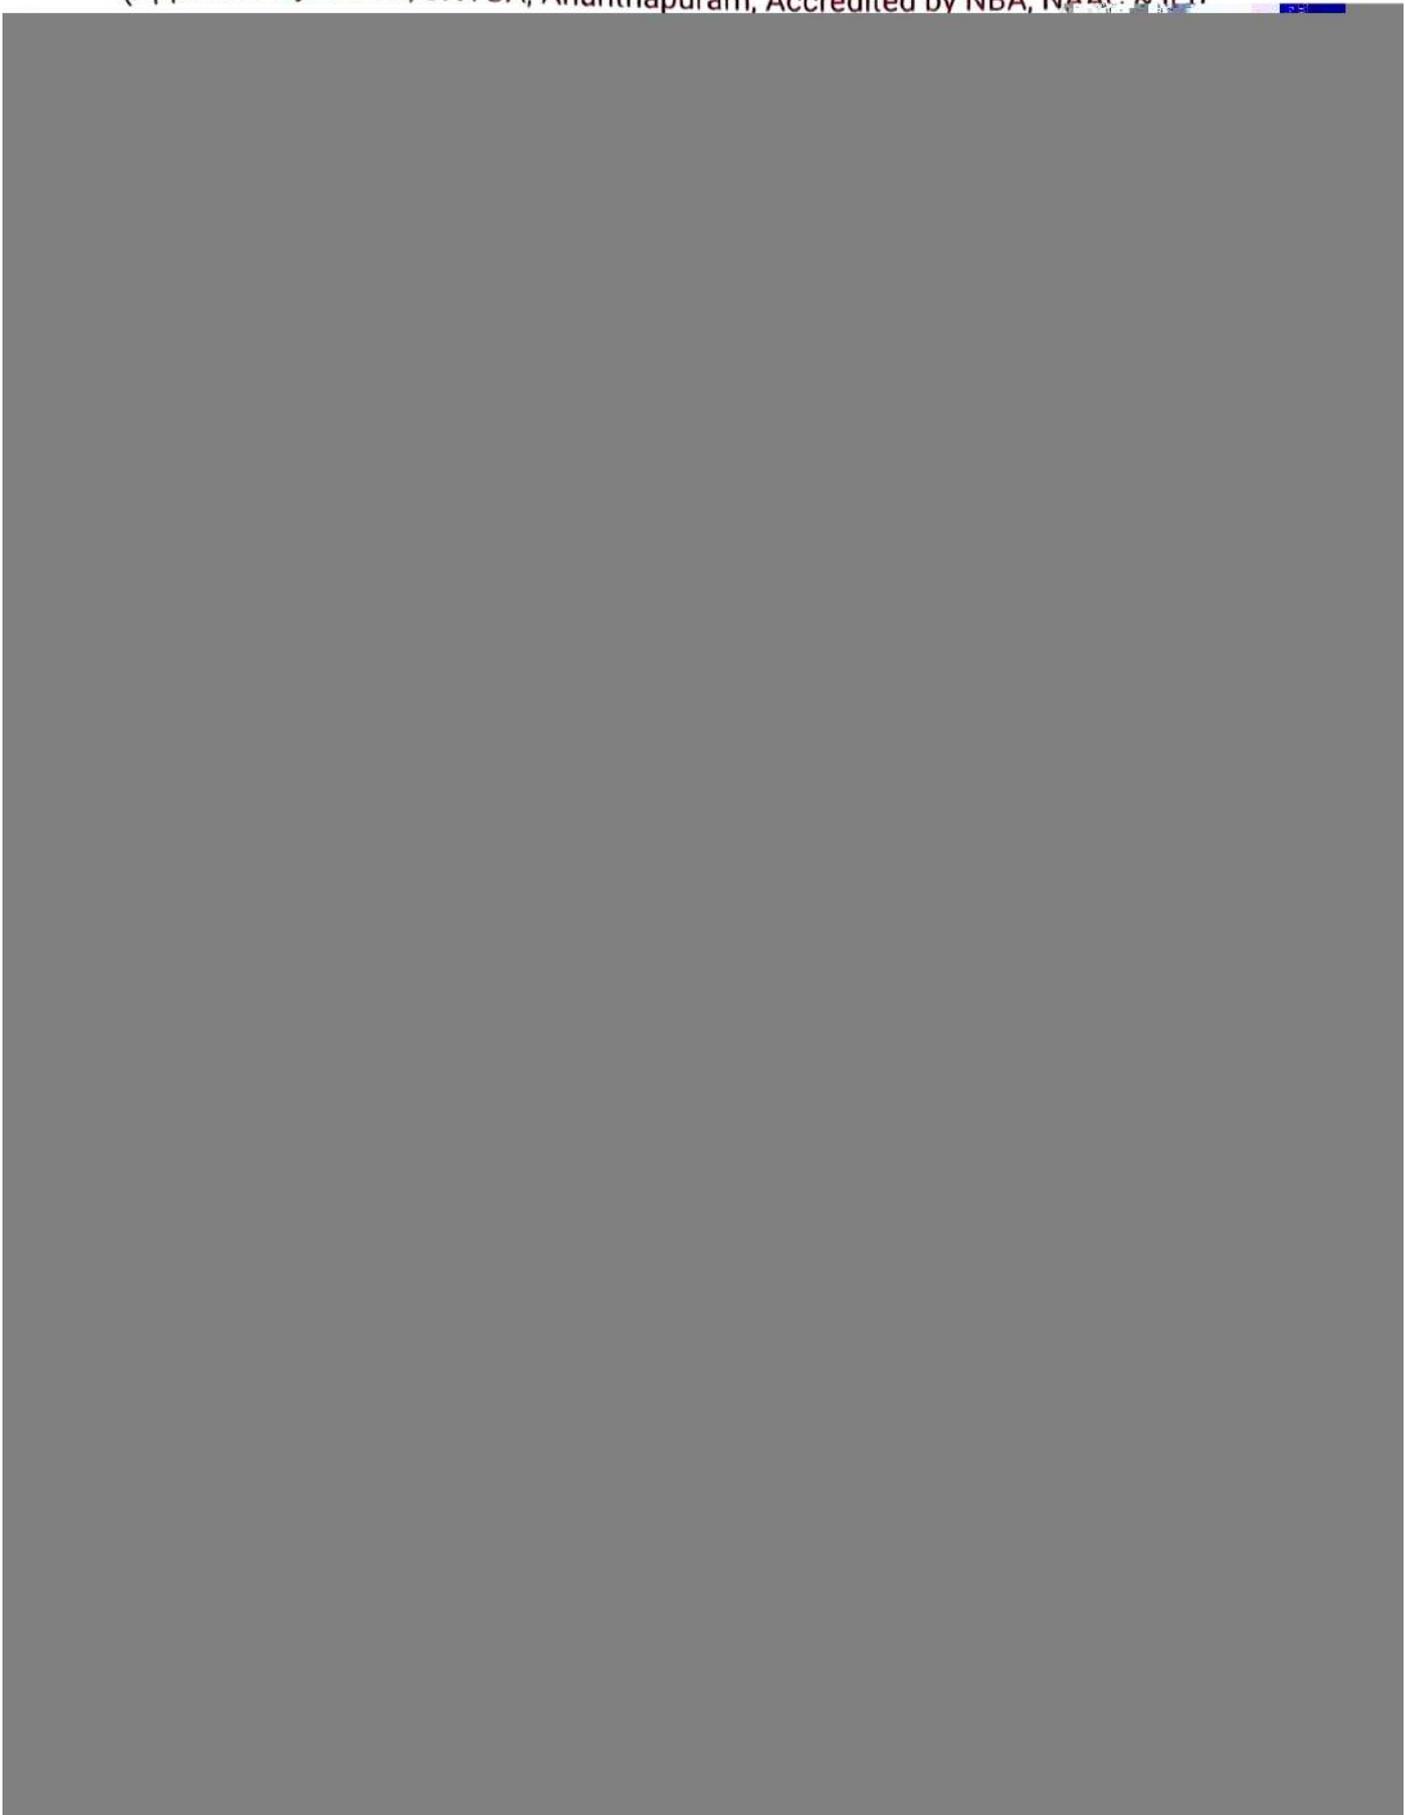

## **10. CONCLUSION**

MANETs are wireless based networks of mobile nodes with limited resources like computation power, communication range and storage capabilities, shared channel, usually for economical reasons. There is no centralized authority to monitor the nodes and nodes can join and leave the network any time. So if any malicious node joins the network then it is very difficult to trace that node. So it is necessary to detect and isolate that node from entire network for smooth operations. To secure the communication over MANETs there must be a method which can ensure the detection and prevention from the attacks like Black Hole. Mobile ad hoc network resources suffer from this attack. This research work analyzes the impact of black hole attack over MANET and proposed a method which is able to handle black hole attack over DSR.

## ABSTRACT

In the current high-performance computers or high-end servers, Dragonfly networks were widely used. Fault-tolerant routing is important in the dragonfly network. The rich interconnections offer the network strong capacity to withstand faults. Mapping routers in a group and groups in the dragonfly network into two different hyper cubes introduces a modern deadlock free adaptive routing method focused on a modern two-layer protection knowledge model. The new fault-tolerant routing algorithm allows for static and dynamic errors. Our system will evaluate whether a packet will enter the destination at the source using the new security information paradigm, which prevents dead-ends and without goals.

## 9.7 CONCLUSION:

A new deadlock-free adaptive routing algorithm in dragonfly networks based on a modern two-layer protection knowledge model is suggested by mapping routers in a community and groups of dragonfly networks into two different hyper cubes. The current fault-tolerant routing algorithm does not need any virtual channels, just two distinct buffers at each port of entry. The new approach is tolerable.

## 9.8 FUTURE EXPERIENCE:

It is achieved by reconfiguring the details about the protection. More specifics are described below. If a regional connection is defective because it's a hypercube connection, the group-level hypercube protection details must be changed.

After a finite amount of loops, which is linked directly to the destination community, each packet will still advance to the router after entering the intermediate community since the connection is defect-free.

We suggest an improved adaptive fault-tolerant routing method focused on the current model for protection details and a new framework for flow management.

## ABSTRACT

Wireless sensor networks (WSNs) are increasingly being used in a wide range of applications, from environmental monitoring to healthcare. The challenge of designing efficient WSNs lies in the limited energy resources of the nodes, which must be able to operate for long periods of time without the need for frequent recharging or replacement. This paper presents a novel energy-efficient protocol for WSNs, which aims to minimize energy consumption while maintaining high network performance. The proposed protocol is based on a combination of duty cycling and data aggregation techniques, and is evaluated through extensive simulations. The results show that the proposed protocol significantly outperforms existing protocols in terms of energy efficiency and network lifetime.

