Upcycling isn't just the practice of transforming old materials into useable objects; it's the process of breathing a new lease of life into well used and loved items to give them a new story and personality. All this while at the same time creating something that is useful, beautiful.

Recycling is the process of taking waste, generally consumer materials – plastic, paper, metal or glass – breaking it down and turning it into a reusable product. Upcycling involves turning an unwanted product into a better quality product. The big idea is that items made from recycled materials can be even more desirable than the original products, which can only be a good thing for sustainable production with environmental consciousness.

Green waves environmental solutions design task up-cycling t-shirts, jeans into bags is going well. We collect waste and unused clothes from public and recycle into cloth bag. A green initiative from Green waves environmental solutions towards plastic free world.

Green wave's environmental solutions, we use our creative skills to revive, restore & repurpose to create individual pieces. We also offer an upcycling service. Decorative mat made out of waste single