## 10. CONCLUSION

MANETs are wireless based networks of mobile nodes with limited resources

## ABSTRACT

Secure secret word storage is an indispensable viewpoint in frameworks dependent on verification, which is as yet the most generally utilized validation strategy.

secret key

## Authentication Using Encrypted Negative Passwords

## ABSTRACT

This project saves Human lives from a driving pattern by detecting an driving pattern before it occurs or in case it happens. But this need advance accurate human detection and also accident detection capability. Vehicle will avoid accidents.

## CHAPTER-11

### CONCLUSION :

We propose an intelligent vehicle system for accident prevention and making the world a much better and safe place to live. Passive Infra-red sensor is a reliable solution for detecting human or animals and this technique certainly can save lots of life. Pre-crash detection system must be equipped with combination of different sensors. Identifying people or creatures including impediments will unquestionably give us a superior answer for lessen the passing of people in street crash. We ceaselessly filter for different parameters of vehicle, for example, motor temperature, speed, Gas, eye squint and liquor sensors. On the off chance that the driver is found to have liquor in the breath, it cautions and after that turns the bell is worked and thus plausibility of mishap is maintained a strategic distance from. The reduced plan and proficient following calculation make the vehicle following framework an exceedingly solid GPS beacon particularly in clogged street systems. Joining the direction of the guide coordinated street fragments with the vehicle bearing incredibly expands the exactness of deciding the careful street portion on which the vehicle ventures. The expansion of start control, mishap caution and GUI increment explorer and vehicle security by giving brief data about the vehicle's area to the observing framework which Journal of Traffic and Logistics Engineering Journal of Traffic and Logistics Engineering 11 gives visuals of precise at various times areas of the vehicle.

## ABSTRACT

Institutions have a more number of students who pay examination fees through cash deposits, accounts in specific bank branches. These methods of paying fees have not been efficient enough especially during periods of examinations when most of the students are paying fees to meet the requirements for entering examination rooms.

The process of paying fees is characterized by long queues, too much waiting by students and congestion at fee collection center where payments are made. It showed that most of the students were unsatisfied with the current modes of paying fees to the institutions.

As the world is digitalized to overcome the problem of above situation the proposed system is to develop online fee payment system. To accomplish system analysis and design Data flow diagrams and Entity relationship diagrams were used.

The system was implemented using Apache web server, Mysql database server, Hypertext Preprocessor, Hypertext markup language, Cascading style sheets and JavaScript institution and agrees that an online fees payment system can improve the process of fee payment. The result of the project was an online fees payment system for institution. This system provides relief of the long endured problems of the current modes of payment at the institution.

It is mainly used for the students who are not available in the college to pay their regular and supplementary fees by logging with their hallticket numbers in the portal.

## 7. CONCLUSION

The undertaking looked to build up an online expenses instalment framework that gives help of the long suffered issues of the present methods of paying charges in Universities. Issues that understudies and their patrons confronted with respect to paying test expenses to the college were distinguished and an answer was structured. Scientists built up an online framework that empowers understudies and their patrons to pay college charges from wherever they are utilizing credit and platinum cards.

This framework was invited by the entirety of its clients who trusted it would take care of a large portion of the issues and improve conditions in regards to paying test expenses in University. The venture accomplished every one of its destinations and accordingly, MUK-OFPS was structured, created, tried and approved with genuine clients. Henceforth, it was demonstrated that this online framework was fit to be executed.

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
0	0	0	6

**Course Objectives:**

- To make the students familiar to apply the knowledge gained from the theoretical subjects in the entire course.

Students are required to take up a project work, in which the student can choose any specific problem of industry or industry-based project work. Alternatively, it can be secondary source based or field-based project work. Before the commencement of the project work, each student is required to submit a synopsis indicating the objectives, methodology and frame work for analysis. The project should have an internal faculty has guide. The student can initiate the project work in the penultimate semester of the course

**Course Outcomes:**

At the end of the course, the student will be able to apply the various concepts in real time scenarios

**PROGRAM OUTCOMES:**

1. **Management Knowledge:** Apply knowledge of Management Theories and Practices to solve Business Problems.
2. **Critical Thinking:** Foster Analytical and Critical thinking abilities for Data – based decision making.
3. **Value Based Leadership:** Ability to develop value-based Leadership.
4. **Communication and Ethics:** Ability to understand, analyse and communicate global, economic, legal, and ethical aspects of business.
5. **Multidisciplinary Environment:** Ability to lead themselves and others in the achievement of organisational goals, contributing effectively to a team environment.
6. **Entrepreneurship:** Ability to evaluate best entrepreneurial opportunities and manage start-ups in the present Business world.
7. **Social Responsiveness:** Apply ethical principles and understand the impact of the Professional management solutions in societal and environmental contexts.
8. **Life Long Learning:** Ability to engage in independent and life long learning in the context of managing unpredictable Societal and Global issues.

# A STUDY ON RECRUITMENT AND SELECTION AT BHARATHI CEMENT PVT.LTD

---

## 1. INTRODUCTION

### 1.1: BACKGROUND OF THE STUDY:

Recruitment and selection policies in local authorities can be traced back to the 1970s when councils were recruiting staff from the U K .The term recruitment refers to the process of attracting sufficient and suitable potential candidates for the vacant positions in the organization. The aim is to ensure that the organization's demand for employees is met by attracting peoples in a cost- effective manner. Selection on the other hand, is the process of identifying the most suitable candidates that meet the requirements for the vacant positions in the organization. The aim is to identify, individuals that are most likely to fulfill the requirements of the organization.

In 1970, the ministry of the local government and housing directed local authorities to stop recruiting expatriate staff from abroad. Local authorities were required to submit to the ministry of local government and housing the number of the vacant positions they wanted the centralized panel to fill. Local authorities were also required to prove detailed information about the vacancies to the panel. In 1971, the ministry of local government and housing changed the system of recruiting expatriate staff. The 1971-1973 centralized panels did not provide a solution to the staff shortages in local authorities. The reasons that the ministry of local government and housing gave for establishing the centralized recruitment panel were largely economical.

The local Government Services Regulation Act Number 191 of 1975 established Local Government Service Commission which was the sole authority performing personnel functions for all councils in the country. The objective behind establishing such a body was to create a unified and centralized recruitment system and standardized conditions of service. It was hoped that the commission would recruit enough personnel for all councils in the country. However, staff shortage continued in local authorities.

In 1991, the Local Government Act No.22 was enacted which provided for a separate local government personnel system. Each local authority was responsible for all personnel matters relating to recruitment, remuneration, discipline and separation. However, in 2010 the Local Government Service Commission (LGSC) was re-established under statutory instrument number 6 of 2010 and took responsibility of all personnel matters. It is responsible for, among other

## CONCLUSIONS:

In the company the employees are recruited on the basis of their knowledge, skills and abilities. The company provided good atmosphere to employees where they can work comfortably. The company provides the good salary & incentives to employees to retain them in the organization. The recruitment process is knowledgeable experience in Bharathi Cement Corporation Pvt.Ltd and the selection process is also admirable and efficient.

## INTRODUCTION

### 1.1 Background of the study

The foremost objective of finance management is to increase the shareholder's wealth of a firm. The objective can be achieved based on the investment decision or capital expenditure decision and the financing decision or capital structure decisions. The theory of capital structure is one of the most important financial themes in corporate finance and various studies use this theory to highlight the significance of debt financing. Capital structure of a firm is defined by its leverage; that is a mix of debt and equity financing which is subject to different financial difficulties. Financial leverage represents the total debt reported to the equity of a firm, reflecting the capacity of the firms to attract external financial resources in order to improve the efficiency of the equity. Leverage has been conceived also as a modality by which a firm can increase its growth opportunity. So, Leverage decision is fundamental for any business organization because of the need to maximize return to the various stake holders and also because of the fact that such decision has great impact on the firms' ability to deal with competitive environment. Leverage had incorporated also the meaning of the risk increasing philosophy. It is important for business that how to choose the combination of debt and equity to achieve optimum capital structure that would minimize the firm's cost of capital and improves return to owners of the business. One of the best ways in which firm increases its profit is through financial leverage. Financial leverage uses debt instruments so that the anticipated level return on the firm's equity would increase.

Financial decision is one of the integral and important parts of financial management in any kind of business concern. A sound financial decision must consider the board coverage of the financial mix (Capital Structure), total amount of capital (capitalization) and cost of capital (K<sub>o</sub>). Capital structure is one of the significant things for the management, since it influences the debt equity mix of the business concern, which affects the shareholder's return and risk. Hence, deciding the

### 5.3 CONCLUSION

From the analysis it is clear that the operating profit of the "AMARARA BATTERIES LIMITED" is showing fluctuating. Financial leverage is also increasing over the study period and operating leverage is constant. It is to be concluded that the shareholders fund is increasing year by year. The amount of contribution is also showing increasing trend as net sales of the company increasing, the net profit after taxes increasing operating profit ratio of the company is decreasing continuously from 2015-18, on overall performance of the company analyzed with respect to leverage and profitability is good.

# RISK AND RETURN ANALYSIS OF SELECTED CEMENT SECURITIES

## INTRODUCTION

Every investment is characterized by risk and return. Risk is a situation involving exposure to uncertainty. When an investor utilizes funds into some securities, he/she does so after analyzing the expected return. If actual return acquired is the same as the expected return, such an investment is considered to be risk free i.e. an investment with no risk. Usually, elevated risk higher the return, lower the risk underneath the return, however, a general understanding of this phenomenon is not adequate to make proper decision relating to investment. A more quantifiable analysis is needed to understand investment better. The quantifiable analysis is finished by use of simple arithmetic and statistical to analyses the relationship. Risk is defined as the chance that investments actual return will be dissimilar from expected. This includes the possibility of losing some or all of the genuine investment.

Risk and return is a composite topic. There are many types of risks and many ways to assess and measure risk. In the theory and practice of investing, a widely habituated definition of risk is: "Risk is the uncertainty that an investment will gross its expected rate of return."

Note that this definition does not differentiate between loss and gain. Typically, individual investors think of risk as the feasibility that their investments could lose money. They are likely to be completely happy with an investment return that is greater than expected - a "positive surprise." However, since risky assets generate negative surprises as well as positive ones, defining risk as the uncertainty of the rate of return is reasonable. Greater uncertainty results in greater likelihood that the investment will generate larger gains, as well as greater likelihood that the investment will generate larger losses (in the short term) and in higher or lower accumulated value (in the long term.)

In financial planning, the investment goal must be considered in defining risk. If your goal is to provide an acceptable amount of retirement income, you should construct an investment portfolio to generate an expected return that is sufficient to meet your investment goal. But because there is uncertainty that the portfolio will earn its expected long-term return, the long-term realized return may fall short of the expected return. This raises the possibility that available retirement funds fall short of needs - that is, the investor might outlive the investment portfolio. This is an example of "shortfall risk." The magnitude and consequences of the potential shortfall deserve special consideration from investors. However, since

## RISK AND RETURN ANALYSIS OF SELECTED CEMENT SECURITIES

### CONCLUSION

From the analysis, it is observed that out of six companies, Zuari is having more return than others selected companies. So from return point of view Zuari is the best choice for investment. Likewise, in risk aspect Zuari and Penna are showing high risk and UltraTech and Ambuja is less risk. Under risk aspect of all companies (Penna cement, UltraTech cement, Zuari cement, Ramco cement, Ambuja cement and Sagar cement) preferred choice. By combining return and risk, Zuari cement is the best one than other selected cement companies. But the investors have to prefer the security which gives maximum returns with minimum risk.

## CHAPTER – 1 INTRODUCTION

The definition of customer satisfaction has been widely debated as organizations increasingly attempt to measure it. Customer satisfaction can be experienced in a variety of situations and connected to both goods and services. It is a highly personal assessment that is greatly affected by customer expectations. Satisfaction also is based on the customer's experience of both contact with the organization (the "moment of truth" as it is called in business literature) and personal outcomes. Some researchers define a satisfied customer within the private sector as "one who receives significant added value" to his/her bottom line—a definition that may apply just as well to public services. Customer satisfaction differs depending on the situation and the product or service. A customer may be satisfied with a product or service, an experience, a purchase decision, a salesperson, store, service provider, or an attribute or any of these. Some researchers completely avoid "satisfaction" as a measurement objective because it is "too fuzzy an idea to serve as a meaning full benchmark." Instead, they focus on the customer's entire experience with an organization or service contact and the detailed assessment of that experience.

For example, reporting methods developed for health care patient surveys often ask customers to rate their providers and experiences in response to detailed questions such as, "How well did your physicians keep you informed?" These surveys provide "actionable" data that reveal obvious steps for improvement.

Customer satisfaction is a highly personal assessment that is greatly influenced by individual expectations. Some definitions are based on the observation that customer satisfaction or dissatisfaction results from either the confirmation or disconfirmation of individual expectations regarding a service or product. To avoid difficulties stemming from the kaleidoscope of customer expectations and differences, some experts urge companies to "concentrate on a goal that's more closely linked to customer equity." Instead of asking whether customers are satisfied, they encourage companies to determine how customers hold them accountable. Customer satisfaction, a business term, are a measure of how products and services supplied by a company meet or surpass customer expectation. It is seen as a key performance

### Conclusion:

Customer are the major assets for every organization. Companies in order to get profits, reputation and brand value in the society, it should concentrate on increasing customer satisfaction. Beverage, Food brand value and fact contents plays a key role in customer satisfaction as NESTLE company is following these best techniques, it gives customer satisfaction. So, that it is giving major competition to the other Brands.

## **1.INTRODUCTION**

This chapter presents the background information of the study on job satisfaction of statement of the Problem, research questions, research objectives, relevance of the research and summary.

### **1.1 BACKGROUND TO THE STUDY:**

Success of an organization greatly depends upon its human capital rather than only on its technical and financial soundness. A satisfied human resource is the biggest asset of any organization in manufacturing as well as service sector organizations like financial sector. Satisfied employees are responsible for increment of productivity and profitability of a bank. Low level of job satisfaction becomes strong reason for work slow-down, high absenteeism and turnover which leads the poor performance of organizations. Efficient human resource management and maintaining higher job satisfaction level in banks determine not only the performance of the bank but also effect on its continuous growth.

Job satisfaction is considered as a critical success factor for organizations because it enhances employee retention, increases productivity, improves teamwork, reduces turnover, recruiting and training costs, and ultimately increases the financial performance of commercial banks. Employees who have higher job satisfaction are usually less absent, less likely to leave, more productive, more likely to display organizational commitment, and more likely to be satisfied with their lives (Lease, 1998).

Employees' job satisfaction is a multi-disciplinary concept that results from employees' perception of their jobs and the degree to which there is a good fit between them and the organization (Ivancevich, Matteson & Konopaske, 2011). Job satisfaction is regarded as one of the most representative dimensions of organizational behavior (Ghazzawi, 2008). It is defined as

### **1.2 STATEMENT OF THE PROBLEM:**

Employees are the main organizational resource; without them organizations would not exist or function (Worthington & Britton, 2006). In recent years, measuring employees' satisfaction has become a subject of growing interest among organizational managements. This organizational interest in measuring job satisfaction has been motivated by the following reasons:

1. Utilitarian reasons such as to increase and improve productivity, organizational commitment, organizational citizenship behaviors, and ultimately, to increase organisational effectiveness.

**CONCLUSION:**

- Employees in Zuari cement have greater emphasis on hygiene factors than motivators, namely working condition, money factor and company policy.
- It also found that the love for money has a mediating effect on the relationship between money and job satisfaction.
- These need to ensure that they take four significant motivational factors into consideration and prioritize them over other motivational factors as these variables will improve the job satisfaction.
- The retailer would have lower turnover if they make the necessary improvements on the working conditions
- Provide employees with flexible working schedule.
- Link the performance of employees with the appropriate monetary rewards and incentives workers can be concurrently intrinsically and extrinsically motivated.

## **ABSTRACT**

A budget is a government's plan on the use public resources to meet the citizens' needs. Budget Transparency means that ordinary citizens and civil society organizations can access information about how public resources are allocated and used. Budget Transparency enables citizens to assess whether government officials are good stewards of public funds. Budget Transparency is a fundamental precondition for accountability and public participation in governance processes.

Lack of transparency and democratic control of budget processes creates opportunities for graft and corruption. A non-transparent budget can neither be properly analyzed nor can its implementation be effectively monitored.

Transparency allows citizens to provide inputs into the budget process and to assess whether a government executed the development plans in accordance with budgetary allocations.

## CONCLUSIONS

This Project named "Corruption Control through Budget Maintenance" acts as a tool that displays all the transactions during a budget year transparently from budget officer who releases funds to the contractor who receives the amount finally. It also acts as an interface to view the Budget details, Contracts and as a result the development process done by the government in between a particular period. So, we are able to achieve all these requirements and also during the process of development we have learnt the technologies like Java, JavaScript, Html, CSS etc., We also learnt how to work with Servers such as Tomcat and Oracle.

## ABSTRACT

Cloud-supported Internet of Things (Cloud-IoT) has been broadly deployed in smart grid systems. The front-ends are responsible for data acquisition and status supervision, while the substantial amount of data is stored and managed in the cloud server. Achieving data security and system efficiency in the data acquisition and transmission process are of great significance and challenging, because the power grid-related data is sensitive and in huge amount. In this paper, we present an efficient and secure data acquisition scheme based on CP-ABE (Cipher text Policy Attribute Based Encryption). Data acquired from the terminals will be partitioned into blocks and encrypted with its corresponding access sub-tree in sequence, thereby the data encryption and data transmission can be processed in parallel. Furthermore, we protect the information about the access tree with threshold secret sharing method, which can preserve the data privacy and integrity from users with the unauthorized sets of attributes. The formal analysis demonstrates that the proposed scheme can fulfill the security requirements of the Cloud-supported IoT in smart grid. The numerical analysis and experimental results indicate that our scheme can effectively reduce the time cost compared with other popular approaches.

## **Conclusion :**

Cloud-IoT techniques are widely deployed in Smart Grid. Huge amount of data is gathered by IoT front-end devices and stored in the back-end cloud servers. However, achieving data security and system efficiency in the data acquisition and transmission process are of great significance and challenging. Existing related schemes cannot deal with this challenging issue well. To tackle with this problem, we propose a secure and efficient data acquisition scheme for Cloud-IoT in smart grid. In the proposed scheme, the large data is partitioned into several blocks, and the blocks are encrypted/decrypted and transmitted in sequence.

She has completed the assigned project well within the time frame. She is sincere, hardworking and her conduct during the project is commendable.

## Abstract

Identity-based encryption (IBE) is a public key cryptosystem and eliminates the demands of public key infrastructure (PKI) and certificate administration in conventional public key settings. Due to the absence of PKI, the revocation problem is a critical issue in IBE settings. Several revocable IBE schemes have been proposed regarding this issue. Quite recently, by embedding an outsourcing computation technique into IBE, Li *et al.* proposed a revocable IBE scheme with a key-update cloud service provider (KU-CSP). However, their scheme has two shortcomings. One is that the computation and communication costs are higher than previous revocable IBE schemes. The other shortcoming is lack of scalability in the sense that the KU-CSP must keep a secret value for each user. In the article, we propose a new revocable IBE scheme with a cloud revocation authority (CRA) to solve the two shortcomings, namely, the performance is significantly improved and the CRA holds only a system secret for all the users. For security analysis, we demonstrate that the proposed scheme is semantically secure under the decisional bilinear Diffie-Hellman (DBDH) assumption. Finally, we extend the proposed revocable IBE scheme to present a CRA-aided authentication scheme with period-limited privileges for managing a large number of various cloud services.

## CONCLUSIONS

In this article, we proposed a new revocable IBE scheme with a cloud revocation authority (CRA), in which the revocation procedure is performed by the CRA to alleviate the load of the PKG. This outsourcing computation technique with other authorities has been employed in Li *et al.*'s revocable IBE scheme with KU-CSP. However, their scheme requires higher computational and communicational costs than previously proposed IBE schemes. For the time key update procedure, the KU-CSP in Li *et al.*'s scheme must keep a secret value for each user so that it is lack of scalability. In our revocable IBE scheme with CRA, the CRA holds only a master time key to perform the time key update procedures for all the users without affecting security.

For security analysis, we have demonstrated that our scheme is semantically secure against adaptive-ID attacks under the decisional bilinear Diffie-Hellman assumption. Finally, based on the proposed revocable IBE scheme with CRA, we constructed a CRA aided authentication scheme with period-limited privileges for managing a large number of various cloud services.

### Future Enhancement

It is not possible to develop a system that makes all the requirements of the user. User requirements keep changing as the system is being used. Some of the future enhancements that can be done to this system are:

- Based on the future security issues, security can be improved using emerging technologies.
- Adding more GUI to user convenient
- Data storage and retrieval will become faster and easier to maintain.
- Time updated key module can be added.

## Certificate

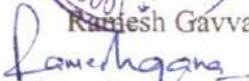

This is to certify that **Mr. S Rama Sudhakar Reddy** (Regd No: 16701F0019) from **Annamacharya Institute of Technology & Sciences (Autonomous), Rajampet**, student of MCA has successfully completed the project work titled **“Optimizing Information Leakage in Multicloud Storage Services”** as part his course curriculum in our organization.

He has done the project using **Java Technologies** during the project period of December 2018 to April 2019, under the guidance and supervision of Mr. Shiva Krishna, from 1000Projects IT Technologies (India) Pvt. Ltd.

He has completed the assigned work successfully within the time frame. His sincerity, hard work and conduct during the project are commendable.

We wish him all the best in future endeavors.

For 1000Projects IT Technologies (India) Pvt. Ltd.

Yours Sincerely,  
  
Ramesh Gavva.  
  
Managing Director.

**1000Projects IT Technologies (India) Private Limited**

## ABSTRACT

Many schemes have been recently advanced for storing data on multiple clouds. Distributing data over different cloud storage providers (CSPs) automatically provides users with a certain degree of information leakage control, for no single point of attack can leak all the information. However, unplanned distribution of data chunks can lead to high information disclosure even while using multiple clouds. In this paper, we study an important information leakage problem caused by unplanned data distribution in multicloud storage services. Then, we present StoreSim, an information leakage aware storage system in multicloud. StoreSim aims to store syntactically similar data on the same cloud, thus minimizing the user's information leakage across multiple clouds. We design an approximate algorithm to efficiently generate similarity-preserving signatures for data chunks based on MinHash and Bloom filter, and also design a function to compute the information leakage based on these signatures. Next, we present an effective storage plan generation algorithm based on clustering for distributing data chunks with minimal information leakage across multiple clouds.

## CONCLUSIONS

Distributing data on multiple clouds provides users with a certain degree of information leakage control in that no single cloud provider is privy to the entire user's data. However, unplanned distribution of data chunks can lead to avoidable information leakage. We show that distributing data chunks in a round robin way can leak user's data as high as 80% of the total information with the increase in the number of data synchronization. To optimize the information leakage, we presented the StoreSim, an information leakage aware storage system in the multicloud. Store Sim achieves this goal by using novel algorithms, BFSMinHash and SPClustering, which place the data with minimal information leakage (based on similarity) on the same cloud. Through an extensive evaluation based on two real datasets, we demonstrate that StoreSim is both effective and efficient (in terms of time and storage space) in minimizing information leakage during the process of synchronization in multicloud. We show that our StoreSim can achieve near-optimal performance and reduce information leakage up to 60% compared to unplanned placement. Finally, through our attackability analysis, we further demonstrate that StoreSim not only reduces the risk of wholesale information leakage but also makes attacks on retail information much more complex.

## CERTIFICATE

This is to confirm and certify **Mr.K.ManojKumarRajuM.C.A**, student of **Annamacharya Institute of Technology&Sciences (Autonomus).Rajampet**. With **Reg.No 16701F0012** has successfully completed his project work titled "**Online Student Counselling Record Management**" on JAVA Technologies as part of his course curriculum.

He has done this project using JAVA during the period of December 2018 to April 2019 under the guidance and supervision of **Mr.G.Brahmendra Nath Reddy** from **Incredible Technologies Pvt.Ltd.**

He has completed the assigned Project well within the time frame. He is sincere, hardworking and his conduct during the project is commendable.

For Incredible Technologies Pvt.Ltd,

Reddy

(Project Guide)

## **ABSTRACT**

Our project online Counselling Record gives the complete student information which includes their personal details, student record, student's academic record (internal marks, attendance details) and summary sheet. There is also a facility for faculty members to give suggestions for the students related to their academics and attendance. Registration is also provided for the students and faculty to access the details and modify them. Authentication is provided for this application so that only registered users can access. Report generation feature is provided using to generate different kind of reports. The system provides facility to track the student attendance and marks. Admin send marks and attendance to their parent's mobile numbers. Faculty can also give suggestions to students mobile numbers.

## CONCLUSION

In this project "ONLINE STUDENT COUNSELLING RECORD MANAGEMENT" can replace the manual system that transformation of information can be delivered to their parent's mobile phones.

# CERTIFICATE OF INTERNSHIP

Date of Issue: **14th June 2023**

This is to certify that Ms./Mr. **DAKSHAYANI ULLI** bearing Regd No. **21701A0102**

has undergone internship Training for/in **Revit Architecture and Structure**

at **Annamacharya Institute of Technology & Sciences** in association with **Learnnet Skills Limited**

from **24th April 2023** to **10th June 2023**

During the Training we found his/her conduct good at work.

A handwritten signature in blue ink, appearing to read "Akshay", is written over a dotted line.

Cert No. ACETII24474

**Andhra Pradesh State Skill Development Corporation (APSSDC)  
Indo-Euro Synchronization (IES)**

## ***CERTIFICATE OF APPRECIATION***

This certificate is awarded to

**Mr./Ms. P Rizwana**

of Annamacharya Institute of technology and science, Rajampet

for successfully completing the

International Internship

In Advance certification on Emerging Technologies

During August 29<sup>th</sup> - October 21<sup>st</sup> 2022

Learning Modules include Mechatronics and Robot Operating System (ROS) Programming by  
FH Aachen University, Germany, and Programmable Logic Controller (PLC) Modules from  
FESTO India.

### **Certification Partners**

**Indo Euro  
Synchronization**  
Education and Research Resources

**Raj Vangapandu**

CEO

Indo-Euro Synchronization

**S. Satyanarayana, IAS**

Managing Director

APSSDC

Roll No. 20701A0227

Cert No. ACETII24392

**Andhra Pradesh State Skill Development Corporation (APSSDC)  
Indo-Euro Synchronization (IES)**

## ***CERTIFICATE OF APPRECIATION***

This certificate is awarded to  
**Mr./Ms. Durga Praveen Reddy Alugunti**  
of Annamacharya Institute of technology and science, Rajampet  
for successfully completing the  
**International Internship**  
In Advance certification on Emerging Technologies  
During August 29<sup>th</sup> - October 21<sup>st</sup> 2022

Learning Modules Include Mechatronics and Robot Operating System (ROS) Programming by  
FH Aachen University, Germany, and Programmable Logic Controller (PLC) Modules from  
FESTO India.

**Certification Partners**

L I E

Roll No. 20701A0225

Cert No. ACETII24390

**Andhra Pradesh State Skill Development Corporation (APSSDC)  
Indo-Euro Synchronization (IES)**

## ***CERTIFICATE OF APPRECIATION***

This certificate is awarded to

**Mr./Ms. Kanaparthi Dilson**

of Annamacharya Institute of technology and science, Rajampet  
for successfully completing the  
International Internship

In Advance certification on Emerging Technologies

During August 29<sup>th</sup> - October 21<sup>st</sup> 2022

Learning Modules Include Mechatronics and Robot Operating System (ROS) Programming by  
FH Aachen University, Germany, and Programmable Logic Controller (PLC) Modules from  
FESTO India.

TO WHOMSOEVER IT MAY CONERN

Dear **UMAMAHESWARI NAGELLA (20701A02F9)**,

I am pleased to inform you that you have successfully completed your internship program on the topic of "**Designing and Developing IoT Solutions for Real-World Problems**". During your internship from **20-03-2023 to 19-04-2023**, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards designing and developing IoT solutions for real-world problems. Your ability to collaborate and work in a team environment was exceptional, and you contributed significantly to the success of the project.

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,

Dear **VENKATA SUNIL BABU GAJULA (21705A0250)**,

I am pleased to inform you that you have successfully completed your internship program on the topic of "**Designing and Developing IoT Solutions for Real-World Problems**". During your internship from **20-03-2023 to 19-04-2023**, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards designing and developing IoT solutions for real-world problems. Your ability to collaborate and work in a team environment was exceptional, and you contributed significantly to the success of the project.

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,  
  
[D. Manoj Kumar]

I am pleased to inform you that you have successfully completed your internship program on the topic of "**Designing and Developing IoT Solutions for Real-World Problems**". During your internship from **20-03-2023 to 19-04-2023**, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards designing and developing IoT solutions for real-world problems. Your ability to collaborate and work in a team environment was exceptional, and you contributed significantly to the success of the project.

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,  
  
S. Jayashankar

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,  
  
[D. Manoj Kumar]

Dear **DILIP KUMAR K (21705A0205)**,

I am pleased to inform you that you have successfully completed your internship program on the topic of "**Designing and Developing IoT Solutions for Real-World Problems**". During your internship from **20-03-2023 to 19-04-2023**, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards designing and developing IoT solutions for real-world problems. Your ability to collaborate and work in a team environment was exceptional, and you contributed significantly to the success of the project.

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,  
  
[D Manoj Kumar]

I am pleased to inform you that you have successfully completed your internship program on the topic of "**Designing and Developing IoT Solutions for Real-World Problems**". During your internship from **20-03-2023 to 19-04-2023**, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards designing and developing IoT solutions for real-world problems. Your ability to collaborate and work in a team environment was exceptional, and you contributed significantly to the success of the project.

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,  
  
[D. Manoj Kumar]

TO WHOMSOEVER IT MAY CONERN

Dear **VIJAY KUMAR REDDY KADIRI (21705A0252)**,

I am pleased to inform you that you have successfully completed your internship program on the topic of "**Designing and Developing IoT Solutions for Real-World Problems**". During your internship from **20-03-2023 to 19-04-2023**, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards designing and developing IoT solutions for real-world problems. Your ability to collaborate and work in a team environment was exceptional, and you contributed significantly to the success of the project.

During the internship, you were able to:

- ❖ Gain an understanding of IoT technology and its applications in real-world problems
- ❖ Participate in the design and development of IoT solutions
- ❖ Test and validate IoT solutions and analyse the results
- ❖ Collaborate with other team members to complete project tasks
- ❖ Apply critical thinking and problem-solving skills to identify and address project challenges
- ❖ Your positive attitude, dedication, and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was a pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavours. We wish you all the best in your future endeavours.

Sincerely,

Dear Mr. **BALA VENGAIAH BATHENA** **Roll No: 21701A0301**

I am pleased to inform you that you have successfully completed your internship program on the topic “3D Printing, Robotics and IOT Programming”, conducted by our organization from 03-05-2023 to 03-06-2023. At the time of the Internship, you have demonstrated a strong commitment to learning and actively engaging in the projects assigned to you.

Throughout the internship, you have shown great interest and dedication towards robotics and its applications in real-world problems. Your ability to collaborate and work in team environment was exceptional, and you contributed significantly to the success of the projects.

During the internship, you were able to:

- \* Design and Manufacture the 3D Models with 3DS Max and Luban Slicing softwares.
- \* Gain expertise and understanding in Programming Arduino Microcontroller
- \* Interface Sensors and Actuators for IOT Projects.
- \* Design, Program and Develop various types of Robots
- \* Apply critical thinking and problem-solving skills to identify and address project challenges.

Your positive attitude, dedication and eagerness to learn have made you an asset to the team. Your excellent communication skills and ability to articulate your ideas and thoughts were also notable. It was pleasure having you as a part of our team.

We hope that this internship has provided you with valuable experience and skills that will serve you well in your future endeavors. We wish you all the best.

Sincerely

Issued Date : 22 / 06 / 2023

  
RAM KUMAR, CEO  
PVR TECH HUB

# CERTIFICATE

Annamacharya Institute of  
Technology & Sciences  
Rajampet

This is to certify that Mr./Ms. *Javani Bareddy* bearing

H.T.No. 21701A04B0 has successfully completed the Internship Program on

"Designing Customized Language Translator System Using Deep Learning".

from 01 / 05 / 2023 to 19 / 06 / 2023

Issued Date : 22 / 06 / 2023

  
RAM KUMAR, CEO  
PVR TECH HUB

# CERTIFICATE

Annamacharya Institute of  
Technology & Sciences  
Rajampet

This is to certify that Mr./Ms. Pravankumar Prady Vaddireddy bearing  
H.T.No. 21701A04B1 has successfully completed the Internship Program on  
"Designing Customized Language Translator System Using Deep Learning".

from 01 / 05 / 2023 to 19 / 06 / 2023

Issued Date : 22 / 06 / 2023

  
RAM KUMAR, CEO  
PVR TECH HUB  

# CERTIFICATE

Annamacharya Institute of  
Technology & Sciences  
Rajampet

This is to certify that Mr./Ms. Pradeep Kumar Balamaganagari bearing  
H.T.No. 21701A04B7 has successfully completed the Internship Program on  
"Designing Customized Language Translator System Using Deep Learning".

from 01 / 05 / 2023 to 19 / 06 / 2023

Issued Date : 22 / 06 / 2023

  
RAM KUMAR, CEO  
PVR TECH HUB  

# CERTIFICATE

Annamacharya Institute of  
Technology & Sciences  
Rajampet

This is to certify that Mr./Ms. Pradeep Maram bearing

H.T.No. 21701A04B8 has successfully completed the Internship Program on

"Designing Customized Language Translator System Using Deep Learning".

from 01 / 05 / 2023 to 19 / 06 / 2023

Issued Date : 22 / 06 / 2023

  
RAM KUMAR, CEO  
PVR TECH HUB  

# CERTIFICATE

Annamacharya Institute of  
Technology & Sciences  
Rajampet

This is to certify that Mr./Ms. Rabiya Shaik bearing

H.T.No. 21701A04C2 has successfully completed the Internship Program on

"Designing Customized Language Translator System Using Deep Learning".

from 01 / 05 / 2023 to 19 / 06 / 2023

Issued Date : 22 / 06 / 2023

RAM KUMAR, CEO  
PVR TECH HUB

# CERTIFICATE

Annamacharya Institute of  
Technology & Sciences  
Rajampet

This is to certify that Mr./Ms. Ramatrishna Reddy Lingala bearing

H.T.No. 21701A04D0 has successfully completed the Internship Program on

"Designing Customized Language Translator System Using Deep Learning".

from 01 / 05 / 2023 to 19 / 06 / 2023

Issued Date : 22 / 06 / 2023

Afreen GS

Annamacharya Institute of Technology & Sciences

### **INTERNSHIP CERTIFICATE**

This is to certify that **Ms. AFREEN GS** successfully completed her internship on “**Real-Time Industrial Solutions and Analysis In Analog Circuits Design**” at **Ekalavya Innovative Solutions Pvt. Ltd.**, from 01/06/2023 to 24/07/2023. During this period, we found her, extremely inquisitive and hard working. She was very much interested to learn and willing to put her best efforts and get into the depth of the subject to understand it better.

She has delivered good results and we appreciate her sincere learning throughout the training period.

**EKALAVYA INNOVATIVE SOLUTIONS PVT. LTD.**  
SOLUTIONS | TRAINING | DEVELOPMENT

CIN- U72900AP2021PTC117811

**Certificate Id:** AITSR-07/23-049

**Date:** 24-07-2023

**TO**

Sreenivasulu Dinnemeedi

Annamacharya Institute of Technology & Sciences

**INTERNSHIP CERTIFICATE**

This is to certify that **Mr. SREENIVASULU DINNEMEEDI** successfully completed his internship on “**Real-Time Industrial Solutions and Analysis In Analog Circuits Design**” at **Ekalavya Innovative Solutions Pvt. Ltd.**, from 01/06/2023 to 24/07/2023. During this period, we found him, extremely inquisitive and hard working. He was very much interested to learn and willing to put her best efforts and get into the depth of the subject to understand it better.

He has delivered good results and we appreciate his sincere learning throughout the training period.

Dr. SMV Narayana  
Annamacharya Institute of Technology & Sciences  
New Boyanapalli, Rajampet, Kadapa District  
Andhra Pradesh – 516126

**Subject: Acceptance of Request for Internship Opportunities for MBA Students**

Respected Dr. SMV Narayana,

We appreciate your interest in establishing a collaborative partnership between Annamacharya Institute of Technology & Sciences, Rajampet, and Zielhoch Consultancy for providing internship opportunities to MBA students.

We are delighted to accept your proposal and look forward to welcoming your students as interns at Zielhoch Consultancy. Our organization values the opportunity to contribute to the academic and professional development of students, and we are confident that this collaboration will be mutually beneficial.

Our selection process involves a comprehensive assessment to ensure that the interns align with our organizational goals and the specific needs of our projects. The process will include the following steps:

- 1. Application Submission:** Interested students will be required to submit their resumes and cover letters outlining their career aspirations and relevant skills.
- 2. Shortlisting:** Based on the submitted applications, we will shortlist candidates whose profiles closely match our internship requirements.
- 3. Interviews:** Shortlisted candidates will undergo interviews to assess their communication skills, problem-solving abilities, and alignment with Zielhoch Consultancy's values.
- 4. Final Selection:** The final selection will be based on a holistic evaluation of the candidates' academic background, interpersonal skills, and potential contribution to our projects.

We are excited about the prospect of working with the talented MBA students from Annamacharya Institute of Technology & Sciences, Rajampet, and we believe that this collaboration will provide them with a valuable opportunity to apply their academic knowledge in a practical setting.

To initiate the next steps, we propose scheduling a meeting to discuss the specific details, including the commencement date, duration of the internship, and any additional requirements. Please let us know your availability so that we can coordinate accordingly.

Thank you once again for considering Zielhoch Consultancy for this collaboration. We look forward to a fruitful partnership and a rewarding internship experience for your students.

Best regards,

Himalay Shetty  
Director  
Zielhoch

## **OFFER LETTER**

Date: 01 Oct 2022

Dear K.Ahalya- 21701E0001

College Name - Annamacharya Institute of Technology & Sciences

On behalf of **Zielhoch**, we are pleased to offer you the position of Intern with our company. Hope you will perform your best. All of us at **Zielhoch** are excited that you would be joining our team!

Please find below details regarding your internship:

**Department : Marketing & Finance**

**TO WHOMSOEVER IT MAY CONCERN**

This letter certifies that **Mr. Chennamsetty Tirupathi Balaji (19705A0257)** from Annamacharya Institute of Technology & Sciences (**Autonomous**), Rajampet has completed his Virtual Internship training program on **INDUSTRIAL INTERNET OF THINGS (IIoT)** at EnFlare Technologies, Nellore from **4<sup>th</sup> October to 3<sup>rd</sup> November, 2021**

During this internship, he has worked on NodeMCU, Raspberry pi development boards and has implemented **Smart Home Automation Project using AWS IoT services.**

We found him extremely inquisitive and hardworking. He was very much interested to learn new things and was also willing to put his best efforts to get into the depth of the subject to understand it better.

We wish him all the best in his future endeavors!

Venkata Sarath Panathula  
CTO & Co-Founder

PANHYD/Intern/2021-2022/EV133

6<sup>th</sup> December, 2022

## TO WHOMSOEVER IT MAY CONERN

This letter certifies that Ms **SIVANI VENNAPOOSA (20701A02C6)** from Annamacharya Institute of Technology & Sciences (**Autonomous**), Rajampet has completed her Internship training program on **Real Time Application in Machine Learning using Python** at CUBIT TECH SERVICES, Ambattur, Chennai from **31<sup>st</sup> October to 30<sup>th</sup> November 2022.**

We found her extremely inquisitive and hardworking. She was very much interested to learn new things and was also willing to put her best efforts to get into the depth of the subject to understand it better.

We wish her all the best in her future endeavours!

T.M VISHNU KUMAR

6<sup>th</sup> December, 2022

## TO WHOMSOEVER IT MAY CONERN

This letter certifies that Ms **SUNANDA CHITRALA (21705A0242)** from Annamacharya Institute of Technology & Sciences (**Autonomous**), Rajampet has completed her Internship training program on **Real Time Application in Machine Learning using Python** at CUBIT TECH SERVICES, Ambattur, Chennai from **31<sup>st</sup> October to 30<sup>th</sup> November 2022**.

We found her extremely inquisitive and hardworking. She was very much interested to learn new things and was also willing to put her best efforts to get into the depth of the subject to understand it better.

We wish her all the best in her future endeavours!

T.M VISHNU KUMAR  
Managing Director
